‘Next two years are crucial for India’s semiconductor plans’

bl.interview

Vallari Sanzgiri
Mumbai

Access to critical components in the semiconductor industry, such as silicon wafers, is a challenge for India’s nascent semiconductor manufacturing industry.

Ashok Chandak, President of SEMI India and the India Electronics and Semiconductor Association (IESA), says that the association is working on a supply chain management plan to address this issue while working with associated industries.

Chandak says incentives from the government would help in bridging the gap in getting raw materials, while global companies could also be encouraged to set up operations in India.

Edited excerpts:

India lacks adequate access to essential raw materials, and imports silicon wafers and high-purity gases. Will this raise costs and make India’s semicon unviable?

No, it is understood that these are the factors that increase overall cost economics and create disability for Indian industries.

We have to depend on process technology, the manufacturing excellence, or some of the raw materials which are not available.

That is why the Indian government is putting incentives on the table, 50 per cent of the capex by government, and some additional support of up to 10-20 per cent by State governments.

We are telling the industry to get started even if the raw material cost is a bit expensive.

So, we have a disadvantage, but with the government funding that disadvantage is addressed initially for a no of

Several institutes have to modify their course curriculum to include manufacturing-related programmes, and some of the institutes need to tie up with global companies for training

ASHOK CHANDAK
President, SEMI India and IESA

years. The industry needs to think how they will sustain beyond these years.

IESA is working on a plan called the supply chain management, and we have mapped several materials, chemicals required, and started the dialogue with various other associated industries to start developing those things.

Tata Group is setting up a fab unit in Gujarat, but is unable to find skilled labour. How do we address this issue?

India does not have a manufacturing setup, so we don’t have the trained manpower available.

So, multiple things can be done: companies like Tata, which have their own collaborator can send part of their labour force to the collaborator for training, or the collaborator can send trainers to India to train the workforce. Additional training outputs will also come up.

Semi India has already started doing work, which is called the workforce development, where the online professional development courses are getting deployed. We did two sessions already at IIT-Guwahati and IIT-Gandhinagar.

Companies wanting to set up manufacturing operations in India will have to take steps on both these fronts.

But in terms of creating

sufficient workforce, do you have any timeline in mind?

My view is next two years are going to be crucial. Several institutes have to modify their course curriculum to include manufacturing-related programmes, and some of the institutes need to tie up with global companies for training.

Of those, some of the people would be interested in manufacturing jobs. That work has already started, and it will move forward in the next two to three years.

We would see that additional workforce is created that is competent enough to take manufacturing-related jobs.

The US has already come up with a lot of policies with the CHIPS Act. Do you feel that ‘Make in America’ is going to counter ‘Make in India’?

It is definitely going to counter Make In India just as it will affect any other country’s plans because a lot of chip companies are headquartered in the US.

In fact more than 50 per cent of chip manufacturing is by US-based companies.

So, they are the dominant player. Last year, the global semiconductor market was \$650 billion, and more than half is supplied by the US-headquartered companies.

However, they do most of the wafer manufacturing or assembly outside of the US. The current President and administration is pushing many companies to return to the US for this and invest there.

Obviously, that would impact ambitions of any other country, including in India, as we are looking for manufacturing activity in the country.

As for the extent of the impact, the semiconductor market is going to grow beyond \$1 trillion by 2030 as per forecasts. It may go even like more than \$1.1 trillion.

As the market grows, there is a potential opportunity for everybody, and India has to grab a part of it. Even if the manufacturing is moving to the US, it will not be 100 per cent.

There will be something outside the US, and we will have to see how we attract the players and support growth of that portion so that India takes a pie of that total market actually.

Most players coming to India are interested in designing and testing. How do we get more players to go into manufacturing?

That’s a valid point. Most of the global companies so far have committed to India mainly on the design side as they see India has got a chip design/software development/technology development talent.

That is one of the positive signs which builds India in terms of the talent pool. On the manufacturing side, the biggest issue is India’s own demand, which will increase substantially to about \$103 billion by 2030.

So, there is sizeable demand in India itself, which is one of the carrots for companies to invest. There are also several companies that have understood the Indian business model, skilling and competence, which will help us compared to Malaysia, Vietnam, and the Philippines.

Publication	The Hindu Business Line
Link	https://www.thehindubusinessline.com/info-tech/semiconductor-manufacturing-to-grow-substantially-in-next-couple-of-years-in-india-ashok-chandak-president-of-semi-india-and-iesa/article69817480.ece#

Semiconductor manufacturing to grow substantially in next couple of years in India: Ashok Chandak, President of SEMI India and IESA

However, on the manufacturing side, he said the biggest enabler currently is India's own demand, which he expects to increase to about \$103 billion by 2030

Demand for manufacturing in India's semiconductor sector will grow substantially in coming years with Indian corporates showing more interest in the work, said Ashok Chandak, President of SEMI India and IESA.

Speaking to *businessline* about the state of the semiconductor sector in India, Chandak conceded that currently most global companies in India are committed to semiconductor design owing to the country's reputation for its chip design or technology development talent.

However, on the manufacturing side, he said the biggest enabler currently is India's own demand, which he expects to increase to about \$103 billion by 2030.

"There is sizable demand in India itself, which is one of the carrots for companies to invest. There are several companies that have interacted with India because of the design aspect and have understood the Indian climate's business model, skilling and competence. That helps us compared to other Asian countries like Malaysia, Vietnam and the Philippines. Global design centres of global multinationals also keep visiting India, so there is a visibility for us," said Chandak, noting that nearly 70 per cent of companies registering for Semicon India this year are manufacturing-related companies.

The industry leader pointed out the growing interest by Tata, Murugappa group, collaboration between HCL Tech and Foxconn, Kaynes as well as smaller projects such as RRP in Mumbai, Suchi Semicon in Surat, Polymatech in Chennai and RIR Ratan Shah in Odisha.

Regarding global politics, he said the Make-in-America will hurt Make-in-India just like it will affect other countries. However, India will still be able to get sizeable opportunity in the sector.

"Last year, the global semiconductor market was \$650 billion and more than half is supplied by the US-headquartered companies. However, they do most of the wafer manufacturing or assembly outside of the US. The current President and administration is pushing many companies to return to the US. That would impact ambitions of any country, including in India, looking for manufacturing activity in the country," he said, adding that despite this impact, India will still have a sizeable part of the semiconductor pie.

When asked whether such developments could push back India's semiconductor plans, Chandak said the country will be hard-pressed to attract companies but its goals remain feasible enough. He also did not view current US-China dynamics as a big concern for India.

"Before tariff, US was still selling to China, which in turn was selling anywhere it wanted. India's Semicon programme was planned with that scenario in mind. If US puts more restrictions on China, that's an advantageous position for countries like India surely but even if it does not happen, we're just back to the situation 4-6 months ago," said Chandak.

India's semiconductor future depends on supply chain strengthening

The next two years are critical for advancing India's semiconductor ambitions, says Ashok Chandak, President of SEMI India and the India Electronics and Semiconductor Association (IESA), in an interview with Hindu Business Line. This period is expected to lay the groundwork for building a robust semiconductor manufacturing ecosystem in the country. Semiconductor fabs and related industries require several years to become fully operational, so addressing foundational challenges and establishing supply chains now is essential for achieving long-term goals.

One of the primary concerns that IESA is focusing on is ensuring reliable access to raw materials such as silicon wafers. Currently, India depends heavily on imports for these critical inputs, which makes the semiconductor sector vulnerable to global supply disruptions. To mitigate this risk, IESA is working on a comprehensive supply chain management plan. This plan aims to encourage local production and processing of semiconductor-grade materials, foster strong relationships with both domestic and international suppliers, and support policy measures that attract investment in mining, refining, and manufacturing of these raw materials within India.

India's semiconductor ecosystem also faces challenges from skill shortages and the need for specialized infrastructure such as consistent electricity supply, water, and advanced logistics networks. To address these, the government and industry bodies like IESA and SEMI are collaborating to enhance industry-academia partnerships and facilitate training programs tailored to the semiconductor sector's needs.

The government's initiatives, including substantial incentives under schemes like the Production Linked Incentive (PLI) program, have already attracted over \$20 billion in investments from global and domestic players. This momentum should be capitalized upon within the forthcoming two years by strengthening the supply chain, scaling up workforce capabilities, and completing key infrastructure projects.

If India succeeds in capturing even a fraction of the global semiconductor market, the industry could grow to become a \$40 billion sector by 2030, contributing significantly to the country's economy and technological capabilities. The focused efforts led by IESA and SEMI India, particularly in securing raw material access and developing a complete manufacturing value chain, are crucial for transitioning India from an importer of chips and inputs to a competitive global semiconductor manufacturing hub.

Next two years are crucial for India's semicon plans: Ashok Chandak, President of SEMI India and IESA

IESA is working on a supply chain management plan to address the issue of access to raw materials such as silicon wafers, says Ashok Chandak

Access to critical components in the semiconductor industry, such as silicon wafers is a challenge for India's nascent semiconductor manufacturing industry. Ashok Chandak, President of SEMI India and India Electronics and Semiconductor Association (IESA) said the association is working on a supply chain management plan to address this issue while working with associated industries on this. Chandak said that incentives from the government would help in bridging the gap in getting the raw materials while global companies can also be encouraged to set up their operations in India.

Excerpts from the interview:

Q India lacks adequate access to essential raw materials and imports silicon wafers, high-purity gases, etc. Will this raise costs and make India semicon unviable?

No, it is understood that these are the factors that increase overall cost economics and creates a "disability" for Indian industries. We have to depend on process technology, the manufacturing excellence or some of the raw materials which are not available. That is why the Indian government is putting incentives on the table, 50 per cent of the capex by government and some additional support of up to 10-20 per cent by state governments. We are telling industry to get started even if your raw material cost is a bit expensive.

So, we have a disadvantage, but with the government funding that disadvantage is addressed initially for X years. The industry needs to think how they will sustain beyond these years. IESA is working on a plan called the supply chain management and we have mapped several materials, chemicals required and started the dialogue with various other associated industries that they also start developing those things. A lot of global companies would be willing to come and set up their operations in India. Rather than importing everything from China, Taiwan, etc, even those companies themselves may be doing the manufacturing in India.

Q US has already come up with a lot of policies with the CHIPS Act. Do you feel that this Make-in-America is going to counter Make-in-India?

It is definitely going to counter Make-In-India just as it will affect any other country's plans because a lot of chip companies are headquartered in the US. In fact more than 50 per cent of chip manufacturing is by US-based companies. So, they are the dominant player. Last year, the global semiconductor market was \$650 billion and more than half is supplied by the US-headquartered companies. However, they do most of the wafer manufacturing or assembly outside of the US. The current President and administration is pushing many companies to return to the US for this and invest there. Obviously, that would impact ambitions of any other country including India as we are looking for manufacturing activity in the country. As for the extent of the impact, the semiconductor market is going to grow beyond \$1 trillion by 2030, as per forecasts. It may go even like more than \$1.1 trillion. As the market grows there is a potential opportunity for everybody and India has to grab a part of it. Even if the manufacturing is moving to the US, it will not be 100 per cent. There will be something outside the US, and we will have to see how we attract the players and support growth of that portion so that India takes a pie of that total market actually.

Q Tata Group is setting up a fab unit in Gujarat but they can't find skilled labour. How do we address this issue?

India does not have a manufacturing setup so we don't have the trained manpower available. So multiple things can be done: companies like Tata that have their own collaborator can send part of their labour force to the collaborator for training or the collaborator can send trainers to India to train the workforce. Additional training outputs will also come up. Semi India has already started doing work which is called the workforce development where the online professional development courses are getting deployed. We did two sessions already at IIT Guwahati and IIT Gandhinagar. Companies wanting to set up manufacturing operations in India will have to take steps on both these fronts.

Q But in terms of creating sufficient workforce, do you have any timeline in mind?

My view is next two years are going to be crucial. Several institutes have to modify their course curriculum to include manufacturing-related programmes and some of the institutes need to tie up with global companies for training. Of those, some of the people would be interested in manufacturing jobs. That work has already started and it will move forward in next two-three years. We would see that additional workforce is

Q But in terms of us having a game plan, do you feel our goals will be pushed back by a few years?

No. I don't see our goals being pushed back. Some of the big-time companies like NVIDIA are committing to that side but as a market pie, it is still feasible enough. India should be able to attract part of the business opportunity. It's just that it becomes challenging to attract companies because many American firms are being asked by their government to set up operations locally.

Q Most players coming to India are interested in designing and testing. How do we get more players to go into manufacturing?

That's a valid point. Most of the global companies so far have committed to India mainly on the design side as they see India has got a chip design/software development/technology development talent. That is one of the positive signs which builds India in terms of the talent pool. On the manufacturing side, the biggest issue is India's own demand which will increase substantially to about \$103 billion by 2030. So, there is sizable demand in India itself which is one of the carrots for companies to invest. There are also several companies who have understood the Indian business model, skilling and competence which helps us compared to Malaysia, Vietnam, Philippines. Further, representatives from design centres of global multinationals keep visiting in India, so we have visibility. Most importantly, Indian corporates are showing a lot of interest in getting in manufacturing as they see a sizable opportunity inside and outside India. Indian corporates are sensing the opportunity and that is why you see there is a commitment by Tata, Murugappa Group, HCL Tech and Foxconn tie-up. There are a couple of other smaller projects such as RRP in Mumbai, Suchi Semicon in Surat, Polymatech in Chennai and RIR Ratan Shah in Odisha. These are clear indicators that Indian corporates are also rising up to seize the opportunity unfolding in this sector. Parallely, there is a concept to do a fab-less design ecosystem or a product creation. Through this scheme, the chip

Q Before the Union Budget you said that there needs to be an increase in the PLI scheme for IT hardware. What was your reaction when the Budget came out?

In the Budget so far, they did not announce any second version of the Semicon India programme. Initially, \$10 billion was allocated. Beyond that the next version has not yet come. We have heard Union Minister Ashwini Vaishnaw and also Secretary Krishnan stating in multiple forums that they are working towards the second part of the incentive programme now, which is under consideration. So, that second version of the incentives amount is awaited. Incentives are a must right now considering that we do not have a very well established ecosystem to do the manufacturing activity. Without incentive it would have been impossible for us to get the semiconductor manufacturing moving into the country.

Q US has now again opened up to the idea of China chipsets. So what does that mean for India?

Before tariff, US was still selling to China, which in turn was selling anywhere it wanted. India's Semicon programme was planned with that scenario in mind. If US puts more restrictions on China, that is an advantageous position for countries like India surely but even if it does not happen, we are just back to the situation four-six months ago. We don't know what will finally transpire between China and US. It looks like that there is still a tussle between the two countries. Things will not be worse than four-six months ago considering they recently tightened the rare earth minerals and materials which created problems for many countries.

US tariffs to pose hurdles for electronics, manufacturing

Vallari Sanzgiri
Mumbai

India's electronics and manufacturing sector stakeholders said the US tariff announcement could dent price competitiveness and disrupt supply chain at a time when investment has been strong, driven by strategic alignment between the two economies.

Ashok Chandak, President of India Electronics and Semiconductor Association (IESA) and SEMI India, said, "India does not have any major advantage compared to other Asian countries anymore if 25 per cent tariff, above baseline 10 per cent, is continued." Similarly, Kunal Chaudhary, Tax Partner, EY India, said, "These tariffs could cause temporary uncertainty for cross-border investors and OEMs evaluating India as an export base."

Experts also viewed the development as a chance to

deepen India's competitiveness through accelerated infrastructure execution. The situation underlines the urgency for India's electronics sector to diversify export markets, deepen domestic markets, develop India brands and products and move up the value chain to reduce dependency on price-sensitive, tariff-exposed exports.

LESSER RISK EXPOSURE

It gives India a chance to reduce exposure to risks and emerge as a dependable, cost-effective alternative in the global manufacturing landscape, said Chaudhary. "As India does not make much semiconductors, it won't be affected in the short term. We hope that the ongoing final trade negotiations will create some positive outcome in the next few weeks or months as both countries may want to find a good balance," said Chandak.

Industry speak

India Inc cries foul

Harsha Vardhan Agarwal, president, Ficci: "This move is unfortunate... we hope that this imposition of higher tariffs will be a short-term phenomenon and that a permanent trade deal will be finalised soon."

Nilesh Shah, MD, Kotak Mahindra AMC: "I hope and pray that this unilateral imposition should accelerate Indian policy making to be growth supportive. Our biggest deterrence continues to remain GDP size and competitiveness."

S.C. Rahlan, president, Fieo: "This is a major setback for Indian exporters, especially in textiles, footwear, and furniture, as the 25 per cent tariff will render them uncompetitive in the US market against rivals from Vietnam and China."

Kirit Bhansali, chairman GJEPC, India: "Gem and jewellery stands to be impacted. The US is our single largest market, accounting for \$10 billion in exports."

N. Thirukkumaran, general-secretary of Tiruppur Exporter's Association: "US exports will be affected because Vietnam has lower tariffs."

Ashok Chandak, president, India Electronics & Semiconductor Association: "India's electronics sector needs to diversify export markets."

Concerns Rise as 25% US Duty on iPhones Threatens India's Export Growth and Apple's Strategic Shift

Impact of U.S. Tariffs on Apple's Strategy

The announcement of a 25% tariff on exports from India to the United States is expected to significantly affect Apple's strategy to boost iPhone exports from India. According to Navkendar Singh, an associate vice president for devices research at IDC India, approximately 25% of iPhone shipments, which amounts to about 60 million units annually, are destined for the U.S. To meet this demand, Apple had planned to ramp up local manufacturing in India. However, the newly imposed tariffs may delay these expansion efforts, complicating Apple's goal of making India a key player in its global supply chain.

Apple had aimed to increase its iPhone production in India from 35-40 million units last year to 60 million this year. The company's CEO, Tim Cook, had previously stated that all iPhones sold in the U.S. from April to June would be sourced from India, specifically from Foxconn's factory in Tamil Nadu. However, with the new tariffs in place, industry analysts suggest that Apple may need to reevaluate its supply chain and production strategies to adapt to the increased costs associated with tariffs on India-assembled iPhones.

US tariffs on Indian goods raise concerns among industry leaders

The US just hit Indian goods with a 25% tariff, and that's making things tricky for India's electronics and manufacturing sectors.

With big investments happening thanks to closer US-India ties, industry leaders worry these tariffs could mess with supply chains and make Indian products less competitive.

Ashok Chandak from the India Electronics and Semiconductor Association says if this keeps up, India might lose its edge over other Asian countries.

BUSINESS NEWS

Trump's tariff blow to hit Apple's India manufacturing, electronics exports

US President Donald Trump's announcement of a 25% tariff on all Indian goods starting August 1, along with an unspecified penalty, is expected to significantly impact Apple's plans to expand iPhone manufacturing in India and could also hurt its electronics export to the United States.

The development comes amid ongoing disruptions in electronics production due to China's export restrictions on key components, capital goods and skilled professionals.

Industry experts said while China's curbs are likely to slow production, the US tariffs could directly hit outbound shipments of electronics from India.

"Today's sudden announcement of 25% tariffs on exports from India to the US will certainly hit Apple's plan of making India a large export hub for iPhone exports to US," said Navkendar Singh, Associate Vice-President, Devices Research, IDC India, South Asia & ANZ.

Trump's tariff threat clouds Apple's India push, though electronics exports remain exempt for now

Some of India's top exports to the US, including electronics, pharmaceuticals, and petroleum products, are, for now, exempt from the proposed tariffs.

While the measures could potentially disrupt Apple's rapidly expanding manufacturing and export plans from India, it remains unclear if high-value electronics such as iPhones will be directly impacted, leaving the tech giant and its suppliers in a wait-and-watch mode.

Some of India's top exports to the US – including around \$14 billion worth of electronics products in FY25, \$10.5 billion in pharmaceuticals and \$4.09 billion in petroleum – are, for now, exempt from the tariffs. However, analysts say the scope of the penalties could still widen, and details about implementation remain unknown.

"The new 25% tariff on Indian exports to the US will certainly hit Apple's plans of making India a major iPhone export base for the American market," said Navkendar Singh, associate vice president, Devices Research, IDC India, South Asia & ANZ.

Experts say India unlikely to budge, see Trump's tariff move as negotiation tactic

Reuters • July 31, 2025, 20:15:42 IST

Trade and industry experts say India is unlikely to concede easily after US President Donald Trump announced a 25% tariff on Indian goods. Many see the move as a negotiating tactic, with hopes pinned on a trade deal.

US President Donald Trump announced on Wednesday a 25% tariff on goods imported from India starting August 1 and an unspecified penalty for buying Russian weapons and oil.

"For Apple, near-term challenges include higher costs on India-assembled iPhones exported to the US, potentially dampening demand and prompting recalibration of its supply chain. While some long-term shifts towards US-based production are in motion, India will remain a critical lynchpin in Apple's global strategy," CyberMedia Research, Industry Research Group (IRG), Vice President (VP), Prabhu Ram said.

An emailed query sent to Apple did not elicit any reply.

Ram said China's export restrictions present near-term headwinds to India's electronics manufacturing ambitions, particularly in critical materials and components. India must intensify its efforts to reduce upstream dependencies and accelerate the build-out of a resilient, end-to-end supply chain.

Industry players remain confused if the 25 per cent duty announced by Trump will be imposed in addition to the existing 10 per cent baseline tariff.

The 10 per cent tariff, which currently applies to most Indian goods barring a few, was announced by Trump on all countries on April 2.

Electronics components bodies Elcina, Secretary General, Rajoo Goel, is of the view that the US will impose 15 per cent additional tariff over 10 per cent.

"A 15 per cent increase in import duty will definitely impact our exports of electronics, a major share of which is finished mobiles. But there are several electronic assemblies for telecom, auto, consumer equipment and some components which will be adversely impacted," Elcina Secretary General Rajoo Goel said.

He said China's hostile steps can impact the supply side and increase costs as production will be impacted, at least in the short term till alternatives are developed.

"Increase in tariffs by the US will affect exports, shrinking demand. Both these steps could result in slowing growth," Goel said.

IESA and SEMI India President Ashok Chandak said, "India does not have any major advantage compared to other Asian countries anymore if the 25 per cent tariff above baseline 10 per cent is continued. However, it also underlines the urgency for India's electronics sector to diversify export markets, deepen domestic markets, develop brands and products, and move up the value chain to reduce dependency on price-sensitive, tariff-exposed exports."

As India does not make semiconductors, it won't be affected in the short term, he said, adding that India needs to come out of the shadow of China to be competitive.

obnoxious" trade barriers and purchased "significant" military and energy supplies from Russia despite the Ukraine conflict.

The move comes just weeks before a US trade delegation is scheduled to visit India for the sixth round of talks aimed at finalising a bilateral trade deal. Trump's declaration is now being widely viewed as a pressure tactic.

India has issued a statement saying it is "studying the implications" of Trump's move and remains "committed to concluding a fair, balanced and mutually beneficial bilateral trade agreement." Officials also emphasised that India would take "all steps necessary to secure our national interest," especially for sectors like agriculture, MSMEs, and exports.

We see it more from the lens of geopolitics than purely economics and see both sides striving to get the deal done, even as the power equations may change a bit in US favour."

Meanwhile, Agneshwar Sen, trade policy leader at EY India, noted the continuation of talks despite the tariff announcement. "The decision to raise the US tariff to 25 per cent on Indian exports is an unfortunate development, particularly given the strong strategic partnership that has been steadily built between India and the USA in recent years. However, it's important to note that both countries remain positively engaged in active negotiations with the US team expected in India later in August to finalise a comprehensive trade agreement."

Garima Kapoor of Elara Securities also maintained a cautiously optimistic stance, saying, "Overall, we continue to see a deal by the end of Q3 but a kneejerk reaction in Indian asset classes is likely in the near term."

Ranen Banerjee of PwC India focused on India's relative tariff burden, observing, "Higher tariffs for India compared to countries it competes with, for exports to the US, are going to be challenging. However, the expectation is that the trade deal is likely to be finalised shortly and hence the period of applicability of these higher tariffs could be short."

Ranen Banerjee of PwC India focused on India's relative tariff burden, observing, "Higher tariffs for India compared to countries it competes with, for exports to the US, are going to be challenging. However, the expectation is that the trade deal is likely to be finalised shortly and hence the period of applicability of these higher tariffs could be short."

Sakshi Gupta, principal economist at HDFC Bank, pointed to potential currency market volatility. "For now, the announcement of 25 per cent tariffs is likely to cause volatility in the FX market with mounting depreciation pressure on the rupee. Although the RBI is likely to intervene tomorrow to tamp down the depreciation pressure."

Aditi Nayar, chief economist at ICRA, warned of GDP implications. "When the US had initially imposed tariffs, we had lowered our forecast of India's GDP expansion to 6.2 per cent for FY2026, presuming a tepid rise in exports and a delay in private capex. The tariff (and penalty) now proposed by the US is higher than what we had anticipated, and is therefore likely to pose a headwind to India's GDP growth. The extent of the downside will depend on the size of the penalties imposed."

From a trade industry perspective, Kirit Bhansali of the Gem and Jewellery Export Promotion Council said, "This is a deeply concerning development. The Indian gem and jewellery sector, in particular, stands to be severely impacted. The United States is our single largest market, accounting for over \$10 billion in exports - nearly 30 per cent of our industry's total global trade. A blanket tariff of this magnitude will place immense pressure on every part of the value chain. We recognise the need to address trade imbalances, but such extreme measures undermine decades of economic cooperation. We urge the US administration to reconsider, and call on both governments to engage in constructive dialogue that safeguards bilateral trade and protects the millions of jobs that depend on it on both

N Thirukkumaran of the Tiruppur Exporters' Association saw this as part of a bargaining game. "It is just a negotiation tactic. Trade negotiations are ongoing. The Indian government is tough on certain terms like agriculture and dairy — India isn't opening up. If it goes through, US exports from the association will be affected, because Vietnam has lower tariffs. We will be losing our competitive edge. We are optimistic that an imminent trade agreement will be on the lines of the one with the UK. We have to wait and watch, and not panic. There is no reason to panic."

Nilesh Shah, MD of Kotak Mahindra AMC, emphasised policy response and market hopes. "Despite the unpredictable policy making of the US, the market was expecting a tariff deal to work out as longer-term US-India strategic interests are aligned. Markets will hope for a 'TACO' trade if better senses prevail. China is defying US/UN sanctions on Iran oil, Myanmar and Russia trade and North Korea support. Size and the competitiveness of the economy have their advantages. I hope and pray that this unilateral imposition should accelerate Indian policy-making to be growth-supportive. Our biggest deterrence continues to remain GDP size and competitiveness."

Rahul Mehta of the Clothing Manufacturers Association of India shared concerns about competitiveness. "Having seen the several about turns on the tariff front in the case of other countries, I would not press panic buttons right now. But, if the proposed terms do come into effect, it will make our products 7 per cent to 10 per cent more expensive than some of our competitors, and it will certainly hurt our apparel exports to the US. Fortunately, this set-back has come at the time when we have just signed an FTA with UK, and are proceeding rapidly with an FTA with EU."

SC Raihan of the Federation of Indian Export Organisations added, "This is a major setback for Indian exporters, especially in sectors like textiles, footwear, and furniture, as the 25 per cent tariff will render them uncompetitive in the US market against rivals from Vietnam, China, and elsewhere. However, we remain hopeful that both countries will work towards a bilateral trade agreement."

Colin Shah of Kama Jewellery also underlined the blow to export-heavy sectors. "With US being one of the key export destinations, this will severely impact the sectors like gems and jewellery that are heavily dependent on exports. Going ahead, we expect trade activities to remain muted with US. However, we also need to wait and watch how the situation unfolds."

Ashok Chandak of the India Electronics & Semiconductor Association pointed to a broader shift needed in India's strategy. "The imposition of a 25 per cent tariff by the US on Indian goods will be short-term. Indian electronics exports is a short-term challenge that could disrupt supply chains and dent price competitiveness. India does not have any major advantage compared to other Asian countries anymore if a 25 per cent tariff above the baseline 10 per cent is continued. However, it also underlines the urgency for India's electronics sector to diversify export markets, deepen domestic markets, develop Indian brands and products, and move up the value chain to reduce dependency on price-sensitive, tariff-exposed exports."

Avinash Gorakshakar of Profitmart Securities cautioned against speculation, noting, "Until the final document is released, it's all speculation. India is a large, attractive market that the US cannot afford to ignore, so any move will ultimately be weighed against long-term interests. My sense is that the August 1 deadline may itself be flexible, and India is unlikely to budge easily. In the short term, the announcement could trigger some selling pressure, but in the longer term, I expect the impact to neutralise. India's market attractiveness remains intact."

Harsha Vardhan Agarwal of FICCI struck a hopeful tone, saying, "We hope that this imposition of higher tariffs will be a short-term phenomenon and that a permanent trade deal between the two sides will be finalised soon. The aim is to secure a beneficial pact rather than a hurried deal that gives short-term benefit but may result in adverse outcomes in the long term. It is also important to note that India offers a large market for US businesses and many of the large companies from the US benefit from leveraging the demand as well as the skills and talent pool that we have to offer."

US tariff to hit iPhone production expansion, electronics exports

Trump imposes 25% tariff on Indian goods, sparks mixed reactions across sectors

US President Donald Trump's announcement of 25 per cent tariff on all goods coming from India starting August 1, plus an unspecified penalty, is expected to impact Apple's plans to expand iPhone manufacturing in India as well as export of other electronics to the US.

The move comes at a time when Indian electronics production is reeling under pressure due to restrictions imposed by China on supply of several critical components, capital goods and even skilled technology professionals.

According to industry experts, while Chinese restrictions may slow down production, US tariff will impact exports of electronics from India.

"Today's sudden announcement of 25 per cent tariffs on exports from India to the US will certainly hit Apple's plan of making India as a large export hub for iPhone exports to US," IDC India, South Asia & ANZ, Associate Vice-President for devices research, Navkendar Singh, said.

He said the US makes up around 25 per cent of iPhone shipments for Apple -- around 60 million per annum.

"To meet the iPhone demand in the US from iPhone assembled in India requires significant manufacturing expansion in India, which will be directly impacted by these new tariffs," Singh said.

According to multiple sources, Apple plans to increase iPhone production to 60 million units this year from about 35-40 million units that it produced in 2024-25.

Apple CEO Tim Cook, during the earnings call for the second quarter ended March 29 had announced that all iPhones sold in the US during the April-June period will be shipped from India.

India-made iPhones are assembled in Taiwanese contract manufacturer Foxconn's factory in Tamil Nadu.

"For Apple, near-term challenges include higher costs on India-assembled iPhones exported to the US, potentially dampening demand and prompting recalibration of its supply chain. While some long-term shifts towards US-based production are in motion, India will remain a critical linchpin in Apple's global strategy," CyberMedia Research, Industry Research Group (IRG), Vice President (VP), Prabhu Ram said.

An emailed query sent to Apple did not elicit any reply.

Ram said China's export restrictions present near-term headwinds to India's electronics manufacturing ambitions, particularly in critical materials and components. India must intensify its efforts to reduce upstream dependencies and accelerate the build-out of a resilient, end-to-end supply chain.

Industry players remain confused if the 25 per cent duty announced by Trump will be imposed in addition to the existing 10 per cent baseline tariff.

The 10 per cent tariff, which currently applies to most Indian goods barring a few, was announced by Trump on all countries on April 2.

Electronics components bodies Elcina, Secretary General, Rajoo Goel, is of the view that the US will impose 15 per cent additional tariff over 10 per cent.

"A 15 per cent increase in import duty will definitely impact our exports of electronics, a major share of which is finished mobiles. But there are several electronic assemblies for telecom, auto, consumer equipment and some components which will be adversely impacted," Elcina Secretary General Rajoo Goel said.

He said China's hostile steps can impact the supply side and increase costs as production will be impacted, at least in the short term till alternatives are developed.

"Increase in tariffs by the US will affect exports, shrinking demand. Both these steps could result in slowing growth," Goel said.

IESA and SEMI India President Ashok Chandak said, "India does not have any major advantage compared to other Asian countries anymore if the 25 per cent tariff above baseline 10 per cent is continued. However, it also underlines the urgency for India's electronics sector to diversify export markets, deepen domestic markets, develop brands and products, and move up the value chain to reduce dependency on price-sensitive, tariff-exposed exports."

As India does not make semiconductors, it won't be affected in the short term, he said, adding that India needs to come out of the shadow of China to be competitive.

Rare earth supply risk: Indian electronics firms worried as Chinese curbs may hit; but can Beijing also afford this?

A number of applicants under India's Electronics Component Manufacturing Scheme (ECMS) have flagged concerns over meeting their first-year production targets due to ongoing shortages of rare earth minerals.

According to ET, at least 10 companies have raised the issue with the ministry of electronics and information technology (MeitY), warning that if the shortage continues for another six months, they may not be able to meet the incentive-linked thresholds.

The rare earth scarcity stems from export restrictions imposed by China, which controls more than 90% of global rare earth processing. China introduced special licensing requirements for seven rare earth elements and associated magnets from April 4 this year, leading to supply disruptions across key industries.

These include electronics, automobiles, and clean energy technologies.

"Companies have expressed concern, but within the sector, it isn't an alarming outcry," an official aware of the matter was quoted as saying by ET. "If there is a component that uses rare earth, instead of importing that rare earth and making that component in India, they will simply import that component."

While firms are exploring alternatives, such as sourcing from different suppliers or shifting to rare-earth-free technologies, the timing has been challenging, particularly for those scaling up manufacturing for exports.

"The ECMS has been unveiled at a time when many entities want to scale up and take advantage of exports," said Ashok Chandak, president of the India Electronics and Semiconductor Association (IESA), as quoted by ET. He added that supply shocks in rare earth magnets have hit the sector hard.

The Rs 22,919 crore ECMS, launched in May, seeks to build a robust domestic ecosystem for electronic components like multi-layer PCBs, lithium-ion cells, resistors, capacitors, display and camera modules.

PCBs have attracted particular attention from applicants, according to KS Babu, secretary of the Indian Printed Circuit Association (IPCA), who noted that the scheme addresses both multi-layer and high-density interconnect boards.

However, he also pointed out that local production of key inputs like copper-clad laminates is still missing. "Chinese suppliers are now taking advantage by squeezing prices, citing problems with shipments," Babu said, as per ET.

The scheme, effective from FY26 through FY32, includes a one-year gestation period. However, manufacturers, particularly MSMEs, have sought quicker access to incentives to recover their investments. A Delhi-based PCB maker was cited by ET saying that the government has informally assured leniency during the verification and claims process.

Responding to industry requests, MeitY will extend the ECMS application window beyond July 31, as confirmed by officials. Many small firms are still finalising their sourcing channels, joint ventures, and tech partnerships.

In a written reply to the Rajya Sabha, minister of state for commerce and industry Jitin Prasada noted that the export restrictions on rare earth magnets have led to supply chain bottlenecks for auto and electronics sectors. However, the ministry has not received specific reports of cost escalation or project delays from industry hubs in Maharashtra, as per news agency PTI.

Despite the disruption, industry leaders remain hopeful. "China also can't afford to continue an export ban for long, since their companies will begin bleeding and it will place

Trump's tariff threat clouds Apple's India push, though electronics exports remain exempt for now

Some of India's top exports to the US, including electronics, pharmaceuticals, and petroleum products, are, for now, exempt from the proposed tariffs.

Apple's ambitions to turn India into a major iPhone export hub for the US could be facing a serious challenge, with US President Donald Trump announcing a 25% tariff on Indian exports along with an additional penalty tied to New Delhi's defence and energy ties with Russia.

While the measures could potentially disrupt Apple's rapidly expanding manufacturing and export plans from India, it remains unclear if high-value electronics such as iPhones will be directly impacted, leaving the tech giant and its suppliers in a wait-and-watch mode.

Some of India's top exports to the US – including around \$14 billion worth of electronics products in FY25, \$10.5 billion in pharmaceuticals and \$4.09 billion in petroleum – are, for now, exempt from the tariffs. However, analysts say the scope of the penalties could still widen, and details about implementation remain unknown.

"The new 25% tariff on Indian exports to the US will certainly hit Apple's plans of making India a major iPhone export base for the American market," said Navkendar Singh, associate vice president, Devices Research, IDC India, South Asia & ANZ.

Trump's 40% penalty for tariff dodging still missing key details

Donald Trump's tariff hike on dozens of trade partners to take effect August 7, says White House

Tariff exemptions under Executive Order 14257: What it means for India's pharma, auto sectors

Until now, Apple had been steadily shifting iPhone production to India, especially through its partner Foxconn, as part of a broader China-plus-one strategy. In recent months, nearly half of the iPhones shipped to the US were made in India, where Apple now commands about 55% market share in the premium smartphone segment.

However, analysts say this very success may have triggered the tariff response from Trump.

Notably, U.S. President Donald Trump recently criticised Apple's India strategy. U.S. President Donald Trump said on May 15 in Doha, Qatar, that he spoke to Apple Inc. CEO Tim Cook told him there's no need to build factories in India unless it's to serve that market specifically.

"That rise in exports has triggered concern from Trump, who sees Apple's increasing dependence on India," said Neil Shah, Vice-President at Counterpoint Research. "This move appears to be a tactic to pressure Apple to manufacture more within the US. By taxing imports from India, Trump is sending a message that even Apple's India-made products won't be spared, effectively pushing domestic manufacturing."

Shah added that the move also gives Trump a geopolitical lever to "square off with India and gain leverage over the trade deficit."

Since April, when talk of new tariffs first emerged, India was relatively better placed than other markets. Many global manufacturers, including Apple, saw India as a natural diversification bet. But now, with tariffs on the horizon for both India and China, Apple is faced with a tough choice.

"These are the only two viable production bases. Brazil is the third option, but its current Foxconn capacity is too limited and will take time to scale up," Shah said.

In the near term, Apple may adopt a wait-and-watch approach, continuing shipments while monitoring policy developments. "They can either absorb the costs or pass them on to consumers, or hope the policy changes again, as has happened with Trump in the past," Shah added.

He noted that Apple may not raise prices immediately, especially with the next iPhone launch just weeks away. But a price correction is likely.

"Apple is already dealing with rising component costs, especially with TSMC's new 3nm chip getting more expensive. So they will either need to squeeze costs elsewhere or raise prices, like Samsung did with its foldables," Shah said.

Between component cost increases and now tariffs, Apple may use the fall iPhone launch as an opportunity to adjust prices and offset these additional pressures. "Apple is stuck in a pincer movement, under pressure from both sides, and must decide which option involves the least friction," Shah said.

Ashok Chandak, president of IESA & SEMI India, said, "The imposition of 25% tariff by the U.S. on Indian goods will be a short-term challenge that could disrupt supply chains and dent price competitiveness. India does not have any major advantage compared to other Asian countries anymore if 25% tariff above baseline 10% is continued. However, it also underlines the urgency for India's electronics sector to diversify export markets, deepen domestic markets, develop Indian brands and products, and move up the value chain to reduce dependency on price-sensitive, tariff-exposed exports."

"As India does not make much semiconductors, it won't be affected in short term. We hope that the ongoing final trade negotiations will create some positive outcome in next few weeks or months as both countries will want to find a good balance," Chandak added.

Apple exported over \$5 billion worth of iPhones from India in the April–June quarter (Q1 FY26), accounting for approximately 70% of the country's total smartphone exports, according to preliminary data exclusively reviewed by Moneycontrol. This marks a sharp increase from around \$3 billion during the same period last year.

Driven by Apple's production ramp-up through Foxconn and Tata Electronics, India's overall smartphone exports surpassed \$7 billion in the June quarter, up more than 40% year-on-year from approximately \$5 billion in Q1 FY25. These figures reaffirm India's growing role in global smartphone supply chains, particularly for high-value devices.

Trump imposes 25% tariff: Textiles, jewellery, pharma, electronics face threat; India Inc hoping for relief in trade deal

The 25 percent tariff is higher than the tariffs for countries that have reached some agreement with the US on tariffs and trade barriers such as European Union (15 percent) and UK (10 percent) and some of the south east Asian nations such as Indonesia (19 percent), Philippines (20 percent) and Vietnam (20 percent), which compete with India.

In a significant escalation of trade tensions, US President Donald Trump announced a 25 percent tariff on Indian imports and an additional penalty effective from August 1, 2025. The move, part of a broader shift toward aggressive protectionist trade policies, is set to have wide-reaching ramifications for India's export economy.

A blanket tariff of this magnitude will place immense pressure on every part of the value chain. We recognise the need to address trade imbalances, but such extreme measures undermine decades of economic cooperation. We urge the US administration to reconsider, and call on both governments to engage in constructive dialogue that safeguards bilateral trade and protects the millions of jobs that depend on it on both

N Thirukkumaran of the Tiruppur Exporters' Association saw this as part of a bargaining game. "It is just a negotiation tactic. Trade negotiations are ongoing. The Indian government is tough on certain terms like agriculture and dairy — India isn't opening up. If it goes through, US exports from the association will be affected, because Vietnam has lower tariffs. We will be losing our competitive edge. We are optimistic that an imminent trade agreement will be on the lines of the one with the UK. We have to wait and watch, and not panic. There is no reason to panic."

Nilesh Shah, MD of Kotak Mahindra AMC, emphasised policy response and market hopes. "Despite the unpredictable policy making of the US, the market was expecting a tariff deal to work out as longer-term US-India strategic interests are aligned. Markets will hope for a 'TACO' trade if better senses prevail. China is defying US/UN sanctions on Iran oil, Myanmar and Russia trade and North Korea support. Size and the competitiveness of the economy have their advantages. I hope and pray that this unilateral imposition should accelerate Indian policy-making to be growth-supportive. Our biggest deterrence continues to remain GDP size and competitiveness."

Rahul Mehta of the Clothing Manufacturers Association of India shared concerns about competitiveness. "Having seen the several about turns on the tariff front in the case of other countries, I would not press panic buttons right now. But, if the proposed terms do come into effect, it will make our products 7 per cent to 10 per cent more expensive than some of our competitors, and it will certainly hurt our apparel exports to the US. Fortunately, this set-back has come at the time when we have just signed an FTA with UK, and are proceeding rapidly with an FTA with EU."

SC Ralhan of the Federation of Indian Export Organisations added, "This is a major setback for Indian exporters, especially in sectors like textiles, footwear, and furniture, as the 25 per cent tariff will render them uncompetitive in the US market against rivals from Vietnam, China, and elsewhere. However, we remain hopeful that both countries will work towards a bilateral trade agreement."

Colin Shah of Kama Jewellery also underlined the blow to export-heavy sectors. "With US being one of the key export destinations, this will severely impact the sectors like gems and jewellery that are heavily dependent on exports. Going ahead, we expect trade activities to remain muted with US. However, we also need to wait and watch how the situation unfolds."

Ashok Chandak of the India Electronics & Semiconductor Association pointed to a broader shift needed in India's strategy. "The imposition of a 25 per cent tariff by the US on Indian goods will be short-term. Indian electronics exports is a short-term challenge that could disrupt supply chains and dent price competitiveness. India does not have any major advantage compared to other Asian countries anymore if a 25 per cent tariff above the baseline 10 per cent is continued. However, it also underlines the urgency for India's electronics sector to diversify export markets, deepen domestic markets, develop Indian brands and products, and move up the value chain to reduce dependency on price-sensitive, tariff-exposed exports."

Avinash Gorakshakar of Profitmart Securities cautioned against speculation, noting, "Until the final document is released, it's all speculation. India is a large, attractive market that the US cannot afford to ignore, so any move will ultimately be weighed against long-term interests. My sense is that the August 1 deadline may itself be flexible, and India is unlikely to budge easily. In the short term, the announcement could trigger some selling pressure, but in the longer term, I expect the impact to neutralise. India's market attractiveness remains intact."

Harsha Vardhan Agarwal of FICCI struck a hopeful tone, saying, "We hope that this imposition of higher tariffs will be a short-term phenomenon and that a permanent trade deal between the two sides will be finalised soon. The aim is to secure a beneficial pact rather than a hurried deal that gives short-term benefit but may result in adverse outcomes in the long term. It is also important to note that India offers a large market for US businesses and many of the large companies from the US benefit from leveraging the demand as well as the skills and talent pool that we have to offer."

Instant View: India reacts to Trump's 25% tariff on exports to US

(Reuters) - U.S. President Donald Trump announced on Wednesday a 25% tariff on goods imported from India starting August 1 and an unspecified penalty for buying Russian weapons and oil.

Trump's decision dashes hopes of a limited trade agreement between the two countries, which had been under negotiation for several months.

MADHAVI ARORA, ECONOMIST, EMKAY GLOBAL

"While the negotiations seem to have broken down, we don't think the trade deal haggling between the two nations is over yet. We see it more from the lens of geopolitics than purely economics and see both sides striving to get the deal done, even as the power equations may change a bit in U.S. favour."

RANEN BANERJEE, PARTNER OF ECONOMIC ADVISORY, PWC INDIA

"Higher tariffs for India compared to countries it competes with, for exports to the U.S., are going to be challenging.

However, the expectation is that the trade deal is likely to be finalised shortly and hence the period of applicability of these higher tariffs could be short."

NILESH SHAH, MD KOTAK MAHINDRA AMC

"Despite the unpredictable policy making of the U.S., the market was expecting a tariff deal to work out as longer-term U.S.-India strategic interests are aligned.

Markets will hope for a 'TACO' trade if better senses prevail.

KIRIT BHANSALI, CHAIRMAN, GEM AND JEWELLERY EXPORT PROMOTION COUNCIL INDIA

"This is a deeply concerning development. The Indian gem and jewellery sector, in particular, stands to be severely impacted.

The United States is our single largest market, accounting for over \$10 billion in exports - nearly 30% of our industry's total global trade. A blanket tariff of this magnitude will place immense pressure on every part of the value chain.

We recognise the need to address trade imbalances, but such extreme measures undermine decades of economic cooperation. We urge the U.S. administration to reconsider, and call on both governments to engage in constructive dialogue that safeguards bilateral trade and protects the millions of jobs that depend on it on both sides."

N. THIRUKKUMARAN, GENERAL SECRETARY OF TIRUPPUR EXPORTERS' ASSOCIATION

"It is just a negotiation tactic. Trade negotiations are ongoing. The Indian government is tough on certain terms like agriculture and dairy - India isn't opening up [Indian cuisine](#).

If it goes through, U.S. exports from the association will be affected, because Vietnam has lower tariffs. We will be losing our competitive edge.

We are optimistic that an imminent trade agreement will be on the lines of the one with the UK. We have to wait and watch, and not panic. There is no reason to panic."

GARIMA KAPOOR, ECONOMIST, INSTITUTIONAL EQUITIES, ELARA SECURITIES, MUMBAI

"Overall, we continue to see a deal by end Q3 but, a kneejerk reaction in Indian asset classes is likely in the near term."

S.C. RALHAN, PRESIDENT OF THE FEDERATION OF INDIAN EXPORT ORGANISATIONS

"This is a major setback for Indian exporters, especially in sectors like textiles, footwear, and furniture, as the 25% tariff will render them uncompetitive in the US market against rivals from Vietnam, China, and elsewhere.

However, we remain hopeful that both countries will work towards a bilateral trade agreement."

AVINASH GORAKSHAKAR, DIRECTOR OF RESEARCH AT PROFITMART SECURITIES

"Until the final document is released, it's all speculation. India is a large, attractive market that the U.S. cannot afford to ignore, so any move will ultimately be weighed against long-term interests. My sense is that the August 1 deadline may itself be flexible and India is unlikely to budge easily.

In the short term, the announcement could trigger some selling pressure, but in the longer term, I expect the impact to neutralize. India's market attractiveness remains intact."

COLIN SHAH, MD, KAMA JEWELRY

"With U.S. being one of the key export destinations, this will severely impact the sectors like gems and jewellery that are heavily dependent on exports.

Going ahead, we expect trade activities to remain muted with U.S. However, we also need to wait and watch how the situation unfolds."

RAHUL MEHTA, CHIEF MENTOR, CLOTHING MANUFACTURERS ASSOCIATION OF INDIA

"Having seen the several about turns on the tariff front in the case of other countries, I would not press panic buttons right now. But, if the proposed terms do come into effect, it will make our products 7% to 10% more expensive than some of our competitors, and it will certainly hurt our apparel exports to the U.S.

Fortunately, this set-back has come at the time when we have just signed an FTA with UK, and are proceeding rapidly with an FTA with EU" 

SAKSHI GUPTA, PRINCIPAL ECONOMIST, HDFC BANK, GURUGRAM

"For now, the announcement of 25% tariffs is likely to cause volatility in the FX market with mounting depreciation pressure on the rupee. Although the RBI is likely to intervene tomorrow to tamp down the depreciation pressure."

ADITI NAYAR, CHIEF ECONOMIST, ICRA

"When the U.S. had initially imposed tariffs, we had lowered our forecast of India's GDP expansion to 6.2% for FY2026, presuming a tepid rise in exports and a delay in private capex. The tariff (and penalty) now proposed by the U.S. is higher than what we had anticipated, and is therefore likely to pose a headwind to India's GDP growth. The extent of the downside will depend on the size of the penalties imposed."

ASHOK CHANDAK, PRESIDENT, INDIA ELECTRONICS & SEMICONDUCTOR ASSOCIATION

"The imposition of a 25% tariff by the U.S. on Indian goods will be short term. Indian electronics exports is a short-term challenge that could disrupt supply chains and dent price competitiveness.

India does not have any major advantage compared to other Asian countries anymore if 25% tariff above baseline 10% is continued. However, it also underlines the urgency for India's electronics sector to diversify export markets, deepen domestic markets, develop Indian brands and products, and move up the value chain to reduce dependency on price-sensitive, tariff-exposed exports."

RISHI SHAH, PARTNER AND ECONOMIC ADVISORY SERVICES LEADER, GRANT THORNTON BHARAT

"Given the escalating rhetoric around Russia-Ukraine negotiations, some form of adverse development was anticipated... the specifics of the additional 'penalty' beyond the 25% tariff may determine the actual economic impact."

HARSHA VARDHAN AGARWAL, PRESIDENT, FEDERATION OF INDIAN CHAMBERS OF COMMERCE AND INDUSTRY

"We hope that this imposition of higher tariffs will be a short-term phenomenon and that a permanent trade deal between the two sides will be finalised soon.

The aim is to secure a beneficial pact rather than a hurried deal that gives short term benefit but may result in adverse outcomes in the long term.

It is also important to note that India offers a large market for U.S. businesses and many of the large companies from the U.S. benefit from leveraging the demand as well as the skills and talent pool that we have to offer"

India reacts to Trump's 25% tariff on exports to US

(Reuters) -U.S. President Donald Trump announced on Wednesday a 25% tariff on goods imported from India starting August 1 and an unspecified penalty for buying Russian weapons and oil.

Trump's decision dashes hopes of a limited trade agreement between the two countries, which had been under negotiation for several months.

Here are some reactions:

MADHAVI ARORA, ECONOMIST, EMKAY GLOBAL

"While the negotiations seem to have broken down, we don't think the trade deal haggling between the two nations is over yet. We see it more from the lens of geopolitics than purely economics and see both sides striving to get the deal done, even as the power equations may change a bit in U.S. favour."

RANEN BANERJEE, PARTNER OF ECONOMIC ADVISORY, PWC INDIA

"Higher tariffs for India compared to countries it competes with, for exports to the U.S., are going to be challenging.

However, the expectation is that the trade deal is likely to be finalised shortly and hence the period of applicability of these higher tariffs could be short."

NILESH SHAH, MD KOTAK MAHINDRA AMC

"Despite the unpredictable policy making of the U.S., the market was expecting a tariff deal to work out as longer-term U.S.-India strategic interests are aligned.

Markets will hope for a 'TACO' trade if better senses prevail.

China is defying U.S./UN sanctions on Iran oil, Myanmar and Russia trade and North Korea support. Size and the competitiveness of the economy has its advantages.

I hope and pray that this unilateral imposition should accelerate Indian policy making to be growth supportive. Our biggest deterrence continues to remain GDP size and competitiveness."

AGNESHWAR SEN, TRADE POLICY LEADER, EY INDIA

"The decision to raise the U.S. tariff to 25% on Indian exports is an unfortunate development, particularly given the strong strategic partnership that has been steadily built between India and the USA in recent years.

However, it's important to note that both countries remain positively engaged in active negotiations with the U.S. team expected in India later in August to finalize a comprehensive trade agreement."

KIRIT BHANSALI, CHAIRMAN, GEM AND JEWELLERY EXPORT PROMOTION COUNCIL INDIA

"This is a deeply concerning development. The Indian gem and jewellery sector, in particular, stands to be severely impacted.

The United States is our single largest market, accounting for over \$10 billion in exports - nearly 30% of our industry's total global trade. A blanket tariff of this magnitude will place immense pressure on every part of the value chain.

US tariff to hit iPhone production expansion electronics exports

New Delhi, Jul 30 (PTI) US President Donald Trump's announcement of 25 per cent tariff on all goods coming from India starting August 1, plus an unspecified penalty, is expected to impact Apple's plans to expand iPhone manufacturing in India as well as export of other electronics to the US.

The move comes at a time when Indian electronics production is reeling under pressure due to restrictions imposed by China on supply of several critical components, capital goods and even skilled technology professionals.

According to industry experts, while Chinese restrictions may slow down production, US tariff will impact exports of electronics from India.

"Today's sudden announcement of 25 per cent tariffs on exports from India to the US will certainly hit Apple's plan of making India as a large export hub for iPhone exports to US," IDC India, South Asia & ANZ, Associate Vice-President for devices research, Navkendar Singh, said.

He said the US makes up around 25 per cent of iPhone shipments for Apple -- around 60 million per annum.

"To meet the iPhone demand in the US from iPhone assembled in India requires significant manufacturing expansion in India, which will be directly impacted by these new tariffs," Singh said.

According to multiple sources, Apple plans to increase iPhone production to 60 million units this year from about 35-40 million units that it produced in 2024-25.

Apple CEO Tim Cook, during the earnings call for the second quarter ended March 29 had announced that all iPhones sold in the US during the April-June period will be shipped from India.

India-made iPhones are assembled in Taiwanese contract manufacturer Foxconn's factory in Tamil Nadu.

"For Apple, near-term challenges include higher costs on India-assembled iPhones exported to the US, potentially dampening demand and prompting recalibration of its supply chain.

While some long-term shifts towards US-based production are in motion, India will remain a critical linchpin in Apple's global strategy," CyberMedia Research, Industry Research Group (IRG), Vice President (VP), Prabhu Ram said.

An emailed query sent to Apple did not elicit any reply.

Ram said China's export restrictions present near-term headwinds to India's electronics manufacturing ambitions, particularly in critical materials and components. India must intensify its efforts to reduce upstream dependencies and accelerate the build-out of a resilient, end-to-end supply chain.

Industry players remain confused if the 25 per cent duty announced by Trump will be imposed in addition to the existing 10 per cent baseline tariff.

The 10 per cent tariff, which currently applies to most Indian goods barring a few, was announced by Trump on all countries on April 2.

Electronics components bodies Elcina, Secretary General, Rajoo Goel, is of the view that the US will impose 15 per cent additional tariff over 10 per cent.

"A 15 per cent increase in import duty will definitely impact our exports of electronics, a major share of which is finished mobiles. But there are several electronic assemblies for telecom, auto, consumer equipment and some components which will be adversely impacted," Elcina Secretary General Rajoo Goel said.

He said China's hostile steps can impact the supply side and increase costs as production will be impacted, at least in the short term till alternatives are developed.

"Increase in tariffs by the US will affect exports, shrinking demand. Both these steps could result in slowing growth," Goel said.

IESA and SEMI India President Ashok Chandak said, "India does not have any major advantage compared to other Asian countries anymore if the 25 per cent tariff above baseline 10 per cent is continued. However, it also underlines the urgency for India's electronics sector to diversify export markets, deepen domestic markets, develop brands and products, and move up the value chain to reduce dependency on price-sensitive, tariff-exposed exports."

As India does not make semiconductors, it won't be affected in the short term, he said, adding that India needs to come out of the shadow of China to be competitive.

Trump imposes 25% tariff: Textiles, jewellery, pharma, electronics face threat; India Inc hoping for relief in trade deal

The 25 percent tariff is higher than the tariffs for countries that have reached some agreement with the US on tariffs and trade barriers such as European Union (15 percent) and UK (10 percent) and some of the south east Asian nations such as Indonesia (19 percent), Philippines (20 percent) and Vietnam (20 percent), which compete with India.

US President President Donald Trump (File image)

In a significant escalation of trade tensions, US President Donald Trump announced a 25 percent tariff on Indian imports and an additional penalty effective from August 1, 2025. The move, part of a broader shift toward aggressive protectionist trade policies, is set to have wide-reaching ramifications for India's export economy.

The 25 percent tariff is higher than the tariffs for countries that have reached some agreement with the US on tariffs and trade barriers such as European Union (15 percent) and UK (10 percent) and some of the south east Asian nations such as Indonesia (19 percent), Philippines (20 percent) and Vietnam (20 percent), which compete with India.

The Indian tariff rate is less than the current 30 percent rate for China. The US and China continue to be engaged in negotiations over tariffs. Malaysia currently has a similar 25 percent tariff rate.

Sectors to be hit: Electronics, Pharma, Textiles, Jewellery

Indian industries facing the sharpest impact are those heavily reliant on the US market and vulnerable to short-term shifts in pricing competitiveness. These include electronics, automobile and auto components, pharma, textiles and gems and jewellery industries.

Pharma stocks slump as Trump shoots letters to 17 global drug majors seeking lower prices

Infant industry paradox: Trump's tariffs raise questions about US protectionism

The United States accounts for nearly 28% of India's total exports in textiles and apparels segment. With cheaper competitors like Bangladesh and Vietnam vying for the same markets, India's increased tariffs could lead to substantial displacement in key product categories such as garments, linens, and towels

"There is no chance to absorb the duty because of the margins in these businesses... none of the brands give you that kind of a margin. So, what will eventually happen is that the consumer in the US will end up paying. There is also a little bit of a discussion. EU also negotiated their tariffs down to 15 per cent. We all know that the rates and the policies keep changing by the hour as it moves. We are not 100% certain that this is final, or if it continues to be

just a negotiating tactic. I think if these duties come, eventually the consumers in the US will have to pay for it," said Raymond CFO Amit Agarwal told Moneycontrol

"The Indian gem and jewellery sector, in particular, stands to be severely impacted. The United States is our single largest market, accounting for over \$10 billion in exports—nearly 30% of our industry's total global trade. A blanket tariff of this magnitude will inflate costs, delay shipments, distort pricing, and place immense pressure on every part of the value chain—from small karigars to large manufacturers," said Kirit Bhansali, Chairman, Gem and Jewellery Export Promotion Council.

"We urge the U.S. administration to reconsider, and call on both governments to engage in constructive dialogue that safeguards bilateral trade and protects the millions of jobs that depend on it on both sides," the industry body's Chairman added.

The US is the biggest export market for Indian pharma exports. Experts said that while the current 25 percent tariff won't impact the pharma sector, the commentary coming from the Trump administration highlights significant risks for the sector in the coming days.

"Pharmaceuticals are currently not part of the 25% tariffs announced by the US, which is a big relief for India's pharma exporters. However, the strong language used by President Trump and ongoing investigations into drug imports mean that the risk is not over yet. Indian pharma companies should stay prepared for possible changes, especially if sector-specific duties are introduced later," said Manoj Mishra, Partner and Tax Controversy Management Leader, Grant Thornton Bharat.

India's biggest export to the US is electrical machinery including smartphones, which recorded exports worth \$12 billion in 2024, according to a recent report by Barclays. The tariff announcement is expected to cause disruptions for this sector too.

Ashok Chandak, President of IESA & SEMI India, said that the imposition of a 25% tariff by the U.S. is a short-term challenge for the Indian electronics industry that could disrupt supply chains and dent price competitiveness.

"India does not have any major advantage compared to other Asian countries anymore if 25% tariff above baseline 10% is continued. However, it also underlines the urgency for India's electronics sector to diversify export markets, deepen domestic markets, develop India brands and products, and move up the value chain to reduce dependency on price-sensitive, tariff-exposed exports. As India does not make much semiconductors, it won't be affected in short term. We hope that the ongoing final trade negotiations will create some positive outcome in next few weeks or months as both countries may want to find good balance," he said.

Impact on GDP

Experts caution that while the 25 percent tariff is a negative development for India, the focus now is on closing the trade deal with the US, which, if delayed further, could have an impact on FY26 GDP numbers.

"If no deal is signed by September-October, we see a downside to full year GDP growth estimate for India by 20 basis points," said Garima Kapoor, Economist and Executive Vice President, Elara Capital

Kapoor added that the 25% tariff rate is certainly a negative development as it compares to lower rates for peers such as Vietnam, Indonesia and Philippines which compete with India in a similar category of labour-intensive products and electronic goods.

"The exact details of the tariffs on the exempted items such as pharma and the ones that were charged at a differential rate such as iron, steel and auto is unknown as of now, but inclusion of pharma into tariffs should be incremental negative for India's exports as US accounts for more than 30% of India's pharma exports," said Kapoor.

Aditi Nayar, Chief Economist at ICRA added that downside impact on Indian GDP will depend on the proposed penalties.

"When the US had initially imposed tariffs, we had lowered our forecast of India's GDP expansion to 6.2% for FY2026, presuming a tepid rise in exports and a delay in private capex. The tariff (and penalty) now proposed by the US is higher than what we had anticipated, and is therefore likely to pose a headwind to India's GDP growth. The extent of the downside will depend on the size of the penalties imposed," said Nayar.

Focus now on trade deal

To be sure, experts added that while the 25 percent tariff is a negative development, a rushed deal with the US to avoid tariffs could have resulted in a more long lasting impact for the Indian economy.

"On the positive side, it is pertinent to note that any hotchpotch deal which would have compelled India to give concessions to its agriculture and dairy sector may have had much deeper ramifications politically, socially, and eventually on livelihoods. A well negotiated deal that addresses all aspects of trade, investment and tariff and non-tariff barriers by September or October 2025 is likely to yield long term benefits than a hurried deal," said Elara Capital's Kapoor.

Grant Thornton Bharat's Mishra added that these tariffs are likely to be in place only for a short period, as both countries are expected to fast-track discussions for a Bilateral Trade Agreement. "A balanced and stable trade deal will be key to protecting long-term interests of the sector," he said.

US tariffs to pose short-term hurdles for India's electronics and manufacturing sector

Despite the concerns, experts also viewed the development as a chance to deepen India's competitiveness through accelerated infrastructure execution

India's electronics and manufacturing sector will face short-term challenges due to the 25 per cent tariff imposed by the US on Indian goods. Industry stakeholders said the announcement could dent price competitiveness and disrupt supply chain at a time when investment has been strong, driven by strategic alignment between the two economies.

Ashok Chandak, President of India Electronics and Semiconductor Association (IESA) and SEMI India, said, "India does not have any major advantage compared to other Asian countries anymore if 25% tariff, above baseline 10%, is continued."

Similarly, Kunal Chaudhary, Tax Partner, EY India, said, "These tariffs could cause temporary uncertainty for cross-border investors and OEMs evaluating India as an export base."

Despite the concerns, experts also viewed the development as a chance to deepen India's competitiveness through accelerated infrastructure execution. The situation underlines the urgency for India's electronics sector to diversify export markets, deepen domestic markets, develop india brands and products, and move up the value chain to reduce dependency on price-sensitive, tariff-exposed exports.

It also gives India a chance to reduce exposure to risks and emerge as a dependable, cost-effective alternative in the global manufacturing landscape, said Chaudhary. "As India does not make much semiconductors, it won't be affected in the short term. We hope that the ongoing final trade negotiations will create some positive outcome in the next few weeks or months as both countries may want to find a good balance," said Chandak.

Trump announces 25% tariffs plus penalty for trading with Russia on India

Until now, the electronics sector has played a prominent role in India's manufacturing sector with firms like PwC estimating a growth of \$160 billion in the sector by 2030 just by mobiles and wearables. In Q2 of this year, India even beat China as the top source of smartphone shipments into the US, reported Canalys of Omdia firm. With the tariff announcement, such metrics are likely to take a hit particularly the prospect of greater iPhone assemblage and exports from India.

Here are some reactions:

MADHAVI ARORA, ECONOMIST, EMKAY GLOBAL

"While the negotiations seem to have broken down, we don't think the trade deal haggling between the two nations is over yet. We see it more from the lens of geopolitics than purely economics and see both sides striving to get the deal done, even as the power equations may change a bit in U.S. favour."

RANEN BANERJEE, PARTNER OF ECONOMIC ADVISORY, PWC INDIA

"Higher tariffs for India compared to countries it competes with, for exports to the U.S., are going to be challenging.

However, the expectation is that the trade deal is likely to be finalised shortly and hence the period of applicability of these higher tariffs could be short."

NILESH SHAH, MD KOTAK MAHINDRA AMC

"Despite the unpredictable policy making of the U.S., the market was expecting a tariff deal to work out as longer-term U.S.-India strategic interests are aligned.

Markets will hope for a 'TACO' trade if better senses prevail.

China is defying U.S./UN sanctions on Iran oil, Myanmar and Russia trade and North Korea support. Size and the competitiveness of the economy has its advantages.

I hope and pray that this unilateral imposition should accelerate Indian policy making to be growth supportive. Our biggest deterrence continues to remain GDP size and competitiveness."

AGNESHWAR SEN, TRADE POLICY LEADER, EY INDIA

"The decision to raise the U.S. tariff to 25% on Indian exports is an unfortunate development, particularly given the strong strategic partnership that has been steadily built between India and the USA in recent years.

However, it's important to note that both countries remain positively engaged in active negotiations with the U.S. team expected in India later in August to finalize a comprehensive trade agreement."

KIRIT BHANSALI, CHAIRMAN, GEM AND JEWELLERY EXPORT PROMOTION COUNCIL INDIA

"This is a deeply concerning development. The Indian gem and jewellery sector, in particular, stands to be severely impacted.

The United States is our single largest market, accounting for over \$10 billion in exports - nearly 30% of our industry's total global trade. A blanket tariff of this magnitude will place immense pressure on every part of the value chain.

GARIMA KAPOOR, ECONOMIST, INSTITUTIONAL EQUITIES, ELARA SECURITIES, MUMBAI

"Overall, we continue to see a deal by end Q3 but, a kneejerk reaction in Indian asset classes is likely in the near term."

S.C. RALHAN, PRESIDENT OF THE FEDERATION OF INDIAN EXPORT ORGANISATIONS

"This is a major setback for Indian exporters, especially in sectors like textiles, footwear, and furniture, as the 25% tariff will render them uncompetitive in the US market against rivals from Vietnam, China, and elsewhere.

However, we remain hopeful that both countries will work towards a bilateral trade agreement."

AVINASH GORAKSHAKAR, DIRECTOR OF RESEARCH AT PROFITMART SECURITIES

"Until the final document is released, it's all speculation. India is a large, attractive market that the U.S. cannot afford to ignore, so any move will ultimately be weighed against long-term interests. My sense is that the August 1 deadline may itself be flexible and India is unlikely to budge easily.

In the short term, the announcement could trigger some selling pressure, but in the longer term, I expect the impact to neutralize. India's market attractiveness remains intact."

COLIN SHAH, MD, KAMA JEWELRY

"With U.S. being one of the key export destinations, this will severely impact the sectors like gems and jewellery that are heavily dependent on exports.

We recognise the need to address trade imbalances, but such extreme measures undermine decades of economic cooperation. We urge the U.S. administration to reconsider, and call on both governments to engage in constructive dialogue that safeguards bilateral trade and protects the millions of jobs that depend on it on both sides."

N. THIRUKKUMARAN, GENERAL SECRETARY OF TIRUPPUR EXPORTERS' ASSOCIATION

"It is just a negotiation tactic. Trade negotiations are ongoing. The Indian government is tough on certain terms like agriculture and dairy — India isn't opening up.

If it goes through, U.S. exports from the association will be affected, because Vietnam has lower tariffs. We will be losing our competitive edge.

We are optimistic that an imminent trade agreement will be on the lines of the one with the UK. We have to wait and watch, and not panic. There is no reason to panic."

ASHOK CHANDAK, PRESIDENT, INDIA ELECTRONICS & SEMICONDUCTOR ASSOCIATION

"The imposition of a 25% tariff by the U.S. on Indian goods will be short term. Indian electronics exports is a short-term challenge that could disrupt supply chains and dent price competitiveness.

India does not have any major advantage compared to other Asian countries anymore if 25% tariff above baseline 10% is continued. However, it also underlines the urgency for India's electronics sector to diversify export markets, deepen domestic markets, develop Indian brands and products, and move up the value chain to reduce dependency on price-sensitive, tariff-exposed exports."

RISHI SHAH, PARTNER AND ECONOMIC ADVISORY SERVICES LEADER, GRANT THORNTON BHARAT

"Given the escalating rhetoric around Russia-Ukraine negotiations, some form of adverse development was anticipated... the specifics of the additional 'penalty' beyond the 25% tariff may determine the actual economic impact."

HARSHA VARDHAN AGARWAL, PRESIDENT, FEDERATION OF INDIAN CHAMBERS OF COMMERCE AND INDUSTRY

"We hope that this imposition of higher tariffs will be a short-term phenomenon and that a permanent trade deal between the two sides will be finalised soon.

The aim is to secure a beneficial pact rather than a hurried deal that gives short term benefit but may result in adverse outcomes in the long term.

It is also important to note that India offers a large market for U.S. businesses and many of the large companies from the U.S. benefit from leveraging the demand as well as the skills and talent pool that we have to offer."

iPhone blowback: 25% US duty triggers alarm; India's export growth and Apple's shift at risk

TOI Business Desk / TIMESOFINDIA.COM / Jul 30, 2025, 23:38 IST

Apple's plan to make India a major iPhone export hub faces challenges as the US imposes a 25% tariff on Indian goods, potentially delaying expansion plans. Coupled with China's restrictions on electronic components, this could slow down electronics manufacturing and hurt India's export goals. Experts caution increased ... [Read More](#)

AI image

Apple's ambitions to make India a major export hub for iPhones may face a serious blow following US President Donald Trump's decision to impose a 25% tariff on all Indian goods starting August 1, along with an unspecified penalty.

The move, announced on Wednesday, amid growing restrictions from China on the supply of crucial electronic components, is expected to hit both production and export plans from India, especially in the electronics sector.

As per news agency PTI, experts say this dual challenge, China's clampdown on parts and the US's new tariff regime, could slow down electronics manufacturing and hurt India's goal of becoming a global export centre.

"Today's sudden announcement of 25 per cent tariffs on exports from India to the US will certainly hit Apple's plan of making India a large export hub for iPhone exports to the US," said Navkendar Singh, associate VP for devices research at IDC India, South Asia & ANZ, as quoted by PTI.

Singh explained that around 25% of iPhone shipments, about 60 million annually, go to the US.

To meet this demand from India, Apple would have needed significant expansion in local manufacturing, which could now be delayed due to the tariffs.

According to sources cited by PTI, Apple had planned to increase iPhone output in India from 35-40 million units last year to 60 million this year. Apple CEO Tim Cook had even announced that all iPhone sold in the US during April to June would be shipped from India. These units are assembled at Foxconn's factory in Tamil Nadu.

However, CyberMedia Research VP Prabhu Ram noted that near-term challenges like increased costs of India-assembled iPhones could affect demand and push Apple to rework its supply chain. "India will remain a critical lynchpin in Apple's global strategy," he added, but cautioned that the country must reduce its upstream dependencies to ensure supply chain resilience.

Industry groups remain unclear whether Trump's new 25% duty will be on top of the existing 10% baseline tariff. Trump had earlier imposed the 10% tariff on most Indian goods in April.

Elcina secretary general Rajoo Goel believes a 15% increase over the existing duty is likely. "A 15 per cent increase in import duty will definitely impact our electronics exports, especially mobiles, telecom, auto and consumer equipment," he said.

Goel also warned that China's actions on critical inputs will raise production costs and shrink export demand, slowing down growth.

Ashok Chandak, president of IESA and SEMI India, warned that India could lose competitiveness to other Asian nations if the 25% tariff is enforced. He stressed the need to diversify exports, build domestic markets, and move up the value chain.

"India doesn't make semiconductors, so the short-term impact is minimal. But we need to move out of China's shadow to be truly competitive," Chandak said.

The Indian government, in a statement, said it is studying the implications of Trump's move and remains hopeful of finalising a fair and balanced bilateral trade deal. It assured that all necessary steps would be taken to protect India's national interests.

Talks for the India-US bilateral trade agreement have been ongoing since March, with both sides aiming to double trade to \$500 billion by 2030.

Five rounds of discussions have been completed, and a sixth is scheduled for August 25. A partial agreement may be reached by September or October.

Tata Electronics is key growth driver for parent with revenue at ₹66,601 cr in FY25

Vallari Sanzgiri
Mumbai

Tata Electronics Pvt Ltd's revenue hit ₹66,601 crore as per Tata Sons' FY25 annual report, a multifold increase year-on-year (y-o-y) in FY25. This makes Tata Electronics a major contributor in the parent company's financials, while it also highlights the company's growing significance in India's semiconductor manufacturing sector.

"We want to pursue manufacturing excellence at scale. At Tata Electronics, we are building a vertically integrated ecosystem for technology hardware and semiconductor manufacturing. Tata Electronics already employs over 65,000 people (of which approximately 70 per cent are women) and has an annual revenue of ₹66,000 crore. In the capital-intensive world of technology hardware, I am told this is a good start," said N Chandrasekaran, Chairman of Tata Sons, in the annual report.

Kaynes Technology, Tata Electronics' competitor in the electronics manufacturing sector, posted revenue of ₹2,721.8 crore in FY25, a 46 per cent increase y-o-y with the industrial vertical contributing more to the company's growth than manufacturing or electronics.

Tata Sons infused around ₹3,000 crore in Tata Electronics last fiscal year.

ACQUISITION-SPREE

Within just five years, Tata Electronics managed to significantly boost its revenue owing to two major acquisitions: Wistron Infocomm Manufacturing (India) Private Ltd on March 18, 2024, and Pegatron Technology India Pvt Ltd on January 24, 2025.

Tata Electronics paid ₹1,077.76 crore for Wistron, a company engaged in the fi-

GAINING MOMENTUM. Within just five years, Tata Electronics managed to significantly boost its revenue owing to two major acquisitions — Wistron Infocomm Manufacturing (India) and Pegatron Technology TEUBIS

nal assembly test and packaging of handsets.

The acquired business contributed ₹2,581.26 crore of revenue from operations and ₹245.81 crore of profit to the Group for the year ended March 31, 2024.

It also acquired Pegatron Technology India Pvt Ltd from Pegatron corporation, Taiwan for ₹1,650 crore. Like Wistron, the company is engaged in the final assembly test and packaging of handsets. Subsequent to the acquisition, the acquired company was renamed to Tata Electronics Products and Solutions Private Limited.

The acquired business contributed ₹10,870.89 crore of revenue from operations and ₹476.33 crore profit to the Group for the year ended March 31, 2025.

Another acquisition worth noting was that of Tata Semiconductor Assembly and Test Private Ltd (formerly known as TRIL Bengaluru Real Estate Three Private Ltd). The Group purchased the entity from Tata Realty and Infrastructure Ltd. Subsequent to the acquisition, the company was renamed Tata Semiconductor Assembly and Test Private Ltd with effect from July 24, 2023.

According to India Ratings and Research, Tata Electronics, Tata Sons' vehicle to diversify into the electronics

manufacturing, assembly and testing business, offers a significantly large business opportunity, backed by regulatory tailwinds.

The ratings agency also noted the favourable environment for the company, as the Indian government in March 2020 rolled out three key policy initiatives: the Production-linked Incentive scheme, capital subsidy for electronic components, and electronic manufacturing clusters for wide-scale electronics manufacturing in India. Tata Electronics qualified for the SPECS subsidy for its mobile enclosures manufacturing facility in Hosur, Tamil Nadu.

SUPPLY CHAIN

Looking at the progress by both Tata Electronics and Kaynes, Ashok Chandak, President of IESA & SEMI India, said the scaling of domestic players with minimal dependence on global Tier-1 OEMs hints at growing confidence in the local supply chain.

Tata's integration across materials, packaging, and electronics is an early signal of vertical capabilities being stitched together. This indicates that India is building robust demand and capability in downstream electronics, crucial for sustaining a local chip ecosystem once wafer fabs and OSATs come online.

મેડ ઈન ઈન્ડિયા'ને શક્તિ આપતું ભારત-યુકે મુક્ત વેપાર કરાર: ઇલેક્ટ્રોનિક્સ ક્ષેત્ર માટે મહત્વપૂર્ણ લાભો - અશોક ચાંડક, પ્રમુખ – SEMI ઈન્ડિયા અને IESA

"ભારત અને યુકે વચ્ચે થયેલો મુક્ત વેપાર કરાર (FTA) એ એક વ્યૂહાત્મક માઈલસ્ટોન છે, જે ભારતની વૈશ્વિક છબીને મજબૂત બનાવે છે અને અનેક મહત્વપૂર્ણ ક્ષેત્રોમાં વ્યાપારિક તકોના દરવાજા ખોલે છે. ઇલેક્ટ્રોનિક્સ ઉત્પાદનો, ઘટકો, કાચા માલ અને કેપિટલ ઇન્વેસ્ટમેન્ટ પર શુલ્ક હટાવવાથી ઉત્પાદન ખર્ચ ઘટાડે છે અને 'મેડ ઈન ઈન્ડિયા' ઉત્પાદનોની વૈશ્વિક સ્પર્ધાત્મકતા વધે છે. આ કરાર ભવિષ્યના FTA માટે એક નવી ધોરણરેખા બનાવે છે, જે સમાન વિચારસરણી ધરાવતા લોકશાહી દેશો સાથે ભારતના ગાઢ જોડાણને દર્શાવે છે અને ઇલેક્ટ્રોનિક્સ જેવા હાઈ-ટેક ક્ષેત્રોમાં તેની વ્યૂહાત્મક સ્થિતિને મજબૂત કરે છે. સ્માર્ટફોન, ઓપ્ટિકલ ફાઈબર કેબલ અને

ઈન્વર્ટર જેવા ભારતીય નિકાસ ઉત્પાદનને શુલ્કમુક્તિ મળવાથી ભારતની વર્તમાન ~\$2 અબજની યુકે ઇલેક્ટ્રોનિક્સ આયાતમાં ભાગીદારી વધવાની શક્યતા છે, અને ૨૦૩૦ સુધીના \$500 અબજના ઇલેક્ટ્રોનિક્સ ઉદ્યોગના લક્ષ્ય તરફ ઝડપથી આગળ વધવાની રાહ ખુલશે. સર્વિસિસ સેક્ટર પણ ડિઝાઈન, ટેસ્ટિંગ અને એમ્બેડેડ સોફ્ટવેરમાં સહયોગ વધવાથી લાભ મેળવશે – જ્યાં યુકેની ડિઝાઈન લીડરશિપ અને ભારતની એન્જિનિયરિંગ ક્ષમતા એકસાથે આવશે. આ FTA કુશળ ટેલેન્ટના ગતિશીલ હલનચલનને પ્રોત્સાહન આપે છે, સપ્લાય ચેનની સ્થિરતા મજબૂત કરે છે અને ગ્રીન તથા ટકાઉ ઇલેક્ટ્રોનિક્સમાં સહયોગને આગળ ધપાવે છે."

Ashok Chandak, President, SEMI India and IESA-Powering 'Made in India': Electronics Sector Gains from India-UK FTA

Bhubaneswar: "The India-UK Free Trade Agreement is a strategic milestone that enhances India's global image and unlocks significant business opportunities across key sectors. By eliminating tariffs on Electronics products, components, raw materials, and capital equipment, it reduces production costs and boosts the global competitiveness of 'Made in India' products. Crucially, this agreement sets a new benchmark for future FTAs, reflecting India's alignment with like-minded democracies and strengthening its strategic position in high-tech sectors such as electronics. With duty-free access for Indian exports like smartphones, optical fibre cables, and inverters, the FTA positions India to scale its current ~US\$2 billion share of UK electronics imports and accelerates progress toward its ambitious US\$500 billion electronics Industry target by 2030.

With duty-free access for Indian exports like smartphones, optical fibre cables, and inverters, the FTA positions India to scale its current ~US\$2 billion share of UK electronics imports and accelerates progress toward its ambitious US\$500 billion electronics Industry target by 2030." The services sector stands to gain from increased collaboration in design, testing, and embedded software—combining UK's design leadership with India's engineering expertise. The FTA also promotes skilled talent mobility, strengthens supply chain resilience, and advances cooperation in green and sustainable electronics.

भारत-यूके एफटीए से मेड इन इंडिया को मिलेगा बल : अशोक चांडक

इलेक्ट्रॉनिक्स क्षेत्र को होगा लाभ

आजाद सिपाही संवाददाता

भुवनेश्वर। सेमी इंडिया और आइइएसए अध्यक्ष अशोक चांडक ने कहा कि भारत-ब्रिटेन मुक्त व्यापार समझौता एक रणनीतिक रूप से एक अहम मील का पत्थर है, जिससे भारत की वैश्विक छवि में वृद्धि हुई है। इससे प्रमुख सेक्टरों में महत्वपूर्ण व्यावसायिक अवसर खुलेंगे। इलेक्ट्रॉनिक्स उत्पादों, कम्पोनेंट्स, कच्चे माल और पूंजीगत उपकरणों पर टैरिफ को समाप्त करके, यह उत्पादन लागत को कम करता है तथा मेड इन इंडिया उत्पादों की वैश्विक प्रतिस्पर्धात्मकता को बढ़ाता है।

यह समझौता भावी मुक्त व्यापार समझौतों के लिए एक नया मानदंड स्थापित करता है, जो समान विचारधारा वाले लोकतंत्रों के साथ भारत के जुड़ाव को दर्शाता है और इलेक्ट्रॉनिक्स जैसे उच्च-तकनीकी क्षेत्रों में इसकी रणनीतिक स्थिति को मजबूत करता है। स्मार्टफोन, ऑप्टिकल फाइबर केबल और इन्वर्टर जैसे भारतीय निर्यातों के लिए ड्यूटी-फ्री पहुंच के साथ, यह मुक्त व्यापार समझौता भारत को ब्रिटेन

के इलेक्ट्रॉनिक्स आयात में अपनी वर्तमान लगभग 2 बिलियन अमेरिकी डॉलर की हिस्सेदारी बढ़ाने की स्थिति में ले आयेगा और 2030 तक इलेक्ट्रॉनिक्स उद्योग के महत्वाकांक्षी 500 बिलियन अमेरिकी डॉलर के लक्ष्य की ओर प्रगति तेज हो जायेगी।

ब्रिटेन की डिजाइन लीडरशिप और भारत की इंजीनियरिंग विशेषज्ञता जब साथ जुड़ेंगी, तो डिजाइन, परीक्षण और एंबेडेड सॉफ्टवेयर में बढ़ते सहयोग से सेवा क्षेत्र को लाभ होगा। यह मुक्त व्यापार समझौता कुशल प्रतिभाओं की गतिशीलता को भी बढ़ावा देगा। आपूर्ति श्रृंखला के लचीलेपन को मजबूत करेगा और ग्रीन व सस्टेनेबल इलेक्ट्रॉनिक्स में सहयोग को आगे बढ़ायेगा।

Ashok Chandak, President, SEMI India and IESA-Powering 'Made in India': Electronics Sector Gains from India-UK FTA

Bhubaneswar: "The India-UK Free Trade Agreement is a strategic milestone that enhances India's global image and unlocks significant business opportunities across key sectors. By eliminating tariffs on Electronics products, components, raw materials, and capital equipment, it reduces production costs and boosts the global competitiveness of 'Made in India' products. Crucially, this agreement sets a new benchmark for future FTAs, reflecting India's alignment with like-minded democracies and strengthening its strategic position in high-tech sectors such as electronics. With duty-free access for Indian exports like smartphones, optical fibre cables, and inverters, the FTA positions India to scale its current ~US\$2 billion share of UK electronics imports and accelerates progress toward its ambitious US\$500 billion electronics Industry target by 2030.

The services sector stands to gain from increased collaboration in design, testing, and embedded software—combining UK's design leadership with India's engineering expertise. The FTA also promotes skilled talent mobility, strengthens supply chain resilience, and advances cooperation in green and sustainable electronics.

"Ashok Chandak, President, SEMI India and IESA

Bhubaneswar, (ENS): "The India–UK Free Trade Agreement is a strategic milestone that enhances India's global image and unlocks significant business opportunities across key sectors. By eliminating tariffs on Electronics products, components, raw materials, and capital equipment, it reduces production costs and boosts the global competitiveness of 'Made in India' products. Crucially, this agreement sets a new benchmark for future FTAs, reflecting India's alignment with like-minded democracies and strengthening its strategic position in high-tech sectors such as electronics. With duty-free access for Indian exports like smartphones, optical fibre cables, and inverters, the FTA positions India to scale its current ~US\$2 billion share of UK electronics imports and accelerates progress toward its ambitious US\$500 billion electronics Industry target by 2030."

The services sector stands to gain from increased collaboration in design, testing, and embedded software—combining UK's design leadership with India's engineering expertise. The FTA also promotes skilled talent mobility, strengthens supply chain resilience, and advances cooperation in green and sustainable electronics.

India-UK FTA to boost electronics manufacturing and exports: SEMI India President

HIT BUREAU

GUWAHATI, July 25: The recently signed India-UK Free Trade Agreement (FTA) is poised to significantly boost India's electronics manufacturing sector by lowering production costs and opening new export avenues, according to Ashok Chandak, President of SEMI India and the India Electronics and Semiconductor Association (IESA).

In an official statement issued on Friday, Chandak described the agreement as a "strategic milestone" that not only elevates India's position in global trade but also strengthens its standing in high-technology sectors such as electronics.

"The India-UK Free Trade Agreement is a strategic milestone that enhances India's global image and unlocks significant business opportunities across key sectors," he stated. Chandak highlighted that the FTA eliminates tariffs on a wide range of electronic products, components, raw materials, and capital equipment, thereby reducing overall production costs for domestic manufacturers.

This, he noted, will enhance the global competitiveness of 'Made in India' electronics and bolster efforts to meet the country's ambitious target of achieving a US\$500 billion electronics industry by 2030. With duty-free access now extended to Indian exports such as smartphones, optical fibre cables, and inverters, the agreement is expected to help India scale up its current ~US\$2 billion share of the UK's electronics imports.

"Crucially, this agreement sets a new benchmark for future FTAs, reflecting India's alignment with like-minded democracies and strengthening its strategic position in high-tech sectors," Chandak added. The pact is also expected to benefit India's services sector through increased collaboration in design, testing, and embedded software development. By combining the UK's established leadership in design with India's engineering capabilities, the two countries can deepen cooperation in innovation and product development.

In addition, Chandak noted that the FTA promotes skilled talent mobility, enhances supply chain resilience, and lays the groundwork for joint initiatives in green and sustainable electronics.

The India-UK FTA comes at a time when India is looking to expand its share in the global electronics market, attract high-value manufacturing, and position itself as a preferred destination for electronics design and production.

भारत-यूके एफटीए से 'मेड इन इंडिया' को मिलेगा बल इलेक्ट्रॉनिक्स क्षेत्र को होगा लाभ

नई दिल्ली, 26 जुलाई (एजेंसी)। भारत-ब्रिटेन मुक्त व्यापार समझौता एक रणनीतिक रूप से एक अहम मील का पत्थर है, जिससे भारत की वैश्विक छवि में वृद्धि हुई है। इससे प्रमुख सेक्टरों में महत्वपूर्ण व्यावसायिक अवसर खुलेंगे। इलेक्ट्रॉनिक्स उत्पादों, कम्पोनेंट्स, कच्चे माल और पूंजीगत उपकरणों पर टैरिफ को समाप्त करके, यह उत्पादन लागत को कम करता है तथा 'मेड इन इंडिया' उत्पादों की वैश्विक प्रतिस्पर्धात्मकता को बढ़ाता है। यह समझौता भावी मुक्त व्यापार समझौतों के लिए एक नया मानदंड स्थापित करता है, जो समान विचारधारा वाले लोकतंत्रों के साथ भारत के जुड़ाव को दर्शाता है और इलेक्ट्रॉनिक्स जैसे उच्च-तकनीकी क्षेत्रों में इसकी रणनीतिक स्थिति को मजबूत करता है। स्मार्टफोन, ऑप्टिकल फाइबर केबल

और इन्वर्टर जैसे भारतीय निर्यातों के लिए ड्यूटी-फ्री पहुंच के साथ यह मुक्त व्यापार समझौता भारत को ब्रिटेन के इलेक्ट्रॉनिक्स आयात में अपनी वर्तमान लगभग 2 बिलियन अमेरिकी डॉलर की हिस्सेदारी बढ़ाने की स्थिति में ले आएगा और 2030 तक इलेक्ट्रॉनिक्स उद्योग के महत्वाकांक्षी 500 बिलियन अमेरिकी डॉलर के लक्ष्य की ओर प्रगति तेज हो जाएगी। ब्रिटेन की डिजाइन लीडरशिप और भारत की इंजीनियरिंग विशेषज्ञता जब साथ जुड़ेंगी तो डिजाइन, परीक्षण और एम्बेडेड सॉफ्टवेयर में बढ़ते सहयोग से सेवा क्षेत्र को लाभ होगा। यह मुक्त व्यापार समझौता कुशल प्रतिभाओं की गतिशीलता को भी बढ़ावा देगा, आपूर्ति श्रृंखला के लचीलेपन को मजबूत करेगा और ग्रीन व सस्टेनेबल इलेक्ट्रॉनिक्स में सहयोग को आगे बढ़ाएगा।

The FTA also promotes skilled talent mobility, strengthens supply chain resilience, and advances cooperation in green and sustainable electronics. Ashok Chandak, President, SEMI India and IESA. The proposed India–UK Free Trade Agreement

(FTA) has emerged as a pivotal development in the bilateral relationship between the two nations, aiming to bolster economic cooperation and unlock significant trade potential across diverse sectors. Negotiations, which began in January 2022, have witnessed multiple rounds of dialogue addressing complex issues such as tariff reductions, market access, rules of origin, labour mobility, services liberalisation, and investment protection. For India, the FTA represents a strategic opportunity to secure preferential access for its labour-intensive exports like textiles, leather, jewellery, and pharmaceuticals, while also enhancing prospects in IT, legal, and financial services. The United Kingdom, post-Brexit, views the agreement as a cornerstone in its Indo-Pacific strategy to diversify trade beyond Europe, seeking lower duties on automobiles, scotch whisky, medical devices, and improved access for professional services. Both countries have agreed to address sensitive matters including data protection, intellectual property rights, and environmental standards with a focus on mutual benefit and regulatory alignment. The FTA is also expected to enhance bilateral investments and support medium and small enterprises through simplified trade procedures and standards harmonisation.

ಭಾರತದಲ್ಲೇ ತಯಾರಿಸಲಾದ ವಿದ್ಯುತ್ ಉತ್ಪಾದನೆ: ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ವಲಯಕ್ಕೆ ಲಾಭ

ಬೆಂಗಳೂರು: ಭಾರತವನ್ನು ಜಾಗತಿಕವಾಗಿ ಗುರುತಿಸಿಕೊಳ್ಳುವ ಮತ್ತು ಪ್ರಮುಖ ವಲಯಗಳಲ್ಲಿ ಗಮನಾರ್ಹ ವ್ಯಾಪಾರ ಅವಕಾಶಗಳನ್ನು ತೆರೆಯುವ ಕಾರ್ಯತಂತ್ರದ ಮೈಲಿಗಲ್ಲಾಗಿದೆ ಈ ಭಾರತ-ಯುಕೆ ಮುಕ್ತ ವ್ಯಾಪಾರ ಒಪ್ಪಂದ. ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಉತ್ಪನ್ನಗಳು, ಘಟಕಗಳು, ಕಚ್ಚಾ ವಸ್ತುಗಳು ಮತ್ತು ಬಂಡವಾಳ ಉಪಕರಣಗಳ ಮೇಲಿನ ಸುಂಕಗಳನ್ನು ರದ್ದುಪಡಿಸುವ ಮೂಲಕ, ಇದು ಉತ್ಪಾದನಾ ವೆಚ್ಚವನ್ನು ಕಡಿಮೆ ಮಾಡುತ್ತದೆ ಮತ್ತು 'ಭಾರತದಲ್ಲೇ ತಯಾರಿಸಿದ' ಉತ್ಪನ್ನಗಳ ಜಾಗತಿಕ ಸ್ಪರ್ಧಾತ್ಮಕತೆ ಹೆಚ್ಚಿಸುತ್ತದೆ.

ಬಹಳ ಮುಖ್ಯವಾಗಿ, ಈ ಒಪ್ಪಂದವು ಭವಿಷ್ಯದ ಮುಕ್ತ ವ್ಯಾಪಾರಗಳಿಗೆ ಹೊಸ ಮಾನದಂಡವಾಗಲಿದೆ, ಇದು ಭಾರತದಲ್ಲಿ ಸಮಾನ ಮನಸ್ಸು ಹೊಂದಾಣಿಕೆಯನ್ನು ಪ್ರತಿಬಿಂಬಿಸುತ್ತದೆ ಮತ್ತು ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ನಂತಹ ಹೆಚ್ಚುತ್ತಿರುವ ತಂತ್ರಜ್ಞಾನ ವಲಯಗಳಲ್ಲಿ ಅದರ ಕಾರ್ಯತಂತ್ರ ಸ್ಥಾನವನ್ನು ಬಲಪಡಿಸುತ್ತದೆ. ಸ್ಮಾರ್ಟ್ ಫೋನ್‌ಗಳು, ಆಪ್ಟಿಕಲ್ ಫೈಬರ್ ಕೇಬಲ್‌ಗಳು ಮತ್ತು

ಇನ್ವರ್ಟರ್‌ಗಳಂತಹ ಭಾರತೀಯ ರಫ್ತು ಸಾಮಗ್ರಿಗಳಿಗೆ ಸುಂಕ-ಮುಕ್ತದೊಂದಿಗೆ, ಈ ಮುಕ್ತ ವ್ಯಾಪಾರ ಒಪ್ಪಂದವು ಯುಕೆ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಆಮದುಗಳಲ್ಲಿ ಪ್ರಸ್ತುತ ~\$2 ಯು.ಎಸ್ ಬಿಲಿಯನ್ ಡಾಲರ್ ಪಾಲನ್ನು ಅಳಿಯಲು ಸ್ಥಾನ ನೀಡುತ್ತದೆ ಮತ್ತು 2030 ರ ವೇಳೆಗೆ ಭಾರತದ ಮಹತ್ವಾಕಾಂಕ್ಷೆಯ \$500 ಯು.ಎಸ್ ಬಿಲಿಯನ್ ಡಾಲರ್ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಉದ್ಯಮದ ಗುರಿಯತ್ತ ಕಾರ್ಯಾಯೋಜನೆಯನ್ನು ಇಮ್ಮಡಿಗೊಳಿಸುತ್ತದೆ.

ವಿನ್ಯಾಸ, ಪರೀಕ್ಷೆ ಮತ್ತು ಎಂಬೆಡೆಡ್ ಸಾಫ್ಟ್‌ವೇರ್ ನಲ್ಲಿ ಹೆಚ್ಚಿದ ಸಹಯೋಗದಿಂದ ಸೇವಾ ವಲಯ ಲಾಭ ಪಡೆಯಲಿದೆ - ಇದು ಯುಕೆ ವಿನ್ಯಾಸಿತ ನಾಯಕತ್ವದ ಭಾರತದ ಎಂಜಿನಿಯರಿಂಗ್ ಪರಿಣತಿಯೊಂದಿಗೆ ಸಂಯೋಜಿಸುತ್ತದೆ. ಮುಕ್ತ ವ್ಯಾಪಾರ ಒಪ್ಪಂದವು ಕೌಶಲ್ಯಪೂರ್ಣ ಪ್ರತಿಭೆಗಳನ್ನು ಉತ್ತೇಜಿಸುತ್ತದೆ, ಪೂರೈಕೆ ಸರಪಳಿ ಸ್ಥಿತಿಸ್ಥಾಪಕತ್ವವನ್ನು ಬಲಪಡಿಸುತ್ತದೆ ಮತ್ತು ಹಸಿರು ಮತ್ತು ಸುಸ್ಥಿರ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ನಲ್ಲಿ ಸಹಕಾರವನ್ನು ಮುನ್ನಡೆಸುತ್ತದೆ.

ಭಾರತ-ಯುನೈಟೆಡ್ ಕಿಂಗ್‌ಡಮ್ ವ್ಯಾಪಾರ ಒಪ್ಪಂದ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ವಲಯಕ್ಕೆ ಹೆಚ್ಚು ಲಾಭ

• **ಬೆಂಗಳೂರು:** ಭಾರತ-ಯುನೈಟೆಡ್ ಕಿಂಗ್‌ಡಮ್ ಮುಕ್ತ ವ್ಯಾಪಾರ ಒಪ್ಪಂದದಿಂದ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ವಲಯಕ್ಕೆ ಲಾಭವಾಗುತ್ತದೆ ಎಂದು ಎಸ್‌ಇಎಂಐ ಇಂಡಿಯಾ ಮತ್ತು ಐಇಎಸ್‌ಎ ಅಧ್ಯಕ್ಷ ಅಶೋಕ್ ಚಂದಕ್ ತಿಳಿಸಿದ್ದಾರೆ.

ಐಯುಎಫ್‌ಟಿಎ ಒಪ್ಪಂದ ಕುರಿತು ಮಾತನಾಡಿ, ಈ ಭಾರತ-ಯುಕ್ತ ವ್ಯಾಪಾರ ಒಪ್ಪಂದವು ಭಾರತವನ್ನು ಜಾಗತಿಕವಾಗಿ ಗುರುತಿಸಿಕೊಳ್ಳುವ ಮತ್ತು ಪ್ರಮುಖ ವಲಯಗಳಲ್ಲಿ ಗಮನಾರ್ಹ ವ್ಯಾಪಾರ ಅವಕಾಶವನ್ನು ತೆರೆಯುವ ಕಾರ್ಯತಂತ್ರದ ಮೈಲಿಗಲ್ಲಾಗಿದೆಂದರು.

ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಉತ್ಪನ್ನಗಳು, ಘಟಕಗಳು, ಕೆಪ್ಲಾ ವಸ್ತುಗಳು ಮತ್ತು ಬಂಡವಾಳ ಉಪಕರಣಗಳ ಮೇಲಿನ ಸುಂಕಗಳನ್ನು ರದ್ದುಪಡಿಸುವ ಮೂಲಕ, ಇದು ಉತ್ಪಾದನಾ ವೆಚ್ಚವನ್ನು ಕಡಿಮೆ ಮಾಡುತ್ತದೆ ಮತ್ತು ಭಾರತದಲ್ಲಿ ತಯಾರಿಸಿದ ಉತ್ಪನ್ನಗಳ

ಜಾಗತಿಕ ಸ್ಪರ್ಧಾತ್ಮಕತೆ ಹೆಚ್ಚಿಸುತ್ತದೆ ಎಂದು ಹೇಳಿದರು.

ಭಾರತ-ಯುನೈಟೆಡ್ ಕಿಂಗ್‌ಡಮ್ ಮುಕ್ತ ವ್ಯಾಪಾರ ಒಪ್ಪಂದವು ಭವಿಷ್ಯದ ಮುಕ್ತ ವ್ಯಾಪಾರಗಳಿಗೆ ಹೊಸ ವೇದಿಕೆಯನ್ನು ಒದಗಿಸಿದೆ. ಭಾರತದಲ್ಲಿ ಸಮಾನ ಮನ್ನಣೆ ಹೊಂದಾಣಿಕೆಯನ್ನು ಪ್ರತಿ ಬಿಂಬಿಸುತ್ತದೆ ಮತ್ತು ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ನಂತರ ಹೆಚ್ಚುತ್ತಿರುವ ತಂತ್ರಜ್ಞಾನ ವಲಯಗಳಲ್ಲಿ ಅದರ ಕಾರ್ಯತಂತ್ರ ಸ್ಥಾನವನ್ನು ಬಲಪಡಿಸುತ್ತದೆ. ಸ್ಮಾರ್ಟ್ ಫೋನ್‌ಗಳು, ಆಪ್ಟಿಕಲ್ ಫೈಬರ್‌ಕೇಬಲ್‌ಗಳು ಮತ್ತು ಭಾರತೀಯ ರಫ್ತು ಸಾಮಗ್ರಿಗಳಿಗೆ ಸುಂಕ-ಮುಕ್ತದೊಂದಿಗೆ, ಈ ಮುಕ್ತ ವ್ಯಾಪಾರ ಒಪ್ಪಂದವು ಯುಕೆ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಆಮದು ಪ್ರಸ್ತುತ 2 ಯು.ಎಸ್ ಬಿಲಿಯನ್ ಡಾಲರ್ ಹೊಂದಲು ಸ್ಥಾನ ನೀಡುತ್ತದೆಂದರು.

ಭಾರತ-ಯುಕೆ ಒಪ್ಪಂದದಿಂದ ಎಲೆಕ್ಟ್ರಾನಿಕ್‌ಗೆ ಲಾಭ: ಚಂದಕ್

ಬೆಂಗಳೂರು: ಭಾರತ ಮತ್ತು ಯುನೈಟೆಡ್ ಕಿಂಗ್‌ಡಮ್ ನಡುವಣ ಮುಕ್ತ ವ್ಯಾಪಾರ ಒಪ್ಪಂದದಿಂದ ಭಾರತದ ಎಲೆಕ್ಟ್ರಾನಿಕ್ ಉದ್ಯಮಕ್ಕೆ ಅನುಕೂಲಕರ ವಾತಾವರಣ ನಿರ್ಮಿಸಲಿದ್ದು, ಮೇಕ್ ಇನ್ ಇಂಡಿಯಾ ಅಭಿಯಾನಕ್ಕೆ ಒತ್ತು ನೀಡಲಿದೆ ಎಂದು ಭಾರತೀಯ ಎಲೆಕ್ಟ್ರಾನಿಕ್ ಮತ್ತು ಸೆಮಿಕಂಡಕ್ಟರ್ ಅಸೋಸಿಯೇಷನ್ ಅಧ್ಯಕ್ಷ ಅಶೋಕ್ ಚಂದಕ್ ಬಣ್ಣಿಸಿದ್ದಾರೆ.

ಈ ಕುರಿತು ಹೇಳಿಕೆ ನೀಡಿರುವ ಅವರು, ಉಭಯ ರಾಷ್ಟ್ರಗಳ ನಡುವಣ

ವಹಿವಾಟಿನ ವೇಳೆ ಎಲೆಕ್ಟ್ರಾನಿಕ್ ಉತ್ಪನ್ನಗಳು, ಕಚ್ಚಾವಸ್ತುಗಳು ಮತ್ತು ಬಂಡವಾಳ ಉಪಕರಣಗಳ ಮೇಲಿನ ಸುಂಕವನ್ನು ತೆಗೆದುಹಾಕುವ ನಿಟ್ಟಿನಲ್ಲಿ ಈ ಒಪ್ಪಂದ ನೆರವಾಗಲಿದೆ. ಭಾರತವನ್ನು ಉತ್ಪನ್ನಗಳ ತಯಾರಿಕಾ ಕೇಂದ್ರವನ್ನಾಗಿ ರೂಪಿಸುವ ಪ್ರಮುಖ ಉದ್ದೇಶದಿಂದ ಮೇಕ್ ಇನ್ ಇಂಡಿಯಾ ಯೋಜನೆ ರೂಪಿಸಲಾಗಿದೆ. ಈ ಯೋಜನೆಯಡಿ ಭಾರತದಲ್ಲಿ

ಎಲ್ಲ ಉತ್ಪನ್ನಗಳನ್ನು ತಯಾರಿಸಬಹುದು. ಭಾರತದಾದ್ಯಂತ ಉದ್ಯೋಗ ಅವಕಾಶಗಳನ್ನು ಹೆಚ್ಚಿಸುವ ನಿಟ್ಟಿನಲ್ಲಿ ಈ ಒಪ್ಪಂದ ಸಹಕಾರಿಯಾಗಲಿದೆ ಎಂದಿದ್ದಾರೆ.

ಒಪ್ಪಂದವು ಎಲೆಕ್ಟ್ರಾನಿಕ್ ಹೈಟೆಕ್ ವಲಯಗಳಲ್ಲಿ ಭಾರತದ ಸ್ಥಾನವನ್ನು ಬಲಪಡಿಸುತ್ತಿದ್ದು, ಸ್ಮಾರ್ಟ್ ಫೋನ್, ಆಪ್ಟಿಕಲ್ ಫೈಬರ್ ಕೇಬಲ್ ಸೇರಿದಂತೆ ಇನ್ನಿತರಗಳಂತಹ ಉತ್ಪನ್ನಗಳನ್ನು ಸುಂಕ ರಹಿತ ರಫ್ತು ಮಾಡಲು ಅವಕಾಶ ನೀಡುತ್ತದೆ.

ಅಲ್ಲದೇ ಎಲೆಕ್ಟ್ರಾನಿಕ್ ಆಮದು ವಹಿವಾಟನ್ನು ಸದ್ಯದ 2 ಬಿಲಿಯನ್ ಡಾಲರ್‌ನಿಂದ 2030ರ ವೇಳೆಗೆ 500 ಬಿಲಿಯನ್ ಡಾಲರ್‌ವರೆಗೆ ಹೆಚ್ಚಿಸುವ ಗುರಿಗೆ ಪೂರಕವಾಗಿ ಭಾರತ ತನ್ನ ಸಾಮರ್ಥ್ಯವನ್ನು ಹೆಚ್ಚಿಸಿಕೊಳ್ಳುವತ್ತ ಉಭಯ ರಾಷ್ಟ್ರಗಳ ನಡುವಣ ಒಪ್ಪಂದವು ಮಹತ್ವದ ರಹದಾರಿಯಾಗಿದೆ ಎಂದು ಹೇಳಿದ್ದಾರೆ.

Ashok Chandak, President SEMI India and IESA.Powering ‘Made in India’: Electronics Sector Gains from India–UK FTA”

Bangalore : “The India–UK Free Trade Agreement is a strategic milestone that enhances India’s global image and unlocks significant business opportunities across key sectors. By eliminating tariffs on Electronics products, components, raw materials, and capital equipment, it reduces production costs and boosts the global competitiveness of ‘Made in India’ products.

Crucially, this agreement sets a new benchmark for future FTAs, reflecting India’s alignment with like-minded democracies and strengthening its strategic position in high-tech sectors such as electronics. With duty-free access for Indian exports like smartphones, optical fibre cables, and inverters, the FTA positions India to scale its current ~US\$2 billion share of UK electronics imports and accelerates progress toward its ambitious US\$500 billion electronics Industry target by 2030.”

The services sector stands to gain from increased collaboration in design, testing, and embedded software—combining UK’s design leadership with India’s engineering expertise. The FTA also promotes skilled talent mobility, strengthens supply chain resilience, and advances cooperation in green and sustainable electronics.

President SEMI India and IESA

In a major step towards redefining global trade dynamics and boosting India's high-tech ambitions, the India–UK Free Trade Agreement (FTA) is poised to unlock transformative opportunities across the electronics sector. With the potential to reshape export competitiveness, drive foreign collaborations, and accelerate industrial growth, the FTA is being hailed as a landmark moment by industry leaders.

Ashok Chandak, President of SEMI India and IESA (India Electronics and Semiconductor Association), underscored the strategic significance of the FTA, particularly for India's rapidly evolving electronics industry. He says, "The India–UK Free Trade Agreement is a strategic milestone that enhances India's global image and unlocks significant business opportunities across key sectors. By eliminating tariffs on Electronics products, components, raw materials, and capital equipment, it reduces production costs and boosts the global competitiveness of 'Made in India' products."

"The services sector stands to gain from increased collaboration in design, testing, and embedded software—combining UK's design leadership with India's engineering expertise," emphasized Ashok Chandak.

With the global tech economy shifting toward sustainability and resilience, this agreement also facilitates strategic gains in climate-conscious innovation. Cooperation in green electronics, low-emission manufacturing, and talent exchange will further elevate India's image as a responsible and forward-looking electronics powerhouse.

"The FTA also promotes skilled talent mobility, strengthens supply chain resilience, and advances cooperation in green and sustainable electronics," added Ashok Chandak, reinforcing the broader vision behind the policy.

As emphasized by Chandak, the India–UK FTA is not just a trade facilitation mechanism—it is a symbol of India's evolving stature on the global stage. For the electronics sector, it offers a clear path to innovation, scale, and strategic growth, reaffirming India's vision of becoming a trusted global manufacturing partner in the decade ahead.

INDIA-UK FTA A STRATEGIC BOOST FOR ELECTRONICS SECTOR AND 'MADE IN INDIA': SEMI INDIA AND IESA PRESIDENT ASHOK CHANDAK

Bengaluru: The India-UK Free Trade Agreement (FTA) represents a strategic breakthrough that significantly elevates India's global economic profile and opens up new business avenues, particularly in the electronics sector, according to **Ashok Chandak, President of SEMI India and the India Electronics and Semiconductor Association (IESA).**

Chandak stated that the elimination of tariffs on electronic goods, components, raw materials, and capital equipment under the FTA will lower manufacturing costs and enhance the global competitiveness of Indian-made products. The agreement is also expected to bolster exports of smartphones, optical fibre cables, and inverters by providing duty-free access to the UK market.

He further emphasized that the FTA sets a new precedent for future international trade deals by aligning India with other democratic economies and reinforcing its strategic position in advanced technology sectors like electronics. The deal is projected to help increase India's current ~US\$2 billion share in the UK's electronics imports and drive progress toward the country's ambitious goal of building a US\$500 billion electronics industry by 2030.

The services sector is also expected to benefit from enhanced collaboration in areas such as electronic design, testing, and embedded software—combining UK's strengths in design with India's robust engineering capabilities. Additionally, the FTA facilitates skilled talent mobility, improves supply chain resilience, and fosters joint efforts in green and sustainable electronics.

UK to import smartphones optical fibre cables inverters at zero duty from India under FTA

New Delhi, Jul 24 (PTI) In a major boost to India's electronics sector, exports of smartphones, optical fibre cables, and inverters to the UK will attract zero duty under the free trade agreement signed between the countries on Thursday.

The India-UK FTA opens up export potential for Indian software firms, with the inclusion of IT and IT-enabled services in the list.

"Zero-duty access is expected to accelerate exports of electronic products, with smartphones, optical fibre cables, and inverters set to strengthen India's foothold in the UK market," an official source said.

India has excluded commitment on smartphones, telecom gears like optical fibre equipment, base stations, modem etc under the FTA, officially called the Comprehensive Economic and Trade Agreement (CETA).

Electronics component body ELCINA, Secretary General Rajoo Goel said that the India-UK free trade agreement comes as a breath of fresh air because it is an agreement which really talks about free trade and brings more than 90 per cent of the products which are traded between our two countries to zero duty.

He said electronics is a mixed bag because the duty on some of the electromechanical components such as switches, relays and connectors imported from the UK has been brought down to zero from the current 10-20 per cent.

"This could make imports cheaper into India and may make life a little more difficult for the domestic manufacturers. However, there has been a very positive move in the sense that smartphones, inverters and coaxial cables as well as conductors have been brought down to zero duty by the UK government. That opens a very big market for Indian manufacturers and this also includes consumer electronics," Goel said.

He said that the FTA is a good opportunity for the Indian electronics industry, and the UK should soon become a much bigger and more lucrative market for India with a win-win for both countries.

Mobile industry body ICEA Chairman Pankaj Mohindroo said the agreement's provision for zero-duty access to UK markets for Indian electronic products - including smartphones, inverters, and optical fibre cables - will significantly advance "Make in India for the World" initiative.

"With bilateral trade projected to double by 2030 and India's domestic electronics manufacturing ecosystem targeted to reach USD 500 billion, this partnership positions both nations for substantial economic growth," he said.

Mohindroo said the comprehensive agreement, covering nearly 100 per cent of bilateral trade value, represents another significant milestone in India's strategic approach to international commerce, following substantial free trade agreements with the UAE, the European Free Trade Association (EFTA), and Australia.

"Moreover, this agreement sends a strong signal to the European Union, demonstrating India's credibility as a long-term, strategic trade and technology partner. It adds momentum to the ongoing EU-India FTA discussions and reinforces Europe's growing alignment with India as a preferred partner for innovation, industrial cooperation, and sustainable growth," Prajapati said.

Semiconductor industry body SEMI India and IESA, President, Ashok Chandak, said that eliminating tariffs on electronics products, components, raw materials, and capital equipment reduces production costs and boosts the global competitiveness of 'Made in India' products.

"With duty-free access for Indian exports like smartphones, optical fibre cables, and inverters, the FTA positions India to scale its current around USD 2 billion share of UK electronics imports and accelerates progress toward its ambitious USD 500 billion electronics export target by 2030. Electronic exports also benefit the made-in-India semiconductor chips," Chandak said.

AionOS, Co-Founder and Vice Chairman, CP Gurnani, said that the agreement strengthens the bridge between two digital economies and accelerates our collective journey toward smarter enterprises and inclusive transformation.

India on track for semiconductor manufacturing boom

India's semiconductor manufacturing sector is poised for substantial growth in the coming years, according to Ashok Chandak, President of SEMI India and the India Electronics and Semiconductor Association (IESA). Chandak highlighted a robust increase in domestic semiconductor demand, projected to reach around \$103 billion by 2030. This surge is prompting increased investments from both Indian conglomerates and international players.

He pointed out that companies like Tata Electronics, the HCL-Foxconn joint venture, and the Varun Verukappa Group are making significant strides in infrastructure development. These initiatives include wafer fabrication units, assembly and testing facilities, and advanced packaging centers. As of mid-2025, at least six semiconductor fabrication projects are already in progress across the country.

A key factor driving the momentum is strong government support. India has introduced generous incentive programs such as the Production Linked Incentive (PLI) and Design Linked Incentive (DLI) schemes. These initiatives include financial support that covers up to 50 percent of a project's capital expenditure, as well as state-level assistance. They aim to create a reliable, self-sustaining supply and design ecosystem capable of global competitiveness.

Collaboration between SEMI and IESA is also playing a vital role in building a stronger semiconductor ecosystem. Together, these organizations are focusing on talent development, research infrastructure, and global investment promotion. This has attracted world-class equipment manufacturers like Applied Materials and Lam Research, further strengthening the local supply chain.

India's semiconductor industry is expected to grow at a compound annual growth rate of about 15 percent through 2030, more than double the global average. The sector is also forecast to generate up to one million direct and indirect jobs by 2026. However, challenges such as limited local availability of critical materials like silicon wafers and specialty gases still need to be addressed.

Chandak emphasized that strategic policy actions, strong international partnerships, and continued innovation will be crucial to establishing India as a global manufacturing hub for semiconductors.

A quantum leap into reality

THE IBM Quantum Starling project represents a significant breakthrough in fault-tolerant quantum computing, paving the way for real-world applications in various fields. Current quantum computers are primarily confined to research and academic use due to their limitations in size, stability, and error correction. Starling's core innovation lies in its ability to correct errors that naturally occur in

quantum computations, enabling more reliable and accurate results.

How will Quantum Starling, expected to be operational by 2029, bridge the gap between quantum potential and business reality? How will it address previous limitations and what business use cases will emerge? Where does India stand in the global quantum race?

Sudhir Chowdhary spoke to industry leaders to decode the quantum maze.

Classical and quantum to work together

Manish Gangwar
Executive director - ISB
Institute of Data Science

IBM'S UNVEILING OF the Quantum System Two and the Quantum Starling Processor marks a major milestone in the evolution of quantum computing—from theoretical promise to scalable, enterprise-grade technology. This advancement brings us closer to the day when quantum computing can address real-world challenges in areas like drug discovery, logistics, finance, and pharmaceuticals.

The quantum era presents a big opportunity to reimagine how AI, data science, and quantum computing work together. Hybrid systems, where classical and quantum architectures operate in tandem, could tackle complex optimisation problems, simulate molecular interactions for drug discovery, and model financial systems with far greater precision.

One of the most profound implications lies in cybersecurity. Quantum computers could one day break many of the encryption systems that underpin global digital infrastructure, prompting urgent conversations around quantum-safe algorithms and next-generation cryptography. The race is now on to ensure secure transitions before adversarial capabilities mature.

India's strategic push through the National Mission on Quantum Technologies and Applications (NM-QTA) is a timely and promising step. At ISB, we are committed to advancing this mission through research, policy insights, and talent development.

Stakeholder engagement will be key to growth

Ajai Chowdhry
Founder, HCL; chairman,
EPIC Foundation

IBM'S ANNOUNCEMENT SHOWS a scalable delivery path toward fault-tolerant quantum computing. With modular architectures, advanced quantum error correction, and integration with hybrid classical systems, IBM enables enterprises to begin developing quantum-enhanced workflows today. Its roadmap aligns technological maturity with real-world application readiness in finance, materials, logistics, and more. The focus on logical qubits and reliable operations ensures predictable performance, essential for enterprise adoption.

It is more meaningful to focus on logical qubits and error correction than on raw qubit count. Though there is a correlation, it is necessary to address key barriers to real-world utility, such as reliability. As the hardware matures to fault-tolerant levels by

2029, backward compatibility will allow quick adaptation without re-architecting.

The Starling system is built with key technologies such as novel error correction and modular chip architecture, which are expected to enable the realisation of a practical quantum computer.

India has taken bold strides in developing a quantum computing system through the National Quantum Mission, accelerating progress through R&D and technology validation with startup support. In addition, the mission will establish a dedicated chip fabrication and packaging facility for quantum computers. It is poised to create a quantum ecosystem that spans the full supply chain, from cables to application software.

To leapfrog globally, engagement among stakeholders is essential. The collaboration between IBM, TCS, and I&T is a strong example of how quantum system hardware, algorithms, and application development can converge to enable real-world quantum solutions.

We're still years from widespread adoption

Ashok Chandak
President, SEMI India
and IESA

THE STARLING QUANTUM processor marks a major leap in the journey toward real-world quantum computing. Designed to support up to 200 logical qubits and 100 million quantum operations, Starling uses advanced qLDPC error correction, lower error rates, and seamless hybrid integration—making quantum systems more stable, accessible and business-relevant.

While we're still years from widespread adoption, Starling is a foundational enabler. It transitions quantum from fragile theory to practical exploration. This opens up critical applications in drug discovery, financial modeling, logistics optimisation, and material science—areas where classical computing struggles. But Starling does more than improve hardware—it signals a call to action for industries to start piloting, training, and investing in quantum capabilities.

IBM's breakthrough comes at a time when India is stepping up its own quantum ambitions. The

₹6,000 crore National Quantum Mission is funding deep R&D across quantum computing, communication, and sensing. Institutions like IISc, IIT Madras, and IIT Bombay are leading core research, while companies like TCS, HCLTech, and IBM India are building talent pipelines and quantum pilot programmes. India has the chance to shift from being a service economy to a co-creator in the quantum future.

IBM Starling is not the destination—it's the runway. Widespread adoption will depend on partnerships, ecosystem readiness, and proving ROI. India has the tools. The question is—are we ready to fly?

INDUSTRY STORY - US Tariff

PRINT(National)

US Copper Tariff may Impact India's Electronics, Chip Plans

IN THE LINE OF FIRE Experts say ripple effects could be deeply disruptive for India's semicon mission

Suraksha P

Bengaluru: President Donald Trump last week announced a steep 50% tariff on copper imports into the US, triggering an alarm across global supply chains and raising concerns in India's electronics and semiconductor industries.

While the measure is primarily aimed at boosting domestic copper production in the US, Indian executives said the ripple effects could to some extent disturb India's chip and electronics manufacturing efforts under its semiconductor mission.

India's reliance on imported high-purity copper materials could become a serious bottleneck as global trade barriers proliferate and disrupt the supply chain, said industry leaders. They urge the Indian government to move swiftly — not just by streamlining import procedures and BIS certifications but also by investing in the domestic production of high-grade copper alloys and materials essential to the electronics and chip value chain.

INDIRECT BLOW

"Copper is critical for chip wiring, PCBs, interconnects, and power systems," said Ashok Chandak, president of SEMI India and the India Electronics and Semiconductor Association (IESA). "India imports a large share of its refined copper and concentrates. Even gold-plated copper wires used in outsourced semiconductor assembly and test

Melting Point

India exported \$2 billion worth of copper and copper products globally in 2024-25; exports to the US accounted for \$360 million (17%)

US is India's third-largest copper export market, after Saudi Arabia (26%) and China (18%)

Any dip in US demand due to tariffs is expected to be absorbed by India's domestic industry

Rising copper prices and trade disruptions may indirectly impact India's semiconductor push

do not currently produce the semiconductor-grade copper needed at scale, the IESA president pointed out.

Global supply issues and costlier components will increase the manufacturing cost and slow down cost-sensitive semiconductor projects, he said. "India must not just incentivise fabs but also build upstream resilience — through domestic refining, free trade agreements, and even strategic reserves."

Semiconductors aren't directly hit by tariffs, said Kunal Chaudhary, partner and co-leader of the Inbound Investment Group at EY India. "But disruptions in copper, critical for chip wiring, are pushing up costs and shifting policy focus. This is slowing India's chip momentum and making things more expensive for global supply chains."

units are facing procedural hurdles."

ET
Insight

As trade barriers proliferate, India's reliance on imported materials could become a serious bottleneck. Govt must move fast to invest in domestic production

Domestic suppliers like Hindustan Copper, Sterlite, and Hindalco

गुरुग्राम, 12 जुलाई। सेमीकॉन इंडिया 2025 2 से 4 सितंबर 2025 तक यशोभूमि (इंडिया इंटरनेशनल कन्वेंशन एंड एक्सपो सेंटर), नई दिल्ली में आयोजित किया जाएगा। सेमी और आईएसएम ने इंडस्ट्री पार्टनरों के सहयोग से सेमीकॉन इंडिया 2025 के लिए आगंतुक पंजीकरण आरंभ कर दिया है। बिल्डिंग द नेक्स्ट सेमीकंडक्टर पावरहाउस' थीम के अंतर्गत, इस कार्यक्रम में माइक्रोइलेक्ट्रॉनिक्स और सेमीकंडक्टर वैल्यू चेन में भारत की बढ़ती क्षमताओं और महत्वाकांक्षाओं को प्रदर्शित किया जाएगा। भारत सरकार के इलेक्ट्रॉनिक्स और सूचना प्रौद्योगिकी मंत्रालय के इंडिया सेमीकंडक्टर मिशन के तत्वावधान में आयोजित, सेमीकॉन इंडिया 2025, सेमीकॉन इंडिया 2024 की शानदार सफलता पर आधारित, नीति, उद्योग, शिक्षा और निवेश समुदायों में वैश्विक और घरेलू स्टेकहोल्डरों को एकजुट करने के लिए एक उच्च प्रभाव वाले मंच के रूप में काम करेगा। सेमी दुनिया भर में आठ वार्षिक सेमीकॉन प्रदर्शनियां आयोजित करता है, सेमीकॉन इंडिया उन्हीं में से एक है। 18 देशों/क्षेत्रों की 300 से अधिक प्रदर्शनी लगाने वाली कंपनियां संपूर्ण इलेक्ट्रॉनिक्स

वैल्यू चेन का प्रदर्शन करेंगी, जिसमें सामग्री व उपकरण से लेकर सिलिकॉन, डिजाइन व सिस्टम तक शामिल होंगे। खास फीचरों में शामिल हैं: वर्कफोर्स डेवलपमेंट पैविलियन, स्टार्टअप पैविलियन, 7 देशों की गोलमेज बैठकें और बी2बी फोरम, प्रशिक्षण और अपस्किलिंग

SEMICON[®]
INDIA

प्रोग्राम। सेमी के अध्यक्ष और सीईओ अजीत मनोचा ने कहा, सेमी के पास हमारे प्रमुख सेमीकॉन प्रदर्शनियों और कार्यक्रमों के माध्यम से उद्योग के विकास को गति देने के लिए ग्रीनफील्ड देशों में सेमीकंडक्टर ईकोसिस्टम के विस्तार को सक्षम करने का एक सिद्ध ट्रैक रिकॉर्ड है।

चिप इंडस्ट्री सक्रिय रूप से अपनी सप्लाय चेन के जोखिम को कम करने, इंजीनियरिंग प्रतिभाओं को जोड़ने और तेजी से बढ़ते इलेक्ट्रॉनिक्स बाजारों में विस्तार करने की कोशिश कर रही है, ये सभी भारत में एक उभरते केंद्र के रूप में आशाजनक अवसरों की ओर इशारा करते हैं।

SEMI and ISM announce in opening of visitor registrations for SEMICON India 2025

NEW DELHI, JULY 12: Visitor registration for SEMICON India 2025, scheduled to be held from 2 to 4 September 2025 at Yashobhoomi (India International Convention and Expo Centre), New Delhi, has been opened by SEMI and ISM, in collaboration with industry partners. Under the theme “Building the Next Semiconductor Powerhouse”, the event will showcase India’s growing capabilities and ambitions in the microelectronics and semiconductor value chain.

“SEMI has a proven track record of enabling semiconductor ecosystem expansions in greenfield countries via our flagship SEMICON expositions and programs to advance industry growth,” said Ajit Manocha, President and CEO, SEMI. “The chip industry is actively seeking to de-risk its supply chains, add engineering talent, and expand into fast-growing electronics markets – all pointing to promising opportunities in India as an emerging hub.”

“We invite industry leaders, innovators, researchers, students, and policymakers to join us at SEMICON India 2025 and be part of India’s semiconductor transformation Journey,” said S Krishnan, Secretary, MeitY.

“India is at a pivotal moment in its semiconductor journey, and We are committed to accelerating the growth and innovation of India’s semiconductor and electronics ecosystem,” said Ashok Chandak, President, SEMI India and IESA. “This year’s event is set to capitalize on shifting global semiconductor dynamics to help establish India as a rising hub in the semiconductor value chain.”

Visitor registration opens for SEMICON India 2025 in New Delhi

HT Bureau

GUWAHATI, July 11: SEMI and the India Semiconductor Mission (ISM) have officially opened visitor registrations for SEMICON India 2025, scheduled to be held from September 2 to 4 at Yashobhoomi, the India International Convention and Expo Centre in New Delhi.

According to an official statement, the event is being organised in collaboration with industry partners under the theme “Building the Next Semiconductor Powerhouse” and will highlight India’s expanding role in the global microelectronics and semiconductor landscape.

Held under the aegis of the India Semiconductor Mission of the Ministry of Electronics and Information Technology (MeitY), SEMICON India 2025 builds on the success of last year’s edition and aims to provide a high-impact platform that brings together key stakeholders from the policy, industry, academic, and investor communities.

SEMICON India is one of eight global SEMICON events hosted annually by SEMI, each designed to convene leaders and innovators from across the semiconductor design and manufacturing ecosystem.

The 2025 edition is expected to see participation from over 300 exhibiting companies representing 18 countries and regions.

It will feature a three-day conference with global CXOs and industry experts, as well as international and state government pavilions.

Special focus areas will include a workforce development pavilion, startup pavilion, international roundtables, B2B forums, and training and upskilling programmes aimed at supporting India’s growing talent pool in semiconductor manufacturing and design.

SEMI President and CEO Ajit Manocha said the event underscores India’s strategic importance in the global chip industry at a time when supply chain resilience and engineering talent are of paramount importance.

Visitor registration opens for SEMICON India 2025

Chennai, July 12:

Visitor registration for SEMICON India 2025 is now open.

The event will be held from September 2 to 4, 2025, at Yashobhoomi, India International Convention and Expo Centre, New Delhi.

Held under the theme "Building the Next Semiconductor Powerhouse", the event aims to showcase India's growing role in the global semiconductor industry.

It is organized by SEMI and ISM, along with MeitY and industry partners.

Highlights include:

300+ exhibitors from 18 countries

3-day conference with global tech leaders 4 international and 9 state pavilions

Special zones for startups, training, and B2B forums

Ajit Manocha, CEO of SEMI, said the event supports India's growth as a global chip hub. MeitY Secretary S Krishnan and SEMI India President Ashok Chandak invited all stakeholders to join India's semiconductor journey.

Visitor Registration Opens for SEMICON India 2025 at Yashobhoomi, New Delhi

CHENNAI

Visitor registration is now open for SEMICON India 2025, scheduled to take place from 2nd to 4th September 2025 at Yashobhoomi (India International Convention and Expo Centre), New Delhi.

The event is being organized by SEMI and the India Semiconductor Mission (ISM), under the aegis of the Ministry of Electronics and Information Technology (MeitY), Government of India, in collaboration with global and domestic industry partners.

Held under the theme “Building the Next Semiconductor Powerhouse,” SEMICON India 2025 will highlight the nation’s growing capabilities across the entire microelectronics and semicon-

ductor value chain. Following the tremendous success of SEMICON India 2024, the upcoming edition aims to provide a high-impact platform for stakeholders from policy, industry, academia, and investment communities to converge, collaborate, and drive innovation.

Part of a global series of eight annual SEMICON expositions hosted by SEMI, this premier event is expected to witness remarkable growth, reflecting India’s rapidly emerging role as a strategic node in the global semiconductor ecosystem.

Event Highlights:
300+ Exhibiting Companies from 18 countries/regions covering the entire electronics value chain—from materials and equipment to silicon, design, and sys-

tems.

3-Day Leadership Conference featuring global CXOs and expert speakers.

4 International Pavilions and participation from 9 Indian State Governments.

Special Attractions include:
Workforce Development Pavilion
Startup Pavilion
7 Country Roundtables and B2B Forums
Training and Upskilling Programs

Speaking about the event, Ajit Manocha, President and CEO, SEMI, noted, “SEMI has a proven track record of enabling ecosystem expansion in greenfield regions. With global supply chains diversifying and demand for engineering talent surging, India pres-

ents tremendous promise.”

Shri S. Krishnan, Secretary, MeitY, added, “We invite industry leaders, innovators, researchers, students, and policymakers to be part of India’s semiconductor transformation journey at SEMICON India 2025.”

Ashok Chandak, President of SEMI India and IESA, stated, “India is at a pivotal stage in its semiconductor evolution. This year’s SEMICON India will leverage global shifts to further position the country as a trusted and scalable semiconductor manufacturing hub.”

As a dynamic platform for collaboration and growth, SEMICON India 2025 will accelerate India’s journey toward becoming a global semiconductor powerhouse.

SEMI and India Semiconductor Mission (ISM) Announce the Opening of Visitor Registrations for SEMICON® India 2025

R Media News
Chandigarh, July 12
 Visitor registration for SEMICON India 2025, scheduled to be held from 2nd to 4th September 2025 at Yashobhoomi (India International Convention and Expo Centre), New Delhi, has been opened by SEMI and ISM, in collaboration with industry partners. Under the theme “Building the Next Semiconductor Powerhouse”, the event will showcase India’s growing capabilities and ambitions in the microelectronics and semiconductor value chain. Organised under the aegis of the A

generatedIndia Semiconductor Mission, Ministry of Electronics and Information Technology (MeitY), Government of India, SEMICON India 2025, building on the resounding success of SEMICON India 2024, will serve as a high-impact platform to unite global and domestic stakeholders across the policy, industry, academia, and investment communities. SEMICON India is one of eight annual SEMICON expositions worldwide hosted by SEMI that bring together executives and leading experts in the global semiconductor design and manufacturing ecosystem.

ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾಗೆ ನೋಂದಣಿ ಆರಂಭ

■ **ವಿಕ ಸುದ್ದಿಯೊಳಗೆ ಬೆಂಗಳೂರು**

ಸೆಮಿ ಮತ್ತು ಇಂಡಿಯಾ ಸೆಮಿಕಂಡಕ್ಟರ್ ಮಿಷನ್‌ನಿಂದ ಸೆಪ್ಟೆಂಬರ್ 2ರಿಂದ 4ರವರೆಗೆ ನಡೆಯುವ 'ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ- 2025' ಕಾರ್ಯಕ್ರಮಕ್ಕೆ ಸಂದರ್ಶಕರ ನೋಂದಣಿ ಪ್ರಕ್ರಿಯೆ ಆರಂಭವಾಗಿದೆ.

ಇದು ಜಾಗತಿಕ ಸೆಮಿಕಂಡಕ್ಟರ್ ಟ್ರೆಂಡ್‌ಗಳು ಮತ್ತು ಭಾರತದ ಸ್ಥಳೀಯ ಪರಿಸರ ವ್ಯವಸ್ಥೆ ಅಭಿವೃದ್ಧಿ ಕುರಿತ ಪ್ರದರ್ಶನದ ಕಾರ್ಯಕ್ರಮವಾಗಿದ್ದು, ಕೇಂದ್ರ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಮತ್ತು ಮಾಹಿತಿ ತಂತ್ರಜ್ಞಾನ (ಎಂಇಟಿಎ) ಸಚಿವಾಲಯ ಇದನ್ನು ಆಯೋಜಿಸಿದೆ. ಸೆ.2ರಿಂದ 4ರವರೆಗೆ ಹೊಸದಿಲ್ಲಿಯ ಯಶೋಭೂಮಿ (ಇಂಡಿಯಾ ಇಂಟರ್ ನ್ಯಾಷನಲ್ ಕನ್ವೆನ್ಷನ್ ಆಂಡ್ ಎಕ್ಸ್‌ಪೋ ಸೆಂಟರ್)ನಲ್ಲಿ 'ಭವಿಷ್ಯದ ಸೆಮಿ ಕಂಡಕ್ಟರ್ ಪವರ್ ಹೌಸ್ ನಿರ್ಮಾಣ' ಎಂಬ ಥೀಮ್‌ನಡಿ ಈ ಕಾರ್ಯಕ್ರಮ ಆಯೋಜಿಸಲಾಗಿದೆ.

ಮೈಕ್ರೊ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಮತ್ತು ಸೆಮಿಕಂಡಕ್ಟರ್ ಚೈನ್ ವ್ಯಾಲ್ಯೂದಲ್ಲಿ ಭಾರತದ ಸಾಮರ್ಥ್ಯ ಮತ್ತು ಮಹತ್ವಾಕಾಂಕ್ಷೆಗಳನ್ನು ಪ್ರದರ್ಶಿಸುವುದು ಇದರ ಮುಖ್ಯ ಉದ್ದೇಶವಾಗಿದೆ ಎಂದು ಸೆಮಿ ಅಧ್ಯಕ್ಷ ಮತ್ತು ಸಿಇಒ ಅಜಿತ್ ಮನೋಜಾ ಪ್ರಕಟಣೆಯಲ್ಲಿ ತಿಳಿಸಿದ್ದಾರೆ.

18 ದೇಶಗಳಿಂದ 300ಕ್ಕೂ ಹೆಚ್ಚು ಕಂಪನಿಗಳು ಪ್ರದರ್ಶನ ನಡೆಸಲಿವೆ. ಇದರಲ್ಲಿ ಸಾಮಗ್ರಿಗಳು, ಸಲಕರಣೆಗಳು, ಸಿಲಿಕಾನ್, ವಿನ್ಯಾಸ ಮತ್ತು ಸಿಸ್ಟಮ್‌ಗಳು ಸೇರಿದಂತೆ ಎಲ್ಲವೂ ಇರಲಿವೆ. ಜಾಗತಿಕ ಸಿಎಸ್ಸಿಗಳು ಮತ್ತು ಪರಿಣತ ವಾಗ್ವಿಗಳು ಮೂರು ದಿನಗಳ ಸಮ್ಮೇಳನದಲ್ಲಿ ಉದ್ಯಮದ ಬಗ್ಗೆ ಮಾಹಿತಿ ನೀಡುವರು. 4 ಅಂತಾರಾಷ್ಟ್ರೀಯ ವೇದಿಕೆಗಳಿದ್ದು, 9 ರಾಜ್ಯ ಸರ್ಕಾರಗಳು ಭಾಗವಹಿಸಲಿವೆ. ಕಾರ್ಯಪಡೆ ಅಭಿವೃದ್ಧಿ ವೇದಿಕೆ, ಸ್ಟಾರ್ಟ್‌ಅಪ್ ವೇದಿಕೆ, 7 ದೇಶಗಳ ದುಂಡು ಮೇಜು ಮತ್ತು ಔದ್ಯಮಿಕ ಫೋರಂಗಳು, ತರಬೇತಿ ಮತ್ತು ಕೌಶಲ ಕಾರ್ಯಕ್ರಮಗಳು ನಡೆಯಲಿವೆ ಎಂದು ವಿವರಿಸಿದ್ದಾರೆ.

‘SEMICON India 2025’ from September 2

NEW DELHI

The upcoming ‘SEMICON India 2025’ event will play a key role in showcasing how India is positioning itself as a trusted, self-reliant, and globally competitive hub in the semiconductor and microelectronics sector, the Ministry of Electronics and Information Technology (MeitY) said on Friday.

Scheduled to take place from September 2 to 4 at

Yashobhoomi in the national capital, the event aims to highlight India’s growing capabilities and ambitions in the global semiconductor industry.

Jointly organised by the India Semiconductor Mission (ISM) and global industry body SEMI, the event will serve as a vital platform to bring together policymakers, industry leaders, global investors, startups and academia. IANS

Visitor Registrations Open for SEMICON India 2025: Paving the Way for Semiconductor Leadership

DECCAN NEWS SERVICE
NEW DELHI

SEMI and the India Semiconductor Mission (ISM) have officially opened visitor registrations for SEMICON® India 2025, to be held from September 2 to 4 at Yashobhoomi (India International Convention and Expo Centre), New Delhi. With the theme "Building the Next Semiconductor Powerhouse", this landmark event will spotlight India's growing footprint in the global semiconductor value chain.

Organized under the aegis of the Ministry of Electronics and Information Technology (MeitY), Government of India, SEMICON India 2025

builds on the momentum of last year's successful edition, promising to be a high-impact convergence of policymakers, industry leaders, academia, startups, and global investors.

Key Highlights of SEMICON India 2025:

- 300+ exhibitors from 18 countries, covering the complete electronics ecosystem—from materials and equipment to silicon design and system integration.
- Four international pavilions and nine state government pavilions, showcasing regional capabilities and policy support.
- A 3-day conference fea-

turing global CXOs, thought leaders, and technocrats.

• Special features including a Workforce Development Pavilion, Startup Pavilion, Country Roundtables, B2B forums, and training/upskilling programs tailored for industry-ready talent.

• Ajit Manocha, President and CEO of SEMI, emphasized India's pivotal role: "The global chip industry is looking to de-risk supply chains and tap new engineering talent pools. SEMICON India 2025 reflects India's strategic rise as a promising semiconductor hub."

Shri S. Krishnan, Secretary, MeitY, called upon stakeholders to participate: "This is a

unique opportunity for leaders, researchers, and policymakers to be part of India's semiconductor transformation journey."

Ashok Chandak, President, SEMI India and IESA, added: "This year's event will accelerate India's integration into global semiconductor supply chains and establish us as a key innovation partner."

As one of SEMI's eight global SEMICON expositions, SEMICON India 2025 is poised to foster international collaborations, investment dialogues, and industry-academia linkages. It is a powerful platform driving India's ambition to become a trusted, scalable, and innovation-driven electronics manufacturing hub.

SEMICON India 2025 Invites Visitors to Explore India's Growing Chip Ecosystem

SEMICON India is one of eight annual SEMICON expositions worldwide hosted by SEMI that bring together executives and leading experts in the global semiconductor design and manufacturing ecosystem.

Visitor registration for SEMICON India 2025, scheduled to be held from 2nd to 4th September 2025 at Yashobhoomi (India International Convention and Expo Centre), New Delhi, has been opened by SEMI and ISM, in collaboration with industry partners.

Under the theme "Building the Next Semiconductor Powerhouse", the event will showcase India's growing capabilities and ambitions in the microelectronics and semiconductor value chain.

Organised under the aegis of the India Semiconductor Mission, Ministry of Electronics and Information Technology (MeitY), Government of India, SEMICON India 2025, building on the resounding success of SEMICON India 2024, will serve as a high-impact platform to unite global and domestic stakeholders across the policy, industry, academia, and investment communities.

SEMICON India is one of eight annual SEMICON expositions worldwide hosted by SEMI that bring together executives and leading experts in the global semiconductor design and manufacturing ecosystem. The anticipated impressive growth of SEMICON India 2025 highlights the importance of India as the next hub.

Event Highlights:

- 300+ Exhibiting Companies from 18 countries/regions showcasing the entire electronics value chain – from materials and equipment to silicon, design and systems
- 3-Day Conference featuring Global CXOs and expert speakers
- 4 International Pavilions, 9 Participating State Governments Pavilions
- Special Features include: Workforce Development Pavilion, Startup Pavilion, 7 Country Roundtables and B2B Forums, Training & Upskilling Programs

"SEMI has a proven track record of enabling semiconductor ecosystem expansions in greenfield countries via our flagship SEMICON expositions and programs to advance industry growth," said **Ajit Manocha, President and CEO, SEMI**. "The chip industry is actively seeking to de-risk its supply chains, add engineering talent, and expand into fast-growing electronics markets – all pointing to promising opportunities in India as an emerging hub."

"We invite industry leaders, innovators, researchers, students, and policymakers to join us at SEMICON India 2025 and be part of India's semiconductor transformation Journey," said Shri S Krishnan, Secretary, MeitY.

"India is at a pivotal moment in its semiconductor journey, and We are committed to accelerating the growth and innovation of India's semiconductor and electronics ecosystem," said Ashok Chandak, President, SEMI India and IESA. "This year's event is set to capitalize on shifting global semiconductor dynamics to help establish India as a rising hub in the semiconductor value chain."

A Platform for Collaboration and Growth

SEMICON India 2025 aims to catalyze collaboration across the global semiconductor ecosystem and bolster India's position as a trusted and scalable electronics manufacturing hub. Organized jointly by SEMI and ISM (MeitY), this event represents India's strongest whole of nation push toward building a world-class semiconductor industry.

Semicon India 2025 Scheduled For September In New Delhi

New Delhi, Jul 12 (KNN) The Ministry of Electronics and Information Technology (MeitY) announced on Friday that the fourth edition of Semicon India 2025 will take place from September 2-4 at Yashobhoomi India International Convention and Expo Centre in New Delhi.

The event represents a joint initiative between the India Semiconductor Mission and SEMI, the global industry association serving the manufacturing supply chains for the microelectronics, display, and photovoltaic industries.

The three-day conference is expected to attract over 300 companies from 18 countries, demonstrating India's strategic focus on developing a self-reliant and globally competitive semiconductor ecosystem.

This initiative aligns with the government's broader 'Atmanirbhar Bharat' policy framework, which emphasises domestic manufacturing capabilities and reduced import dependence.

The conference will convene global chief executives, technology leaders, and policy experts to discuss critical industry topics including manufacturing trends, supply chain strategies, and emerging technologies.

Industry participants will share expertise on semiconductor manufacturing processes, technological innovations, supply chain resilience, and evolving market dynamics.

The Indian government has positioned semiconductor development as a strategic priority, establishing the Semicon India programme to transform the country into a trusted semiconductor manufacturing hub.

To support this objective, the government has allocated Rs 76,000 crore for building a comprehensive domestic semiconductor and display manufacturing ecosystem.

This year's conference will introduce several new features, including international pavilions, country-specific roundtable discussions, workforce development programmes, and a dedicated pavilion for startup companies.

These additions reflect the event's expanded scope and the government's emphasis on fostering innovation across different segments of the semiconductor industry.

- **Special Features** include: Workforce Development Pavilion, Startup Pavilion, 7 Country Roundtables and B2B Forums, Training & Upskilling Programs

"SEMI has a proven track record of enabling semiconductor ecosystem expansions in greenfield countries via our flagship SEMICON expositions and programs to advance industry growth," said **Ajit Manocha, President and CEO, SEMI**. "The chip industry is actively seeking to de-risk its supply chains, add engineering talent, and expand into fast-growing electronics markets – all pointing to promising opportunities in India as an emerging hub."

"We invite industry leaders, innovators, researchers, students, and policymakers to join us at SEMICON India 2025 and be part of India's semiconductor transformation journey," said **Shri S Krishnan, Secretary, MeitY**.

"India is at a pivotal moment in its semiconductor journey, and We are committed to accelerating the growth and innovation of India's semiconductor and electronics ecosystem," said **Ashok Chandak, President, SEMI India and IESA**. "This year's event is set to capitalize on shifting global semiconductor dynamics to help establish India as a rising hub in the semiconductor value chain."

A Platform for Collaboration and Growth

SEMICON India 2025 aims to catalyze collaboration across the global semiconductor ecosystem and bolster India's position as a trusted and scalable electronics manufacturing hub. Organized jointly by **SEMI** and **ISM (MeitY)**, this event represents India's strongest whole of nation push toward building a world-class semiconductor industry.

ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025: ಸಂದರ್ಶಕರ ನೋಂದಣಿ ಆರಂಭ

TEAM UDAYAVANI, JUL 14, 2025, 9:05 PM IST

SEMICON[®] INDIA

ಸವದೇಶಿ: ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025, ಭಾರತದ ಸೆಮಿಕಂಡಕ್ಟರ್ ಕ್ಷೇತ್ರದ ಭವಿಷ್ಯವನ್ನು ರೂಪಿಸುವ ಪ್ರಮುಖ ಕಾರ್ಯಕ್ರಮ, ಸೆಪ್ಟೆಂಬರ್ 2-4, 2025ರಂದು ಸವದೇಶಿಯ ಯಶೋಭೂಮಿಯಲ್ಲಿ (ಇಂಡಿಯಾ ಇಂಟರ್‌ನ್ಯಾಷನಲ್ ಕನ್ವೆನ್ಷನ್ ಆಂಡ್ ಎಕ್ಸ್‌ಪೋ ಸೆಂಟರ್) ನಡೆಯಲಿದೆ.

ಈ ಕಾರ್ಯಕ್ರಮಕ್ಕೆ ಸಂದರ್ಶಕರ ನೋಂದಣಿ ಆರಂಭವಾಗಿದ್ದು, ಸೆಮಿ ಮತ್ತು ಇಂಡಿಯಾ ಸೆಮಿಕಂಡಕ್ಟರ್ ಮಿಷನ್ (ಐಎಸ್‌ಎಂ) ಇದನ್ನು ಆಯೋಜಿಸುತ್ತಿದೆ. "ಭವಿಷ್ಯದ ಸೆಮಿಕಂಡಕ್ಟರ್ ಪವರ್‌ಹೌಸ್ ನಿರ್ಮಾಣ" ಎಂಬ ಛೇದನಾಡಿ, ಭಾರತದ ಮೈಕ್ರೋಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಮತ್ತು ಸೆಮಿಕಂಡಕ್ಟರ್ ವೃದ್ಧಿಯ ಸಾಮರ್ಥ್ಯವನ್ನು ಇದು ಪ್ರದರ್ಶಿಸಲಿದೆ.

ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಮತ್ತು ಮಾಹಿತಿ ತಂತ್ರಜ್ಞಾನ

ಸಚಿವಾಲಯದ ಐಎಸ್‌ಎಂನೊಂದಿಗೆ ಸೆಮಿ ಆಯೋಜಿಸಿರುವ ಈ ಕಾರ್ಯಕ್ರಮ, 2024ರ ಯಶಸ್ವಿನ ಮೇಲೆ ನಿರ್ಮಾಣವಾಗಿದೆ. 18 ದೇಶಗಳ 300ಕ್ಕೂ ಹೆಚ್ಚು ಕಂಪನಿಗಳು ತಮ್ಮ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ವ್ಯಾಪ್ತಿ, ಬೈನಾನ ಸಾಮಗ್ರಿಗಳು, ಸಲಕರಣೆಗಳು, ಸಿಲಿಕಾನ್, ವಿನ್ಯಾಸ ಮತ್ತು ಸಿಸ್ಟಮ್‌ಗಳನ್ನು ಪ್ರದರ್ಶಿಸಲಿವೆ. ಜಾರಿ personally ಜಾಗತಿಕ ಸಿಎಕ್ಸ್‌ಪೋಗಳು, ಪರಿಣಿತ ವಾಗ್ವಿಗಳು, 4 ಅಂತರಾಷ್ಟ್ರೀಯ ವೇದಿಕೆಗಳು, 9 ರಾಜ್ಯ ಸರ್ಕಾರಗಳ ಭಾಗವಹಿಸುವಿಕೆ, ಕಾರ್ಯಪಡೆ ಅಭಿವೃದ್ಧಿ ವೇದಿಕೆ, ಸ್ಪಾಟ್‌ ವೇದಿಕೆ, 7 ದೇಶಗಳ ದುಂಬುಮೇಜುಗಳು ಮತ್ತು ಔದ್ಯಮಿಕ ಫೋರಮ್‌ಗಳು ಈವೆಂಟ್‌ನ ವಿಶೇಷತೆಗಳಾಗಿವೆ.

ಸೆಮಿ ಸಿಇಒ ಶ್ರೀ ಅಜಿತ ಮೇರೋಟಾ, "ಭಾರತವನ್ನು ಸೆಮಿಕಂಡಕ್ಟರ್ ಕೇಂದ್ರವಾಗಿರಲು ಈ ಕಾರ್ಯಕ್ರಮ ಅವಕಾಶ ಒದಗಿಸುತ್ತದೆ," ಎಂದಿದ್ದಾರೆ. ಇದೇ ರೀತಿ, ಮಾಹಿತಿ ಮತ್ತು ತಂತ್ರಜ್ಞಾನ ಸಚಿವಾಲಯದ ಕಾರ್ಯದರ್ಶಿ ಎಸ್ ಕೃಷ್ಣನ್, "ಉದ್ಯಮದ ನಾಯಕರು, ಸಂಶೋಧಕರು, ವಿದ್ಯಾರ್ಥಿಗಳು ಮತ್ತು ಪಾಲುದಾರರನ್ನು ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025ಕ್ಕೆ ಸೇರಲು ಆಹ್ವಾನಿಸುತ್ತೇವೆ," ಎಂದು ಕರೆ ನೀಡಿದ್ದಾರೆ.

ಈ ಕಾರ್ಯಕ್ರಮ ಜಾಗತಿಕ ಮತ್ತು ದೇಶೀಯ ಪಾಲುದಾರರನ್ನು ಒಗ್ಗೂಡಿಸಿ, ಭಾರತದ ಸೆಮಿಕಂಡಕ್ಟರ್ ಉದ್ಯಮದ ಬೆಳವಣಿಗೆಗೆ ಉತ್ತೇಜನ ನೀಡಲಿದೆ, ಇದು ದೇಶವನ್ನು ಜಾಗತಿಕ ಟೆಕ್ ಉತ್ಪಾದನಾ ಕೇಂದ್ರವಾಗಿ ಸ್ಥಾಪಿಸಲು ಸಹಾಯ ಮಾಡಲಿದೆ.

'सेमीकॉन इंडिया 2025' के लिए विजिटर रजिस्ट्रेशन शुरू

'बिल्डिंग द नेक्स्ट सेमीकंडक्टर पावरहाउस' होगी थीम

बेंगलूरु/दक्षिण भारत। सेमी और इंडिया सेमीकंडक्टर मिशन (आईएसएम) ने 'सेमीकॉन इंडिया 2025' के लिए विजिटर रजिस्ट्रेशन शुरू करने की घोषणा की है। यह ग्लोबल सेमीकंडक्टर ट्रेड्स और भारत के लोकल इकोसिस्टम विकास को प्रदर्शित करने के लिए कार्यक्रम है।

बता दें कि 'सेमीकॉन इंडिया' 2 से 4 सितंबर तक यशोभूमि (भारत अंतरराष्ट्रीय कन्वेंशन और एक्सपो सेंटर), नई दिल्ली में आयोजित किया जाएगा।

इस कार्यक्रम में 'बिल्डिंग द नेक्स्ट सेमीकंडक्टर पावरहाउस' थीम के तहत माइक्रोइलेक्ट्रॉनिक्स और सेमीकंडक्टर वैल्यू चेन में भारत की बढ़ती क्षमताओं और महत्वाकांक्षाओं को प्रदर्शित किया जाएगा।

भारत सरकार के इलेक्ट्रॉनिक्स और सूचना प्रौद्योगिकी मंत्रालय के इंडिया सेमीकंडक्टर मिशन के तत्वावधान में आयोजित होने जा रहा यह कार्यक्रम नीति, उद्योग, शिक्षा और निवेश को लेकर उच्च प्रभाव वाले मंच के रूप में काम करेगा। इसमें 18 देशों / क्षेत्रों की 300 से ज्यादा कंपनियां संपूर्ण इलेक्ट्रॉनिक्स वैल्यू चेन का प्रदर्शन करेंगी।

इस तीन दिवसीय सम्मेलन को ग्लोबल सीएक्सओ और विशेषज्ञ वक्ता संबोधित करेंगे। इसके अलावा वर्कफोर्स डवलपमेंट पैविलियन, स्टार्टअप पैविलियन, 7 कंट्री राउंड टेबल्स और बी2बी फोरम्स, ट्रेनिंग और कौशल उन्नयन कार्यक्रम भी खास आकर्षण होंगे।

सेमी के अध्यक्ष एवं सीईओ अजित मनोचा ने कहा, 'सेमी के पास हमारे प्रमुख सेमीकॉन प्रदर्शनियों और कार्यक्रमों के जरिए ग्रीनफील्ड देशों में सेमीकंडक्टर इको सिस्टम के विस्तार को सक्षम करने का शानदार ट्रैक रिकॉर्ड है।'

ಸೆಮಿಕಂಡಕ್ಟರ್ ಪವರ್‌ಹೌಸ್ ನಿರ್ಮಾಣಕ್ಕೆ ಸಂದರ್ಶಕರ ನೋಂದಣಿ ಆರಂಭ

2025 ಸೆಪ್ಟೆಂಬರ್ 2 ರಿಂದ 4 ರ ವರೆಗೆ ನವದೆಹಲಿಯಲ್ಲಿನ ಯಶೋಭೂಮಿಯಲ್ಲಿ (ಇಂದಿಯಾ ಇಂಟರ್‌ನ್ಯಾಷನಲ್ ಕನ್ವೆನ್ಷನ್ ಆಂಡ್ ಎಕ್ಸ್‌ಪೋ ಸೆಂಟರ್) ನಡೆಯಲಿರುವ ಸೆಮಿಕಾನ್ ಇಂದಿಯಾ 2025 ಕ್ಕೆ ಸಂದರ್ಶಕರ ನೋಂದಣಿ ಆರಂಭವಾಗಿದೆ. ಉದ್ಘಾಟನೆ ಪಾಲುದಾರರ ಸಹಭಾಗಿತ್ವದಲ್ಲಿ ಸೆಮಿ ಮತ್ತು ಐಎಸ್‌ಎಂ ಇದನ್ನು ನಡೆಸುತ್ತಿದೆ.

“ಭವಿಷ್ಯದ ಸೆಮಿಕಂಡಕ್ಟರ್ ಪವರ್‌ಹೌಸ್ ನಿರ್ಮಾಣ” ಎಂಬ ಥೀಮ್ ಅಡಿಯಲ್ಲಿ ಕಾರ್ಯಕ್ರಮವು ನಡೆಯಲಿದ್ದು, ಮೈಸೂರಿನಲ್ಲಿರುವ ಸೆಮಿಕಂಡಕ್ಟರ್ ಪವರ್‌ಹೌಸ್ ನಿರ್ಮಾಣಕ್ಕೆ ಸಂಬಂಧಿಸಿದ ವಿಷಯಗಳನ್ನು ಉದ್ಘಾಟನೆ ಸಮಾರಂಭದಲ್ಲಿ ಚರ್ಚಿಸಲಾಗುವುದು.

ಭಾರತ ಸರ್ಕಾರದ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಮತ್ತು ಮಾಹಿತಿ ತಂತ್ರಜ್ಞಾನ (ಎಂಐಟಿಎ) ಸಚಿವಾಲಯದ ಇಂದಿಯಾ ಸೆಮಿಕಂಡಕ್ಟರ್ ಮಿಷನ್ ಅಡಿಯಲ್ಲಿ ಆಯೋಜಿಸಲಾಗಿರುವ ಸೆಮಿಕಾನ್ ಇಂದಿಯಾ 2025 ಕ್ಕೆ ಸೆಮಿಕಾನ್ ಇಂದಿಯಾ 2024 ರ ಅಭಿವೃದ್ಧಿಪೂರ್ವ ಯಶಸ್ವಿ ಹಿನ್ನೆಲೆಯಲ್ಲಿ, ನೀತಿ, ಉದ್ಯಮ, ಕೈಗಾರಿಕೆ ಮತ್ತು ಹೂಡಿಕೆ ಸಮುದಾಯಗಳಲ್ಲಿ ಜಾಗೃತಿ ಮತ್ತು ದೇಶೀಯ ಪಾಲುದಾರರನ್ನೂ ಈ ಕಾರ್ಯಕ್ರಮವು ಒಳಗೊಳ್ಳಲಿದೆ.

ಸೆಮಿ ಇಡೀ ದಿಕ್ಕಿನಲ್ಲಿ ನಡೆಸುತ್ತಿರುವ ಎಂಟು ಸೆಮಿಕಾನ್ ಪ್ರದರ್ಶನಗಳ ಪೈಕಿ ಸೆಮಿಕಾನ್ ಇಂದಿಯಾ ಒಂದಾಗಿದ್ದು, ಜಾಗೃತಿ ಸೆಮಿಕಂಡಕ್ಟರ್ ದಿನಾಸ ಮತ್ತು ಉತ್ಪಾದನೆ ವಲಯದಲ್ಲಿನ ಎಕ್ಸ್‌ಪೆರ್ಟ್‌ಗಳು ಮತ್ತು ಪ್ರಮುಖ ಪರಿಣಿತರನ್ನು ಇದು ಒಟ್ಟುಗೂಡಿಸಲಿದೆ. ಸೆಮಿಕಾನ್ ಇಂದಿಯಾ 2025 ಅಭಿವೃದ್ಧಿಪೂರ್ವ ಯಶಸ್ವಿ ನಿರೀಕ್ಷಿಸಲಾಗಿದ್ದು, ಭಾರತವು ಈ ವಲಯದಲ್ಲಿ ಭವಿಷ್ಯದ ಕೇಂದ್ರವಾಗುವುದಕ್ಕೆ ಇರುವ ಪ್ರಾಮುಖ್ಯತೆಯನ್ನು ಇದು ಸೂಚಿಸುತ್ತದೆ.

ಸೆಮಿ ಅಧ್ಯಕ್ಷರು ಮತ್ತು ಸಿಇಒ ಶ್ರೀ ಅಜಿತ್ ಮನೋಜಾ ಹೇಳುವಂತೆ “ಸಮ್ಮಿ ಸೆಮಿಕಾನ್ ಪ್ರದರ್ಶನ ಮತ್ತು ಕಾರ್ಯಕ್ರಮಗಳ ಮೂಲಕ ಗ್ರೀನ್‌ಫೀಲ್ಡ್‌ನಲ್ಲಿರುವ ಸೆಮಿಕಂಡಕ್ಟರ್ ಉದ್ಯಮವನ್ನು ದೃಢೀಕರಿಸುವ ಹಿನ್ನೆಲೆಯನ್ನು ಸೆಮಿ ಹೊಂದಿದೆ. ಚಿಪ್ ಉದ್ಯಮವು ಪೂರೈಕೆ ಸರಣಿಯಲ್ಲಿನ ತೊಂದರೆಯನ್ನು ಕಡಿಮೆ ಮಾಡುವುದಕ್ಕೆ ಎದುರು ನೋಡುತ್ತಿದೆ ಹಾಗೂ ಪ್ರತಿಭಾವಂತ ಇಂಜಿನಿಯರುಗಳನ್ನು ಸೇರಿಸಿಕೊಳ್ಳಲು ಮತ್ತು ವೇಗವಾಗಿ ಬೆಳೆಯುತ್ತಿರುವ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಮಾರ್ಕೆಟ್‌ಗೆ ದೃಢೀಕರಿಸುವ ಗುರಿಯನ್ನು ಇದು ಹೊಂದಿದೆ. ಇದು ಭಾರತವನ್ನು ಬೆಳೆಯುತ್ತಿರುವ ಒಂದು ಕೇಂದ್ರವನ್ನಾಗಿಸುವ ಅವಕಾಶವನ್ನು ಒದಗಿಸುತ್ತದೆ.

“ನಾವು ಉದ್ಘಾಟನೆ ನಾಯಕರು, ಅನೇಕವರು, ಸಂಕೀರ್ಣವಾಗಿ, ದೃಢೀಕರಿಸುವ ಮತ್ತು ಪಾಲಿಸಿದಾರರನ್ನು ಸೆಮಿಕಾನ್ ಇಂದಿಯಾ 2024 ಕ್ಕೆ ಸೇರುವಂತೆ ಆಹ್ವಾನಿಸುತ್ತಿದ್ದೇವೆ ಮತ್ತು ಸೆಮಿಕಂಡಕ್ಟರ್ ಉದ್ಯಮವನ್ನು ಭಾರತದಲ್ಲಿ ಬೆಳೆಸಲು ಸಹಕರಿಸಿ ಎಂದು ಕೇಳಿಕೊಳ್ಳುತ್ತಿದ್ದೇವೆ” ಎಂದು ಮಾಹಿತಿ ಮತ್ತು ತಂತ್ರಜ್ಞಾನ ಸಚಿವಾಲಯದ ಕಾರ್ಯದರ್ಶಿ ಶ್ರೀ ಎಸ್ ಕೃಷ್ಣನ್ ಹೇಳಿದ್ದಾರೆ.

ಭಾರತವು ಸೆಮಿಕಂಡಕ್ಟರ್ ಪ್ರಯಾಣದಲ್ಲಿ ಒಂದು ಮಹತ್ವದ ಘಟ್ಟದಲ್ಲಿದೆ. ಭಾರತದ ಸೆಮಿಕಂಡಕ್ಟರ್ ಮತ್ತು ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಪರಿಸರದಲ್ಲಿ ಬೆಳೆದಂತೆ ಮತ್ತು ಅನ್ವೇಷಣೆಯನ್ನು ವರ್ಧಿಸುವುದಕ್ಕೆ ನಾವು ಬಯಸುತ್ತಿದ್ದೇವೆ ಎಂದು ಸೆಮಿ ಇಂದಿಯಾ ಮತ್ತು ಐಎಸ್‌ಎಂ ಅಧ್ಯಕ್ಷ ಶ್ರೀ ಅಶೋಕ್ ಚಂದರ್ ಹೇಳಿದ್ದಾರೆ. “ಜಾಗೃತಿ ಮುಟ್ಟಿಸುವ ಸೆಮಿಕಂಡಕ್ಟರ್ ವಲಯವು ಬದಲಾವಣೆಗೆ ಸಾಕ್ಷಿಯಾಗುತ್ತಿರುವುದನ್ನು ಈ ವರ್ಷದ ಕಾರ್ಯಕ್ರಮವು ಬಳಸಿಕೊಳ್ಳುವ ಗುರಿಯನ್ನು ಹೊಂದಿದೆ. ಅಲ್ಲದೆ, ಇದು ಸೆಮಿಕಂಡಕ್ಟರ್ ಮೌಲ್ಯ ಸರಪಳಿಯಲ್ಲಿ ಬೆಳೆಯುತ್ತಿರುವ ಕೇಂದ್ರವನ್ನಾಗಿ ಭಾರತವನ್ನು ರೂಪಿಸಲು ಇದು ಸಹಾಯ ಮಾಡಲಿದೆ.

ಸಹಭಾಗಿತ್ವ ಮತ್ತು ಬೆಳೆದಂತೆಗೆ ವೇದಿಕೆ

ಸೆಮಿಕಾನ್ ಇಂದಿಯಾ 2025 ಇಡೀ ಜಾಗೃತಿ ಸೆಮಿಕಂಡಕ್ಟರ್ ಪರಿಸರ ವ್ಯವಸ್ಥೆಯ ಸಹಭಾಗಿತ್ವವನ್ನು ರೂಪಿಸಲಿದ್ದು, ವಿಶ್ವಾಸಾರ್ಹ ಮತ್ತು ದೃಢೀಕರಿಸುವುದಾದ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಉತ್ಪಾದನೆ ಕೇಂದ್ರವನ್ನಾಗಿ ಭಾರತವನ್ನು ರೂಪಿಸಲಿದೆ. ಸೆಮಿ ಮತ್ತು ಐಎಸ್‌ಎಂ (ಎಂಐಟಿಎ) ಜಂಟಿಯಾಗಿ ಆಯೋಜಿಸಿರುವ ಈ ಕಾರ್ಯಕ್ರಮವು ದಿಢೀಕರಿಸುವ ಸೆಮಿಕಂಡಕ್ಟರ್ ಉದ್ಯಮವನ್ನು ನಿರ್ಮಿಸುವ ನಿಟ್ಟಿನಲ್ಲಿ ಮಹತ್ವದ್ದಾಗಿದೆ.

ಸಂದರ್ಶಕರ ನೋಂದಣಿಯ ಈಗ ಸೆಮಿಕಾನ್ ಇಂದಿಯಾ 2025 ಕ್ಕೆ ತೆರೆದಿದೆ. ಇಲ್ಲಿ ನೋಂದಣಿ ಮಾಡಿ: semiconindia.org. ಇನ್ನಷ್ಟು ವಿವರಗಳಿಗಾಗಿ, ದಯವಿಟ್ಟು www.semiconindia.org ಗೆ ಭೇಟಿ ನೀಡಿ ಮತ್ತು ಲಿಂಕ್‌ಡ್‌ಇನ್ ಮತ್ತು ಎಕ್ಸ್‌ನಲ್ಲಿ ಸೆಮಿ ಇಂದಿಯಾವನ್ನು ಕನೆಕ್ಟ್ ಮಾಡಿ.

Karnataka : ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025 ನೋಂದಾಣಿ ಆರಂಭ...!

ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025 ನೋಂದಾಣಿ ಆರಂಭ...

ಬೆಂಗಳೂರು : ಸೆಮಿ ಮತ್ತು ಇಂಡಿಯಾ ಸೆಮಿಕಂಡಕ್ಟರ್ ಮಿಷನ್‌ನಿಂದ "ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025 - ಛನಿಷ್ಠದ ಸೆಮಿಕಂಡಕ್ಟರ್ ಪರಾಕಾಶ ನಿಯೋಗ" ಕ್ಕೆ ಸಂದರ್ಶನದ ಸೂಚನೆಯಾಗಿ ಆರಂಭ. ಜಾಗತಿಕ ಸೆಮಿಕಂಡಕ್ಟರ್ ಟ್ರಾಂಜಾಕ್ಟ್ ಮತ್ತು ಫಾರವರ್ಡ್ ಸ್ಥಳೀಯ ಉದ್ಯಮ ಉದ್ದೇಶಗಳನ್ನು ಪ್ರದರ್ಶಿಸುವ ಅಂತರಾಷ್ಟ್ರೀಯ 2025 ಸೆಪ್ಟೆಂಬರ್ 2 ರಿಂದ 4 ರ ವರೆಗೆ ನಡೆಯಲಿರುವಲ್ಲಿ (ಇಂಡಿಯಾ ಇಂಟರ್ನ್ಯಾಷನಲ್ ಕನ್ಸೆಸ್ಸನ್ ಅಂಡ್ ಎಕ್ಸ್ಪೋಸಿಷನ್) ನಡೆಯಲಿರುವ ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025 ಕ್ಕೆ ಸಂದರ್ಶನದ ಸೂಚನೆಯಾಗಿ ಆರಂಭವಾಗಿದೆ. ಅದ್ವೈತದ ಖಾಸುಕಾದ ಸಂಭ್ರಮಕ್ಕೂ ಸೆಮಿ ಮತ್ತು ಉಳುಮೆ ಇವನ್ನು ನಡೆಸುತ್ತಿದೆ.

"ಛನಿಷ್ಠದ ಸೆಮಿಕಂಡಕ್ಟರ್ ಪರಾಕಾಶ ನಿಯೋಗ" ಎಂಬ ಛನಿಷ್ಠದ ಅಡಿಯಲ್ಲಿ, ಅಂತರಾಷ್ಟ್ರೀಯ ನಡೆಯಲಿರುವ ಮೈಕ್ರೊಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಮತ್ತು ಸೆಮಿಕಂಡಕ್ಟರ್ ಕ್ಷೇತ್ರ ವ್ಯಾಪ್ತದಲ್ಲಿ ಫಾರವರ್ಡ್ ಸಾಮರ್ಥ್ಯ ಮತ್ತು ಮಹತ್ವಾಕಾಂಕ್ಷೆಗಳನ್ನು ಇದು ಪ್ರದರ್ಶಿಸಲಿದೆ.

ಫಾರವರ್ಡ್ ಸರ್ಕ್ಯೂಟ್ ಮತ್ತು ಮಾಹಿತಿ ತಂತ್ರಜ್ಞಾನ (ಎಂಐಟಿ) ಸಹವಾಸದ ಇಂಡಿಯಾ ಸೆಮಿಕಂಡಕ್ಟರ್ ಮಿಷನ್ ಅಡಿಯಲ್ಲಿ ಅಂತರಾಷ್ಟ್ರೀಯದ ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025 ಕ್ಕೆ ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2024 ರ ಅಧಿಕೃತವೂ ಯಶಸ್ವಿ ಹೆಜ್ಜೆಯಾಗಿ ನೆರೆಯಿದೆ. ನೀಡಿ, ಅದ್ವೈತ, ಕ್ರಿಶ್ಚಿಯನ್ ಮತ್ತು ಹೂಡಿಕೆ ಸಮುದಾಯದಲ್ಲಿ ಜಾಗತಿಕ ಮತ್ತು ದೇಶೀಯ ಖಾಸುಕಾದರೂ ಈ ಅಂತರಾಷ್ಟ್ರೀಯ ಒಳಗೊಳ್ಳಲಿದೆ.

ಸೆಮಿ ಇದೇ ವಿಶ್ವದಲ್ಲಿ ನಡೆಯುತ್ತಿರುವ ಎಂಟು ಸೆಮಿಕಾನ್ ಪ್ರದರ್ಶನಗಳ ಕ್ಕೆ ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ ಒಂದಾಗಿದ್ದು, ಜಾಗತಿಕ ಸೆಮಿಕಂಡಕ್ಟರ್ ವಿದ್ಯುತ್ ಮತ್ತು ಅಂತರಾಷ್ಟ್ರೀಯದ ನಡೆಯಲಿರುವ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಮತ್ತು ಪ್ರಮುಖ ಖರೀದಿಯನ್ನು ಇದು ಒಟ್ಟುಗೂಡಿದೆ. ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025 ಅಧಿಕೃತವೂ ಯಶಸ್ವಿ ನೆರೆಯಾಗಿದ್ದು, ಫಾರವರ್ಡ್ ಈ ಪಂದಿಯಲ್ಲಿ ಛನಿಷ್ಠದ ಕೊಡುಪಾಗುವುದಕ್ಕೆ ಇರುವ ಖಾಸುಕಾದರೂ ಇದು ಸೂಚಿಸುತ್ತದೆ.

ಅಭಿಮಾನಿ ಕ್ಷೇತ್ರಗಳು:

- 18 ದೇಶಗಳ/ಪ್ರದೇಶಗಳ 300 ಕ್ಕೂ ಹೆಚ್ಚು ಪ್ರದರ್ಶನ ನಡೆಯುವ ಕಂಪನಿಗಳು ತಮ್ಮ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ವ್ಯಾಪ್ತ ಕ್ಷೇತ್ರ ಅನ್ನು ಪ್ರದರ್ಶಿಸಲಿದೆ. ಇದರಲ್ಲಿ ಸಾಮಗ್ರಿಗಳು, ಸಂಕರಣಗಳು, ಸಿರಿಕಾನ್, ವಿದ್ಯುತ್ ಮತ್ತು ಸಿಕ್ವಿಡಾಳುಗಳ ಸೇರಿಸಿಕೊಳ್ಳುವುದು.
- ಜಾಗತಿಕ ಸಿಕ್ವಿಡಾಳು ಮತ್ತು ಪರಿಣಿತ ವಾಗ್ಧಗಳು ಈ 3 ದಿನದ ಸಮಾವೇಶದಲ್ಲಿ ಫಾರವರ್ಡ್‌ಗಲಿವುದು.
- 4 ಅಂತರಾಷ್ಟ್ರೀಯ ದೇಶಗಳಿಗಿದ್ದು, 9 ಕ್ಕೂ ಹೆಚ್ಚು ಸರ್ಕಾರಿಗಳು ಫಾರವರ್ಡ್‌ಗಲಿವುದು.
- ವಿಶೇಷ ದ್ವಿಷ್ಠಗಳು: ಅಂತರಾಷ್ಟ್ರೀಯ ಅಧಿಷ್ಠಿತಿ, ದೇಶೀ, ಸ್ವಾತಂತ್ರ್ಯ ದೇಶೀ, 7 ದೇಶದ ಮಂಡಳಿಯಾಗಲು ಮತ್ತು ಔದ್ಯಮಿಕ ಫೋರಮ್‌ಗಳು, ಪರದೇಶಿ ಮತ್ತು ಕೌಶಲ ಅಂತರಾಷ್ಟ್ರೀಯಗಳು.

ಸೆಮಿ ಅದ್ವೈತ ಮತ್ತು ಸಿಕ್ವಿಡಾಳು ಅಕಾಶ ವಾಹನಗಳ ಸೇರಿಸಿಕೊಳ್ಳುವುದು, ಸೆಮಿಕಾನ್ ಪ್ರದರ್ಶನ ಮತ್ತು ಅಂತರಾಷ್ಟ್ರೀಯ ಮೂಲಕ ಗ್ರಾಫೀಕ್ಸ್ ದೇಶಗಳಲ್ಲಿ ಸೆಮಿಕಂಡಕ್ಟರ್ ಅದ್ವೈತವನ್ನು ವಿಗ್ರಹಿಸುವಲ್ಲಿ ಅಷ್ಟು ಹೆಜ್ಜೆಯನ್ನು ಸೆಮಿ ಹೂಡಲಿದೆ. ಈಗ ಅದ್ವೈತವು ಫಾರವರ್ಡ್ ಸಂದೇಶವನ್ನು ಸೂಚಿಸುವುದು, ಅದೇ ಮಾರುವುದಕ್ಕೆ ಎದುರು ನೋಡುತ್ತಿದ್ದ ಜಾಗತಿಕ ಫೋರಮ್‌ನ ಅಂತರಾಷ್ಟ್ರೀಯದ ಸೆಮಿಕಂಡಕ್ಟರ್ ಮತ್ತು ದೇಶೀಯದ ಸೆಮಿಕಂಡಕ್ಟರ್ ಬೆಳೆಯುತ್ತಿರುವ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಮಾಹಿತಿಗಾಗಿ ವಿಗ್ರಹಿಸುವ ಗುರಿಯನ್ನು ಇದು ಹೂಡಲಿದೆ. ಇದು ಫಾರವರ್ಡ್‌ನ ಬೆಳೆಯುತ್ತಿರುವ ಒಂದು ಕೊಡುಪಾಗುವ ಅಂತರಾಷ್ಟ್ರೀಯ ಒಡಗೂಡುತ್ತಿದೆ."

"ಇದ್ದು ಅದ್ವೈತದ ಸಾಯಕರು ಅಧಿಕೃತವು, ಸಂಕರಣಗಳು, ವಿದ್ಯುತ್ಗಳು ಮತ್ತು ಪಾರಿಸರೀಯದ ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025 ಕ್ಕೆ ಸೇರಿಸಿಕೊಳ್ಳುವಲ್ಲಿ ಅಷ್ಟು ಹೆಜ್ಜೆಯನ್ನು ಸೆಮಿಕಾನ್ ಪ್ರದರ್ಶನದಲ್ಲಿ ಬೆಳೆಸಲು ಸಾಕಾಣಿಕೆ ಎಂದು ಕೇಳಿಕೊಳ್ಳುತ್ತಿದ್ದೆವು" ಎಂದು ಮಾಹಿತಿ ಮತ್ತು ತಂತ್ರಜ್ಞಾನ ಸಹವಾಸದ ಅಂತರಾಷ್ಟ್ರೀಯ ಸ್ಥಳೀಯ ಕ್ಷೇತ್ರಗಳಲ್ಲಿ. ಫಾರವರ್ಡ್ ಸೆಮಿಕಂಡಕ್ಟರ್ ಮತ್ತು ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಪರದೆಯಲ್ಲಿ ಬೆಳೆಸಲಾಗಿದೆ ಮತ್ತು ಅಧಿಕೃತವನ್ನು ವರ್ಧಿಸುವುದಕ್ಕೆ ಇದ್ದು ಅದ್ವೈತವಾಗಲಿದೆ ಎಂದು ಸೆಮಿ ಇಂಡಿಯಾ ಮತ್ತು ಉಳುಮೆ ಅದ್ವೈತ ಸ್ಥಳೀಯ ಅಂತರಾಷ್ಟ್ರೀಯದ ಸೆಮಿಕಾನ್ ಪ್ರದರ್ಶನದಲ್ಲಿ. "ಜಾಗತಿಕ ಮತ್ತು ಸೆಮಿಕಂಡಕ್ಟರ್ ಪಂದಿಯು ಲಭ್ಯವಾಗಲಿ ಸಾಧ್ಯವಾಗಲಿರುವುದನ್ನು ಈ ವರ್ಷದ ಅಂತರಾಷ್ಟ್ರೀಯ ಬೆಳೆಸಿಕೊಳ್ಳುವ ಗುರಿಯನ್ನು ಹೂಡಲಿದೆ. ಅದ್ವೈತ, ಇದು ಸೆಮಿಕಂಡಕ್ಟರ್ ಬೆಳೆಸುವ ಸಂದರ್ಭದಲ್ಲಿ ಬೆಳೆಯುತ್ತಿರುವ ಕೊಡುಪಾಗುವ ಫಾರವರ್ಡ್‌ನ ಉಳುಮೆ ಇದು ಸೂಚಿಸುವುದಾಗಿದೆ."

ಸಹಭಾಗಿತ್ವ ಮತ್ತು ಬೆಳೆಸಿಕೊಳ್ಳುವ ದೇಶ

ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025 ಇದೇ ಜಾಗತಿಕ ಸೆಮಿಕಂಡಕ್ಟರ್ ಪರಾಕಾಶ ಪ್ರದರ್ಶನ ಸಂಭ್ರಮಕ್ಕೂ ಉಳುಮೆಗಲಿವುದು, ವಿಶ್ವಾಸಾರ್ಥ ಮತ್ತು ವಿಗ್ರಹಿಸುವುದಾದ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಅಂತರಾಷ್ಟ್ರೀಯ ಕೊಡುಪಾಗುವ ಫಾರವರ್ಡ್‌ನ ಉಳುಮೆಗಲಿವುದು. ಸೆಮಿ ಮತ್ತು ಉಳುಮೆ (ಎಂಐಟಿ) ಪಂದಿಯಾಗಿ ಅಧಿಕೃತವಾಗುವ ಈ ಅಂತರಾಷ್ಟ್ರೀಯದ ಸೆಮಿಕಂಡಕ್ಟರ್ ಅದ್ವೈತವನ್ನು ವಿಶ್ವಗಮ್ಯವಿವಿಧ, ಮಹತ್ವಾಕಾಂಕ್ಷೆ.

ಸಂದರ್ಶಕರ ನೋಂದಣಿಯು ಈಗ ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025 ಕ್ಕೆ ತೆರೆದಿದೆ

ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025 - ಭವಿಷ್ಯದ ಸೆಮಿಕಂಡಕ್ಟರ್ ಪವರ್‌ಹೌಸ್ ನಿರ್ಮಾಣದ ಕಡೆ ಭಾರಿ ಹೆಜ್ಜೆ

ಸೆಪ್ಟೆಂಬರ್ 2-4ರಂದು ನಡೆದದ್ದರಲ್ಲದೆ, ನವದೆಹಲಿಯಲ್ಲಿ ನಡೆಯಲಿರುವ ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025ಕ್ಕೆ ನೇತೃತ್ವ ವಹಿಸಿರುವ "ಭವಿಷ್ಯದ ಸೆಮಿಕಂಡಕ್ಟರ್ ಪವರ್‌ಹೌಸ್" ನಿರ್ಮಾಣವನ್ನು ಉದ್ದೇಶಿಸಿ ಸೆಮಿ ಮತ್ತು ISM ಅಂಶಗಳೊಂದಿಗೆ ಈ ಗ್ಯಾಲರಿಯ ತಂತ್ರಜ್ಞಾನ ಉತ್ಪಾದನೆಯಲ್ಲಿ 300ಕ್ಕೂ ಹೆಚ್ಚು ಕಂಪನಿಗಳ ಭಾಗವಹಿಸಿ.

ನವದೆಹಲಿ, ಜುಲೈ 12 - ಸೆಮಿ ಮತ್ತು ಇಂಡಿಯಾ ಸೆಮಿಕಂಡಕ್ಟರ್ ಮಿಷನ್ (ISM) ಇಂಡಿಯಾದ ಅಂಶಗಳೊಂದಿಗೆ ನಡೆದ "ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025" ಕಾರ್ಯಕ್ರಮದ ಸಂದರ್ಶಕರ ಸೋಂಕಿನಲ್ಲಿ ಈಗಲೇ ಆರಂಭವಾಗಿದೆ. ಸೆಪ್ಟೆಂಬರ್ 2ರಿಂದ 4ರವರೆಗೆ, ನವದೆಹಲಿಯ ಯಶೋಭೂಮಿ (ಇಂಡಿಯಾ ಇಂಟರ್‌ನ್ಯಾಷನಲ್ ಕನ್ಸೆಸ್ಸಸ್ ಮತ್ತು ಎಕ್ಸ್‌ಪೋ ಸೆಂಟರ್) ನಲ್ಲಿ ಈ ಮಹತ್ವದ ತಂತ್ರಜ್ಞಾನ ಉತ್ಪಾದನೆಯ ನಡೆಯಲಿದೆ.

ಈ ವರ್ಷದ ಥೀಮ್: "ಭವಿಷ್ಯದ ಸೆಮಿಕಂಡಕ್ಟರ್ ಪವರ್‌ಹೌಸ್ ನಿರ್ಮಾಣ" - ಭಾರತವು ಮೈಕ್ರೋಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಮತ್ತು ಸೆಮಿಕಂಡಕ್ಟರ್ ಮೌಲ್ಯ ಸರಪಳಿಯಲ್ಲಿ ಪ್ರಮುಖ ಸ್ಥಾನವನ್ನು ಪಡೆಯುವ ದೃಷ್ಟಿಯಲ್ಲಿ, ಈ ಉತ್ಪಾದನೆಯ ದೇಶೀಯ ಹಾಗೂ ಜಾಗತಿಕ ತಂತ್ರಜ್ಞಾನ ಶ್ರೇಷ್ಠತೆಯನ್ನು ಒಟ್ಟಿಗೆ ತರಲಿದೆ.

ಪ್ರಮುಖ ಹೈಲೈಟ್‌ಗಳು:

- 300 ಕ್ಕೂ ಹೆಚ್ಚು ಪ್ರದರ್ಶನದ ಕಂಪನಿಗಳು 18 ದೇಶಗಳಿಂದ ಭಾಗವಹಿಸಿ, ರಾಜಕೀಯದಿಂದ ವಿದ್ಯಾಸಹಜವಾಗಿ ಸಂಪೂರ್ಣ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಚೈನ್ ಪ್ರದರ್ಶಿಸಲಿದೆ.
- ಜಾಗತಿಕ CXO ಗಳು ಮತ್ತು ಶ್ರೇಷ್ಠ ತಂತ್ರಜ್ಞಾನ ಭಾಗವಹಿಸಲಿದ್ದಾರೆ.
- 4 ಅಂತಾರಾಷ್ಟ್ರೀಯ ವೇದಿಕೆಗಳು, 9 ರಾಜ್ಯಗಳ ಸರ್ಕಾರಗಳ ಭಾಗವಹಿಸಿ.
- ಕಾರ್ಯವೇಡಿ, ಸ್ಟಾರ್ಟ್‌ಅಪ್ ವೇದಿಕೆ, 7 ದೇಶಗಳ ದುಂದುಮೇಳು ಚರ್ಚೆಗಳು, ತರಬೇತಿ ಕಾರ್ಯಾಗಾರಗಳು.

ಮಹತ್ವದ ಅಭಿಪ್ರಾಯಗಳು:

- ಅಜಿತಾ ಮನೋಹಾ (ಸೆಮಿ ಅಧ್ಯಕ್ಷ ಮತ್ತು ಸಿಇಒ):
"ಅಭಿವೃದ್ಧಿಯ ಹಾದಿಯಲ್ಲಿ ಇರುವ ಗ್ರೇನಾಥೀಲ್ದ ದೇಶಗಳಲ್ಲಿ ಸೆಮಿಕಂಡಕ್ಟರ್ ವಿಶ್ವದಲ್ಲೇ ಸೆಮಿ ಉತ್ಪಾದನೆಯ ನೇತೃತ್ವ. ಭಾರತವು ಪೂರೈಕೆ ಸರಪಳಿಯ ಸ್ಥಿರತೆಗೆ ಸಹಾಯ ಮಾಡುವಂತಹ ತಂತ್ರಜ್ಞಾನವನ್ನು ಅಭಿವೃದ್ಧಿ ಪಡಿಸುತ್ತಿದೆ."
- ಎಸ್. ಕೃಷ್ಣನ್ (ಎಂಇಐಟಿವೈ ಕಾರ್ಯದರ್ಶಿ):
"ವಿದ್ಯಾರ್ಥಿಗಳು, ಉದ್ಯಮಿಗಳು, ಸಂಶೋಧಕರು, ಎಲ್ಲಾ ಭಾಗವಹಿಸಬೇಕು. ಈ ಉತ್ಪಾದನೆಯ ಭಾರತದ ಟಾಪ್ ಉದ್ಯಮದ ಬೆಳವಣಿಗೆಗೆ ವಿದೇಶಿ ಹೂಡಿಕೆಯನ್ನು ಸೆಳೆಯುವ ಬೃಹತ್ ವೇದಿಕೆಯಾಗಿದೆ."
- ಅಶೋಕ್ ಚಂದ್ (ಸೆಮಿ ಇಂಡಿಯಾ ಮತ್ತು ಐಇಎಸ್‌ಎ ಅಧ್ಯಕ್ಷ):
"ಈ ಕಾರ್ಯಕ್ರಮ ಜಾಗತಿಕ ಸೆಮಿಕಂಡಕ್ಟರ್ ವಲಯದ ಏಕೀಕರಣವಾಗಿದೆ, ಭಾರತವು ಮೌಲ್ಯ ಸರಪಳಿಯ ಹೆದರದ ಕೇಂದ್ರವಾಗಲು ಇದು ಬಹುಮುಖ ಸಾಧನವಾಗಲಿದೆ."

ಭಾರತದ ಭವಿಷ್ಯಕ್ಕೆ ಸೆಮಿ ವೇದಿಕೆ

ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025, ಸೆಮಿ ಜಾಗತಿಕ ಮಟ್ಟದಲ್ಲಿ ನಡೆಯುವ ಎಂಟು ಪ್ರಮುಖ ಸೆಮಿಕಾನ್ ಇವೆಂಟ್‌ಗಳಲ್ಲಿ ಒಂದಾಗಿದೆ. ಇದು ಭಾರತವನ್ನು ವಿಶ್ವಾಸಾರ್ಹ, ತಂತ್ರಜ್ಞಾನ ಸಾಮರ್ಥ್ಯವಿರುವ ಸೆಮಿಕಂಡಕ್ಟರ್ ಗುರಿಮಟ್ಟವನ್ನಾಗಿ ರೂಪಿಸಲು ಪ್ರಾರಂಭವಾಗಿದೆ.

ಸೆಮಿ ಕಂಡಕ್ಟರ್ ಪವರ್‌ಹೌಸ್ ನಿರ್ಮಾಣಕ್ಕೆ ಸಂದರ್ಶಕರ ನೋಂದಣಿಗಳ ಆರಂಭ

2025 ಸೆಪ್ಟೆಂಬರ್ 2 ರಿಂದ 4 ರ ವರೆಗೆ ನವದೆಹಲಿಯಲ್ಲಿನ ಯುಕೋಬೋಮಿಯಲ್ಲಿ (ಇಂಡಿಯಾ ಇಂಟರ್‌ನ್ಯಾಷನಲ್ ಕನ್‌ವೆನ್ಷನ್ ಅಂಡ್ ಎಕ್ಸ್‌ಪೋ ಸೆಂಟರ್) ನಡೆಯಲಿರುವ ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025 ಕ್ಕೆ ಸಂದರ್ಶಕರ ನೋಂದಣಿ ಆರಂಭವಾಗಿದೆ.

ಉದ್ಯಮದ ಖಾಲುದಾರರ ಸಹಭಾಗಿತ್ವದಲ್ಲಿ ಸೆಮಿ ಮತ್ತು ಐಎಸ್‌ಎಂ ಇದನ್ನು ನಡೆಸುತ್ತಿದೆ. "ಒಮ್ಮೊಮ್ಮೆ ಸೆಮಿಕಂಡಕ್ಟರ್ ಪವರ್‌ಹೌಸ್ ನಿರ್ಮಾಣ" ಎಂಬ ಥೀಮ್ ಅಡಿಯಲ್ಲಿ ಕಾರ್ಯಕ್ರಮವು ನಡೆಯಲಿದ್ದು, ಮೈಕ್ರೋಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಮತ್ತು ಸೆಮಿಕಂಡಕ್ಟರ್ ಚೈನ್ ವ್ಯಾಪ್ತದಲ್ಲಿ ಭಾರತದ ಸಾಮರ್ಥ್ಯ ಮತ್ತು ಮಹತ್ವಾಕಾಂಕ್ಷೆಗಳನ್ನು ಇದು ಪ್ರದರ್ಶಿಸಲಿದೆ.

ಭಾರತ ಸರ್ಕಾರದ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಮತ್ತು ಮಾಹಿತಿ ತಂತ್ರಜ್ಞಾನ (ಎಂಐಟಿಎಸ್) ಸಚಿವಾಲಯದ ಇಂಡಿಯಾ ಸೆಮಿಕಂಡಕ್ಟರ್ ಮಿಷನ್ ಅಡಿಯಲ್ಲಿ ಆಯೋಜಿಸಲಾಗಿರುವ ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025 ಕ್ಕೆ ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2024 ರ ಅಭಿವೃದ್ಧಿಪೂರ್ವ ಯಶಸ್ವಿನ ಹಿನ್ನೆಲೆಯಿದೆ. ನೀತಿ, ಉದ್ಯಮ, ಕೈಪಿಡಿ ವ್ಯವಸ್ಥೆ ಮತ್ತು ಹೊರತೆ ಸಮುದಾಯಗಳಲ್ಲಿ ಜಾಗೃತಿ ಮತ್ತು ದೇಶೀಯ ಖಾಲುದಾರರನ್ನೂ ಈ ಕಾರ್ಯಕ್ರಮವು ಒಳಗೊಳ್ಳಲಿದೆ.

ಸೆಮಿ ಇಡೀ ವಿಶ್ವದಲ್ಲಿ ನಡೆಸುತ್ತಿರುವ ಎಂಟು ಸೆಮಿಕಾನ್ ಪ್ರದರ್ಶನಗಳ ಪೈಕಿ ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ ಒಂದಾಗಿದ್ದು, ಜಾಗತಿಕ ಸೆಮಿಕಂಡಕ್ಟರ್ ವಿನ್ಯಾಸ ಮತ್ತು ಉತ್ಪಾದನೆ ವಲಯದಲ್ಲಿನ ಎಕ್ಸಕ್ಯೂಟಿವ್‌ಗಳು ಮತ್ತು ಪ್ರಮುಖ ಪರಿಣಿತರನ್ನು ಇದು ಒಟ್ಟಾಗಿಸಲಿದೆ. ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025 ಅಭಿವೃದ್ಧಿಪೂರ್ವ ಯಶಸ್ವಿನ ನಿರೀಕ್ಷಿಸಲಾಗಿದ್ದು, ಭಾರತವು ಈ ವಲಯದಲ್ಲಿ ಭವಿಷ್ಯದ ಕೇಂದ್ರವಾಗುವುದಕ್ಕೆ ಇರುವ ಪ್ರಾಮುಖ್ಯತೆಯನ್ನು ಇದು ಸೂಚಿಸುತ್ತದೆ.

ಸೆಮಿ ಅಧ್ಯಕ್ಷರು ಮತ್ತು ಸಿಇಒ ಶ್ರೀ ಅಶಿಶ್ ಮನೋಹಾ ಹೇಳುವಂತೆ "ನಮ್ಮ ಸೆಮಿಕಾನ್ ಪ್ರದರ್ಶನ ಮತ್ತು ಕಾರ್ಯಕ್ರಮಗಳ ಮೂಲಕ ಗ್ಲೋಬಲ್‌ನಲ್ಲಿ ದೇಶಗಳಲ್ಲಿ ಸೆಮಿಕಂಡಕ್ಟರ್ ಉದ್ಯಮವನ್ನು ಮಿಗ್ಗಿಸುವಲ್ಲಿ ಉತ್ತಮ ಹಿನ್ನೆಲೆಯನ್ನು ಸೆಮಿ ಹೊಂದಿದೆ. ಚಿಪ್ ಉದ್ಯಮವು ಪೂರೈಕೆ ಸರಣಿಯಲ್ಲಿನ ತೊಂದರೆಯನ್ನು ಕಡಿಮೆ ಮಾಡುವುದಕ್ಕೆ ಎದುರು ನೋಡುತ್ತಿದೆ ಹಾಗೂ ಪ್ರತಿಭಾವಂತ ಇಂಜಿನಿಯರುಗಳನ್ನು ಸೆರೆಸಿಕೊಳ್ಳಲು ಮತ್ತು ವೇಗವಾಗಿ ಬೆಳೆಯುತ್ತಿರುವ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಮಾರ್ಕೆಟ್‌ಗೆ ಮಿಗ್ಗಿಸುವ ಗುರಿಯನ್ನು ಇದು ಹೊಂದಿದೆ. ಇದು ಭಾರತವನ್ನು ಬೆಳೆಯುತ್ತಿರುವ ಒಂದು ಕೇಂದ್ರವನ್ನಾಗಿರುವ ಅವಕಾಶವನ್ನು ಒದಗಿಸುತ್ತದೆ.

ನಾವು ಉದ್ಯಮದ ನಾಯಕರು, ಆಯ್ಕೆಪಿತರು, ಸಂಶೋಧಕರು, ವಿದ್ಯಾರ್ಥಿಗಳು ಮತ್ತು ಪಾಲಿಸಿದಾರರನ್ನು ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025 ಕ್ಕೆ ಸೇರುವಂತೆ ಆಹ್ವಾನಿಸುತ್ತಿದ್ದೇವೆ ಮತ್ತು ಸೆಮಿಕಂಡಕ್ಟರ್ ಉದ್ಯಮವನ್ನು ಭಾರತದಲ್ಲಿ ಬೆಳೆಸಲು ಸಹಕರಿಸಿ ಎಂದು ಕೇಳಿಕೊಳ್ಳುತ್ತಿದ್ದೇವೆ" ಎಂದು ಮಾಹಿತಿ ಮತ್ತು ತಂತ್ರಜ್ಞಾನ ಸಚಿವಾಲಯದ ಕಾರ್ಯದರ್ಶಿ ಶ್ರೀ ಎಸ್ ಕೃಷ್ಣನ್ ಹೇಳಿದ್ದಾರೆ.

ಭಾರತವು ಸೆಮಿಕಂಡಕ್ಟರ್ ಪ್ರಯಾಣದಲ್ಲಿ ಒಂದು ಮಹತ್ವದ ಪಾತ್ರವಲ್ಲಿದೆ. ಭಾರತದ ಸೆಮಿಕಂಡಕ್ಟರ್ ಮತ್ತು ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಪರಿಸರದಲ್ಲಿ ಬೆಳವಣಿಗೆ ಮತ್ತು ಆಯ್ಕೆಪಿತರನ್ನು ವರ್ಧಿಸುವುದಕ್ಕೆ ನಾವು ಬದ್ಧವಾಗಿದ್ದೇವೆ ಎಂದು ಸೆಮಿ ಇಂಡಿಯಾ ಮತ್ತು ಐಎಸ್‌ಎಂ ಅಧ್ಯಕ್ಷ ಶ್ರೀ ಅಶೋಕ್ ಪಂಡತ್ ಹೇಳಿದ್ದಾರೆ. "ಜಾಗತಿಕ ಮಟ್ಟದಲ್ಲಿ ಸೆಮಿಕಂಡಕ್ಟರ್ ವಲಯವು ಬದಲಾವಣೆಗೆ ಸಾಕ್ಷಿಯಾಗುತ್ತಿರುವುದನ್ನು ಈ ವರ್ಷದ ಕಾರ್ಯಕ್ರಮವು ಬಳಸಿಕೊಳ್ಳುವ ಗುರಿಯನ್ನು ಹೊಂದಿದೆ. ಅಲ್ಲದೆ, ಇದು ಸೆಮಿಕಂಡಕ್ಟರ್ ಮೌಲ್ಯ ಸರಣಿಯಲ್ಲಿ ಬೆಳೆಯುತ್ತಿರುವ ಕೇಂದ್ರವನ್ನಾಗಿ ಭಾರತವನ್ನು ರೂಪಿಸಲು ಇದು ಸಹಾಯ ಮಾಡಲಿದೆ.

ಸಹಭಾಗಿತ್ವ ಮತ್ತು ಬೆಳವಣಿಗೆಗೆ ವೇದಿಕೆ

ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025 ಇಡೀ ಜಾಗತಿಕ ಸೆಮಿಕಂಡಕ್ಟರ್ ಪರಿಸರ ವ್ಯವಸ್ಥೆಯ ಸಹಭಾಗಿತ್ವವನ್ನು ರೂಪಿಸಲಿದ್ದು, ವಿಶ್ವಸಾಹ್ವ ಮತ್ತು ಮಿಗ್ಗಿಸುವುದಾದ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಉತ್ಪಾದನೆ ಕೇಂದ್ರವನ್ನಾಗಿ ಭಾರತವನ್ನು ರೂಪಿಸಲಿದೆ. ಸೆಮಿ ಮತ್ತು ಐಎಸ್‌ಎಂ (ಎಂಐಟಿಎಸ್) ಜಂಟಿಯಾಗಿ ಆಯೋಜಿಸಿರುವ ಈ ಕಾರ್ಯಕ್ರಮವು ವಿಶ್ವದರ್ಜೆಯ ಸೆಮಿಕಂಡಕ್ಟರ್ ಉದ್ಯಮವನ್ನು ನಿರ್ಮಿಸುವ ನಿಟ್ಟಿನಲ್ಲಿ ಮಹತ್ವದ್ದಾಗಿದೆ.

ಸಂದರ್ಶಕರ ನೋಂದಣಿಯು ಈಗ ಸೆಮಿಕಾನ್ ಇಂಡಿಯಾ 2025 ಕ್ಕೆ ತೆರೆದಿದೆ. ಇಲ್ಲಿ ನೋಂದಣಿ ಮಾಡಿ: semiconindia.org ಇನ್ನಷ್ಟು ವಿವರಗಳಿಗಾಗಿ, ದಯವಿಟ್ಟು www.semiconindia.org ಗೆ ಭೇಟಿ ನೀಡಿ ಮತ್ತು ಲಿಂಕ್ಡ್‌ಇನ್ ಮತ್ತು ಎಕ್ಸ್‌ನಲ್ಲಿ ಸೆಮಿ ಇಂಡಿಯಾವನ್ನು ಹೆಸೆಟ್ ಮಾಡಿ.

‘SEMICON India 2025’ to showcase India’s growing role as trusted, self-reliant, global chip hub

SEMICON India 2025, set for September 2–4 in Delhi, will spotlight India’s semiconductor ambitions. With global pavilions, CXO panels, startup showcases, and skill-building programmes, the event aims to position India as a trusted hub in [Q chip](#) innovation and manufacturing

New Delhi: The upcoming ‘SEMICON India 2025’ event will play a key role in showcasing how India is positioning itself as a trusted, self-reliant, and globally competitive hub in the semiconductor and microelectronics sector, the Ministry of Electronics and Information Technology (MeitY) said on Friday.

Scheduled to take place from September 2 to 4 at Yashobhoomi (India International Convention and Expo Centre) in the national capital, the event aims to highlight India’s growing capabilities and ambitions in the global semiconductor industry.

Jointly organised by the India Semiconductor Mission (ISM) and global industry body SEMI, the event will serve as a vital platform to bring together policymakers, industry leaders, global investors, startups and academia.

The fourth edition of the event comes at a time when the world is looking to strengthen semiconductor supply chains and embrace next-generation technologies to support digital development.

Additionally, ISM and SEMI officially opened visitor registrations on Friday for ‘SEMICON India 2025’, inviting global stakeholders to be part of India’s growing semiconductor story.

Building on the record success of ‘SEMICON India 2024’, this year’s edition will see larger participation and introduce several new features aimed at deepening India’s role in the global chip ecosystem.

For the first time, international pavilions from Japan, South Korea, Singapore, and Malaysia will be part of the exhibition. There will also be eight country roundtables, where companies from India and partner nations will come together to explore business and technology partnerships.

In a strong move towards skilling and future-readiness, the event will launch training, upskilling, and workforce development programmes targeted at students and engineers, said IT Ministry.

Career-counselling sessions will also be introduced to help guide young talent toward opportunities in the semiconductor industry. The conference will also host a dedicated Semiconductor Design Startup Pavilion, encouraging innovation-led enterprises in chip design. Nine Indian states will participate in this year's edition, up from six in 2024 — showcasing growing support at the state level.

Over 300 companies from 18 countries and regions will exhibit at the event, covering the entire [electronics](#) value chain — from raw materials and design to manufacturing and systems.

The event will also feature a three-day conference with top global CXOs and experts sharing insights on manufacturing, innovation, supply chain strategies, and industry trends.

Special features like B2B forums, workforce development zones, and structured training programmes will help strengthen India's semiconductor talent pipeline and support its vision of becoming a global semiconductor powerhouse.

SEMI and India Semiconductor Mission (ISM) Announce the Opening of Visitor Registrations for SEMICON India 2025 – Building the Next Semiconductor Powerhouse

Chennai, July 11, 2025: Visitor registration for SEMICON India 2025, scheduled to be held from 2nd to 4th September 2025 at Yashobhoomi (India International Convention and Expo Centre), New Delhi, has been opened by SEMI and ISM, in collaboration with industry partners.

Under the theme “*Building the Next Semiconductor Powerhouse*”, the event will showcase India’s growing capabilities and ambitions in the microelectronics and semiconductor value chain.

Organised under the aegis of the India Semiconductor Mission, Ministry of Electronics and Information Technology (MeitY), Government of India, SEMICON India 2025, building on the resounding success of SEMICON India 2024, will serve as a high-impact platform to unite global and domestic stakeholders across the policy, industry, academia, and investment communities.

SEMICON India is one of eight annual SEMICON expositions worldwide hosted by SEMI that bring together executives and leading experts in the global semiconductor design and manufacturing ecosystem. The anticipated impressive growth of SEMICON India 2025 highlights the importance of India as the next hub.

Event Highlights:

- 300+ Exhibiting Companies from 18 countries/regions showcasing the entire electronics value chain – from materials and equipment to silicon, design and systems
- 3-Day Conference featuring Global CXOs and expert speakers
- 4 International Pavilions, 9 Participating State Governments Pavilions
- Special Features include: Workforce Development Pavilion, Startup Pavilion, 7 Country Roundtables and B2B Forums, Training & Upskilling Programs

“SEMI has a proven track record of enabling semiconductor ecosystem expansions in greenfield countries via our flagship SEMICON expositions and programs to advance industry growth,” said **Ajit Manocha, President and CEO, SEMI**. “The chip industry is actively seeking to de-risk its supply chains, add engineering talent, and expand into fast-growing electronics markets – all pointing to promising opportunities in India as an emerging hub.”

“We invite industry leaders, innovators, researchers, students, and policymakers to join us at SEMICON India 2025 and be part of India’s semiconductor transformation Journey,” said **Shri S Krishnan, Secretary, MeitY**.

“India is at a pivotal moment in its semiconductor journey, and We are committed to accelerating the growth and innovation of India’s semiconductor and electronics ecosystem,” said **Ashok Chandak, President, SEMI India and IESA**. “This year’s event is set to capitalize on shifting global semiconductor dynamics to help establish India as a rising hub in the semiconductor value chain.”

Government Approves ₹1 Lakh Crore RDI Scheme to Power Next-Gen Innovation and Tech Sovereignty

The scheme is poised to serve as a turning point for India's R&D investment trajectory—unlocking vast opportunities for private sector-led research, product development, and global competitiveness.

In a monumental move for India's innovation and technology ecosystem, the Union Cabinet has approved the long-anticipated Research Development and Innovation (RDI) Scheme, allocating ₹1 lakh crore in long-term funding to empower sunrise sectors and strategic technologies. The scheme is poised to serve as a turning point for India's R&D investment trajectory—unlocking vast opportunities for private sector-led research, product development, and global competitiveness.

Industry stalwarts have enthusiastically welcomed the decision, describing it as a "game-changer" that could dramatically elevate India's stature as a self-reliant technology powerhouse.

Key objectives of the Scheme are as follows:

- Encourage the private sector to scale up research, development, and innovation (RDI) in sunrise domains and in other sectors relevant for economic security, strategic purpose, and self-reliance;
- Finance transformative projects at higher levels of Technology Readiness Levels (TRL)
- Support acquisition of technologies which are critical or of high strategic importance;
- Facilitate setting up of a Deep-Tech Fund of Funds.

"We Must Lead with Conviction, Not Dependency"

Dr. Ajai Chowdhry, Founder HCL, Chairman EPIC Foundation

Veteran technocrat and innovation evangelist Dr. Ajai Chowdhry, Founder of HCL and Chairman of the EPIC Foundation, praised the scheme as a historic step toward achieving technology sovereignty and realizing the long-term vision of Viksit Bharat by 2047.

"I warmly welcome the Union Cabinet's approval of the Research Development and Innovation (RDI) Scheme with a substantial outlay of ₹1 lakh crore, a milestone I've eagerly anticipated for the past 2-3 years. This landmark decision will profoundly impact India's research and innovation landscape. Under the Honorable Prime Minister's visionary leadership, the government has consistently demonstrated its commitment to progress in India's R&D investment. The announcement of a ₹1 lakh crore R&D fund by the Government last year has now taken shape, marking a significant step forward for India's scientific and technological advancement," **stated Dr. Chowdhry.**

Dr. Chowdhry emphasized the critical need to improve India's R&D investment, currently hovering around **0.64% of GDP**, compared to **2–5%** in leading innovation economies like the U.S., Japan, and China.

"The private sector's contribution has been particularly limited. This was recognized by some of us and the government and recognizing this gap, the government's approval of the RDI scheme is a landmark decision, where the whole idea seems to be to encourage private sector to pick up strategic areas and sunrise sectors and create products for both India and the global market," **Dr. Chowdhry stated.**

He noted that the fund will not only promote foundational research but also enable translational research—bridging the gap from academia to market. He further added, "Typically, under ANRF, technical, education / research institutions will take upto TRL (technology Readiness Level 4). Private sector (both Corporate and Start-ups) can then take it for translational research to TRL-9 for India and the world. Covid-19 catapulted us to the top league of connected nations. We made the right choices and the world watched us do that. Recently, Operation Sindoor has taught us another valuable lesson: we need belief in our own capabilities, invest in secure and indigenous infrastructure, become a product nation, and lead with conviction, not dependency."

"The newly approved R&D fund will play a pivotal role in realizing this vision, enabling India to develop cutting-edge products across various sectors and assert its position as a Product Nation in different areas. With the Honourable Prime Minister at the helm and an empowered group of secretaries led by the Cabinet Secretary, we can expect long-term benefits from this fund. Housing the RDI Scheme in the Department of Science and Technology (DST) is a fitting decision, given its focus on R&D. This initiative will be a crucial step towards achieving technology sovereignty and realizing the vision of Viksit Bharat by 2047- something for us to look forward to," **he concluded.**

"A Landmark Step Toward a Global Innovation Hub"

Ashok Chandak, President, IESA and SEMI India

"By unlocking ₹1 lakh crore of long-term capital for sunrise and strategic sectors, this initiative will catalyze private-sector-led innovation in areas critical to India's economic and technological sovereignty – including semiconductors, deep-tech, and electronics," **Mr. Chandak emphasized.**

Highlighting IESA's proactive commitment to this national mission, Chandak elaborated on the organization's collaborative roadmap with key stakeholders including ANRF, DST, and MeitY.

IESA strongly supports this vision and will actively work to mobilize its member base and ecosystem partners to align with the RDI goals. Mr. Chandak further stated that IESA has started to work with ANRF, DST and MeitY on R&D initiative and will contribute by:

- Implementing identified high-impact R&D opportunities in semiconductors, electronics systems, and embedded technologies;
- Facilitating collaboration between startups, academia, and industry to accelerate technology readiness;
- Industry Sponsorships and funding for the high impact R&D projects.
- And enabling the creation of robust pipelines for product commercialization and deep-tech venture growth.

Chandak underscored that the scheme has the potential to transform India's innovation landscape, positioning the country as a global R&D destination.

The Road Ahead

The RDI Scheme, backed by a historic funding corpus and guided by national priorities, comes at a time when India is poised to redefine its role in the global technology order. By empowering deep-tech ventures, fostering academia-industry collaboration, and accelerating product development pipelines, the scheme could unleash a new era of innovation-led growth.

With proactive support from leading industry associations and visionary technocrats, the RDI initiative holds promise not just for economic expansion—but for realizing a self-reliant, technology-sovereign India by 2047.

Centre approves ₹1 lakh crore scheme to boost R&D, innovation in sunrise sectors

The Department of Science and Technology (DST) will serve as the nodal department for the implementation of the RDI Scheme.

NEW DELHI: The Cabinet, led by Prime Minister Narendra Modi, on Tuesday approved the "Research Development and Innovation (RDI) Scheme" with a corpus of ₹1 lakh crore, a move that is expected to boost private sector investments in research and development (R&D) in sunrise sectors, such as deep tech and electronics.

'Recognizing the critical role that the private sector plays in driving innovation and commercialising research, the RDI Scheme aims to provide long-term financing or refinancing with long tenors at low or nil interest rates to spur private sector investment in RDI,' the Central government said in an official statement.

India has been a laggard vis-à-vis mature markets like the US, Japan, and China, in terms of R&D investments. Experts estimate that India allocates only about 0.64% of its GDP to investing in R&D.

As per the government statement, the scheme envisages alleviating the challenges in funding the private sector and seeks to provide growth and risk capital to sunrise and strategic sectors to facilitate innovation, promote adoption of technology, and enhance competitiveness.

Other key objectives of the scheme include financing transformative projects at higher levels of technology readiness levels (TRL); supporting the acquisition of technologies critical or of high strategic importance; and facilitating the setting up of a deep-tech fund of funds.

The governing board of Anusandhan National Research Foundation (ANRF), chaired by PM Modi, will provide overarching strategic direction to the RDI Scheme. The executive council (EC) of ANRF will approve the scheme's guidelines, and recommend second-level fund managers and scope and type of projects in the sunrise sectors.

An empowered group of secretaries (EGoS) led by the Cabinet Secretary will be responsible for approving scheme changes, sectors and types of projects as well as second-level fund managers, besides reviewing the performance of the Scheme, as per the statement.

The Department of Science and Technology (DST) will serve as the nodal department for the implementation of the RDI Scheme.

The RDI Scheme will have a two-tiered funding mechanism. At the first level, there will be a Special Purpose Fund (SPF) established within the ANRF, which will act as the custodian of funds. From the SPF funds, shall be allocated to second-level fund managers, primarily in the form of long-term concessional loans.

The funding for R&D projects by the second-level fund managers would normally be in the form of a long-term loan at low or nil interest rates. Financing in the form of equity may also be done, especially in the case of startups. Contribution to Deep-Tech Fund of Funds (FoF) or any other FoF meant for RDI may also be considered.

'By unlocking ₹1 lakh crore of long-term capital for sunrise and strategic sectors, this initiative will catalyze private-sector-led innovation in areas critical to India's economic and technological sovereignty — including semiconductors, deep-tech, and electronics. IESA strongly supports this vision and will actively work to mobilise its member base and ecosystem partners to align with the RDI goals,' said Ashok Chaudak, president of IESA and SEMI India.

'This fund will also enable translational research by the private sector. Typically, under ANRF, technical, education/research institutions will take it to Technology Readiness Level 4. Private sector (both corporate and startups) can then take it for translational research to TRL-9 for India and the world,' said Ajai Chowdhry, founder of HCL, and chairman of EPIC Foundation.

The newly approved R&D fund will enable India to develop cutting-edge products across various sectors and assert its position as a product nation in different areas, Chowdhry said.

Cabinet approves Research Development and Innovation (RDI) scheme

The scheme has been designed to overcome the constraints and challenges in funding of private sector; provide growth and risk capital to sunrise and strategic sectors.

In a transformative step to bolster India's research and innovation ecosystem, the Union Cabinet, chaired by Prime Minister Narendra Modi, has approved the Research Development and Innovation (RDI) Scheme with a corpus of Rs. One lakh Crore.

Recognizing the critical role that the private sector plays in driving innovation and commercializing research the RDI Scheme aims to provide long-term financing or refinancing with long tenors at low or nil interest rates to spur private sector investment in RDI.

The scheme has been designed to overcome the constraints and challenges in funding of private sector, and seeks to provide growth and risk capital to sunrise and strategic sectors to facilitate innovation, promote adoption of technology and enhance competitiveness.

Key objectives of the Scheme are as follows:

- a) Encourage the private sector to scale up research, development, and innovation (RDI) in sunrise domains and in other sectors relevant for economic security, strategic purpose, and self-reliance;
- b) Finance transformative projects at higher levels of Technology Readiness Levels (TRL);
- c) Support acquisition of technologies which are critical or of high strategic importance;
- d) Facilitate setting up of a Deep-Tech Fund of Funds.

The Governing Board of Anusandhan National Research Foundation (ANRF), chaired by the Prime Minister, will provide overarching strategic direction to the RDI Scheme. The Executive Council (EC) of ANRF will approve the Scheme's guidelines, and recommend 2nd level fund managers and scope and type of projects in sunrise sectors.

An Empowered Group of Secretaries (EGoS) led by the Cabinet Secretary, will be responsible for approving scheme changes, sectors and types of projects as well as second-level fund managers besides reviewing the performance of the Scheme. The Department of Science and Technology (DST) will serve as the nodal department for implementation of RDI Scheme.

The RDI Scheme will have a two-tiered funding mechanism. At the first level, there will be a Special Purpose Fund (SPF) established within the ANRF, which will act as the custodian of funds. From the SPF funds shall be allocated to a variety of 2nd level fund managers. This will be mainly in the form of long-term concessional loans.

The funding to R&D projects by the 2nd level fund managers would normally be in the form of long-term loan at low or nil interest rates. Financing in the form of equity may also be done, especially in case of startups. Contribution to Deep-Tech Fund of Funds (FoF) or any other FoF meant for RDI may also be considered.

By addressing the critical need of private sector for long-term, affordable financing, the RDI Scheme fosters self-reliance and global competitiveness, thereby facilitating a conducive innovation ecosystem for the country as it marches towards Viksit Bharat at 2047.

Ashok Chandak, President, IESA and SEMI India, stated: The Cabinet's approval of the Research Development and Innovation (RDI) Scheme is a landmark step in India's journey toward becoming a global innovation hub.

"By unlocking ₹1 lakh crore of long-term capital for sunrise and strategic sectors, this initiative will catalyze private-sector-led innovation in areas critical to India's economic and technological sovereignty — including semiconductors, deep-tech, and electronics. IESA strongly supports this vision and will actively work to mobilize its member base and ecosystem partners to align with the RDI goals."

He further stated that IESA has started to work with ANRF, DST and MeitY on R&D initiative and will contribute by:

- * Implementing identified high-impact R&D opportunities in semiconductors, electronics systems, and embedded technologies;
- * Facilitating collaboration between startups, academia, and industry to accelerate technology readiness;
- * Industry Sponsorships and funding for the high impact R&D projects.
- * Enabling the creation of robust pipelines for product commercialization and deep-tech venture growth.

The RDI scheme has the potential to transform India's innovation landscape — and IESA is committed to being a strategic enabler in this journey.

Dr. Ajai Chowdhry, Founder HCL, Chairman EPIC Foundation, stated: "I warmly welcome the Union Cabinet's approval of the Research Development and Innovation (RDI) Scheme with a substantial outlay of ₹1 lakh crore, a milestone I've eagerly anticipated for the past 2-3 years. This landmark decision will profoundly impact India's research and innovation landscape.

"Under the Honorable Prime Minister's visionary leadership, the government has consistently demonstrated its commitment to progress in India's R&D investment. The announcement of a ₹1 lakh crore R&D fund by the Government last year has now taken shape, marking a significant step forward for India's scientific and technological advancement.

"India's R&D investment has long been a concern, with the country allocating only about 0.64% of its GDP, significantly lower than 2-5% invested by nations like the US, Japan, and China. The private sector's contribution has been particularly limited. This was recognized by some of us and the government and recognizing this gap, the government's approval of the RDI scheme is a landmark decision, where the whole idea seems to be to encourage the private sector to pick up strategic areas and sunrise sectors and create products for both India and the global market.

"This fund will also enable translational research by the private sector. Typically under ANRF, technical, education / research institutions will take upto TRL (Technology Readiness Level 4). Private sector (both Corporate and Start-ups) can then take it for translational research to TRL-9 for India and the world.

"Covid-19 catapulted us to the top league of connected nations. We made the right choices, and the world watched us do that. Recently, Operation Sindoor has taught us another valuable lesson: we need belief in our own capabilities, invest in secure and indigenous infrastructure, become a product nation, and lead with conviction, not dependency.

"The newly approved R&D fund will play a pivotal role in realizing this vision, enabling India to develop cutting-edge products across various sectors and assert its position as a Product Nation in different areas.

"With the Honourable Prime Minister at the helm and an empowered group of secretaries led by the Cabinet Secretary, we can expect long-term benefits from this fund. Housing the RDI Scheme in the Department of Science and Technology (DST) is a fitting decision, given its focus on R&D. This initiative will be a crucial step towards achieving technology sovereignty and realizing the vision of Viksit Bharat by 2047- something for us to look forward to."

CENTRE APPROVES ₹1 LAKH CRORE SCHEME TO BOOST R&D, INNOVATION IN SUNRISE SECTORS

The Cabinet, led by Prime Minister Narendra Modi, on Tuesday approved the "Research Development and Innovation (RDI) Scheme" with a corpus of ₹1 lakh crore, a move that is expected to boost private sector investments in research and development (R&D) in sunrise sectors, such as deep tech and electronics.

'Recognizing the critical role that the private sector plays in driving innovation and commercialising research, the RDI Scheme aims to provide long-term financing or refinancing with long tenors at low or nil interest rates to spur private sector investment in RDI,' the Central government said in an official statement.

India has been a laggard vis-à-vis mature markets like the US, Japan, and China, in terms of R&D investments. Experts estimate that India allocates only about 0.64% of its GDP to investing in R&D.

As per the government statement, the scheme envisages alleviating the challenges in funding the private sector and seeks to provide growth and risk capital to sunrise and strategic sectors to facilitate innovation, promote adoption of technology, and enhance competitiveness.

Other key objectives of the scheme include financing transformative projects at higher levels of technology readiness levels (TRL); supporting the acquisition of technologies critical or of high strategic importance; and facilitating the setting up of a deep-tech fund of funds.

The governing board of Anusandhan National Research Foundation (ANRF), chaired by PM Modi, will provide overarching strategic direction to the RDI Scheme. The executive council (EC) of ANRF will approve the scheme's guidelines, and recommend second-level fund managers and scope and type of projects in the sunrise sectors.

An empowered group of secretaries (EGoS) led by the Cabinet Secretary will be responsible for approving scheme changes, sectors and types of projects as well as second-level fund managers, besides reviewing the performance of the Scheme, as per the statement.

The Department of Science and Technology (DST) will serve as the nodal department for the implementation of the RDI Scheme.

The RDI Scheme will have a two-tiered funding mechanism. At the first level, there will be a Special Purpose Fund (SPF) established within the ANRF, which will act as the custodian of funds. From the SPF funds, shall be allocated to second-level fund managers, primarily in the form of long-term concessional loans.

The funding for R&D projects by the second-level fund managers would normally be in the form of a long-term loan at low or nil interest rates. Financing in the form of equity may also be done, especially in the case of startups. Contribution to Deep-Tech Fund of Funds (FoF) or any other FoF meant for RDI may also be considered.

"By unlocking ₹1 lakh crore of long-term capital for sunrise and strategic sectors, this initiative will catalyze private-sector-led innovation in areas critical to India's economic and technological sovereignty – including semiconductors, deep-tech, and electronics. IESA strongly supports this vision and will actively work to mobilise its member base and ecosystem partners to align with the RDI goals," said Ashok Chandak, president of IESA and SEMI India.

"This fund will also enable translational research by the private sector. Typically, under ANRF, technical, education/research institutions will take it to Technology Readiness Level 4. Private sector (both corporate and startups) can then take it for translational research to TRL-9 for India and the world," said Ajai Chowdhry, founder of HCL, and chairman of EPIC Foundation.

The newly approved R&D fund will enable India to develop cutting-edge products across various sectors and assert its position as a product nation in different areas, Chowdhry said.

Electronics, spacetechn sectors cheer Rs 1 lakh crore RDI scheme as gamechanger for deeptech

India's electronics and space-tech industries have welcomed the Cabinet's approval of the Rs 1 lakh crore Research Development and Innovation (RDI) Scheme, saying it will finally provide the long-missing "patient capital" needed to take deep-tech ideas from lab prototypes to commercially viable products.

This is a gap that has long held back private sector innovation in strategic sectors.

Dr. Ajai Chowdhry, founder of HCL and chairman of the EPIC Foundation, described the scheme as a milestone that addresses India's long-standing underinvestment in R&D, particularly from the private sector. "This is a landmark decision that encourages industry to take the lead in strategic and sunrise sectors, developing products for both Indian and global markets," he said.

Chowdhry added that the fund would enable the private sector to take innovations beyond Technology Readiness Level 4, the stage typically reached by academic institutions, and build them out to full-scale, market-ready products. He also said the initiative aligns with India's broader ambition of becoming a "product nation" and achieving technology sovereignty.

Ashok Chandak, president of the India Electronics and Semiconductor Association (IESA) and SEMI India, called the RDI scheme a foundational step in turning India into a global innovation hub.

"By unlocking Rs 1 lakh crore of long-term capital, the scheme can drive private-sector-led R&D in areas that are critical for India's future — including semiconductors, embedded electronics, and other deep-tech verticals," he said.

Chandak said IESA is already engaging with the Department of Science and Technology (DST), the Anusandhan National Research Foundation (ANRF), and MeitY to identify high-impact projects and facilitate partnerships between startups, academia, and industry.

Speaking to Moneycontrol, Pawan Kumar Chandana, co-founder and CEO of Skyroot Aerospace, said the Cabinet's green light for the RDI scheme reflects India's intent to be a creator, not just a consumer, of deep-tech.

"Breakthrough innovation in areas like AI, biotech, space, and green energy needs sustained and patient capital. The government has rightly recognised this and backed it with long-term financing at nil or concessional rates," he said.

Chandana also welcomed the scheme's structure, which includes a Special Purpose Fund and provisions to contribute to the Deep-Tech Fund of Funds. "This shows a flexible and forward-looking approach to policymaking, one that can evolve with the speed of innovation," he said.

The RDI scheme, which will be anchored within DST, is expected to serve as a long-term driver of India's deep-tech ambitions and support the government's larger vision of building a self-reliant, innovation-led economy by 2047.

Thank You!
